Cisco Certified Network Associate Exam Sample Questions (Q748-Q753):

NEW QUESTION # 748

Drag and drop the WLAN components from the left onto the correct descriptions on the right.

access point	device that manages access points
virtual interface	device that provides Wi-Fi devices with a connection to a wired network
dynamic interface	used for out of band management of a WLC
service port	used to support mobility management of the WLC
wireless LAN controller	applied to the WLAN for wireless client communication

Answer:

Explanation:

The diagram illustrates the correct matching of WLAN components to their descriptions. It shows a list of components on the left and a list of descriptions on the right. The components are: access point, virtual interface, dynamic interface, service port, and wireless LAN controller. The descriptions are: device that manages access points, device that provides Wi-Fi devices with a connection to a wired network, used for out of band management of a WLC, used to support mobility management of the WLC, and applied to the WLAN for wireless client communication. The correct matches are: access point to device that provides Wi-Fi devices with a connection to a wired network, virtual interface to device that manages access points, dynamic interface to used for out of band management of a WLC, service port to used to support mobility management of the WLC, and wireless LAN controller to applied to the WLAN for wireless client communication.
