If you fail to pass the certification exam, despite all your efforts, you could get a full refund from ValidTorrent according to terms and conditions.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q16-Q21):

NEW QUESTION # 16

Refer to the exhibit.

The screenshot shows the 'Edit Rule Exception > Define Schedule' configuration page. Under 'Time Range', 'Start Time' is 00:00:00, 'Time Zone' is Local, and 'Duration' is 2 Days. Under 'Recurrence Pattern', 'Recurring Dates' is selected. The 'Select Repeat Dates' calendar shows December 25th and 26th selected. The 'Select Repeat Months' section shows December selected.

An administrator applies the rule exception shown in the exhibit.
How does this configuration impact the incident generation for that rule?

- A. Incidents will be generated without triggering an email alert during the specified period.
- B. Events will not be processed by the rule during the specified period.
- C. Incidents will be generated only during the specified period.
- D. Incidents will not be generated during the specified period.

Answer: D

Explanation:

From the exhibit, the rule exception is set for:

Time Range: Starts at 00:00:00

Duration: 2 days

Recurrence Pattern: December 25th and December 26th

This means that during these two days (every year in December), the rule will not trigger incidents.

Rule exceptions temporarily suppress incident generation during the specified period.

Events are still processed, but no incidents are generated.

NEW QUESTION # 17

Refer to the exhibit.

Event Receive Time	Event Type	Source IP	Destination IP	Reporting IP	User	Raw Event Log
08:49:01 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.4	192.0.2.10	10.0.1.99	Admin	<189>date=2018-02-02...

08:52:59 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.4	192.0.2.10	10.0.1.99	Sarah	<189>date=2018-02-02...
08:50:31 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.50	192.0.2.10	10.2.2.55	Jan	<189>date=2018-02-02...

An administrator runs an analytic search for all FortiGate SSL VPN logon failures. The results are grouped by source IP, reporting IP, and user. The administrator wants to restrict the results to only those rows where the COUNT >= 3.

Which user would meet that condition?

- A. Sarah
- B. Jan
- C. Admin
- D. Tom

Answer: D

NEW QUESTION # 18

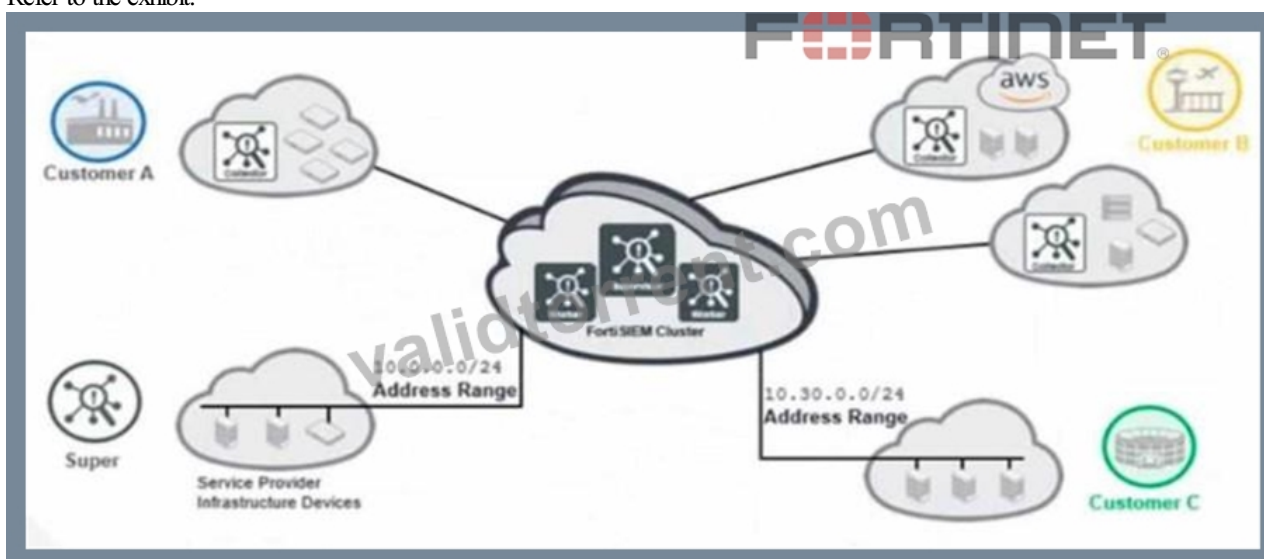

In the context of Clear Conditions and Remediation, which advantage does automation provide?

- A. Changing user access permissions based on their job roles?
- B. Introducing more complex incidents for training purposes?
- C. Increasing the frequency of software updates?
- D. Reducing response times to incidents and minimizing potential damage?

Answer: D

NEW QUESTION # 19

Refer to the exhibit.

Which deployment type is shown in the exhibit?

- A. Service provider with collectors
- B. Hybrid deployment with and without collectors
- C. Enterprise cloud deployment

- D. Service provider without collectors

Answer: B

Explanation:

The exhibit shows a FortiSIEM cluster deployed in a multi-tenant service provider environment, serving multiple customers. The architecture includes:

1. Customers with Collectors

Customer A and Customer B (AWS) have collectors deployed within their environments.

Collectors gather and forward logs to the FortiSIEM cluster for centralized analysis.

2. Customers Without Collectors

Customer C does not have a collector; instead, it sends logs directly to the FortiSIEM cluster.

3. Super Organization Managing Infrastructure

The service provider infrastructure devices (e.g., networking and security appliances) are managed directly by the FortiSIEM cluster.

This mixed setup, where some customers use collectors while others send logs directly, represents a hybrid deployment with and without collectors.

NEW QUESTION # 20

Which three processes are collector processes? (Choose three.)

- A. phRuleMaster
- B. phReportMaster
- C. phMonitorAgent
- D. phParser
- E. phAgentManager

Answer: C,D,E

Explanation:

These three processes are essential for a FortiSIEM collector, as they handle event parsing, agent communication, and system monitoring.

#phParser is responsible for parsing and processing collected logs before forwarding them.

#phAgentManager manages agent communication, ensuring logs are received and forwarded correctly.

#phMonitorAgent monitors the health of the collector itself, reporting system status to the FortiSIEM supervisor.

phReportMaster and phRuleMaster do not run on collectors. They are supervisor/worker processes handling reporting and rule evaluation, respectively.

NEW QUESTION # 21

.....

Fortinet FCSS_ADA_AR-6.7 certification is indeed a better idea before you start with the interviews. Fortinet FCSS_ADA_AR-6.7 certification will add up to your excellence in your field and leave no space for any doubts in the mind of the hiring team. But, have you thought about how can you prepare for the Fortinet FCSS_ADA_AR-6.7 Exam Questions? Do you have any idea how we can crack the nut to give wings to our dreams?
