Useful H13-511_V5.5 Test Lab Questions - Pass H13-511_V5.5 Exam

BONUS!!! Download part of TestKingIT H13-511_V5.5 dumps for free: https://drive.google.com/open?id=14zFqhPMUd-CNAfE_-xfhXEsHspD2tllP

It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and try our best to get the related H13-511_V5.5 certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many H13-511_V5.5 Preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves.

Huawei H13-511_V5.5 Exam Syllabus Topics:

Topic	Details

Topic 1	• Be able to design and deploy Huawei's FusionCompute virtualization solution and FusionAccess desktop solution: This section covers the practical skills needed to architect and implement Huawei's enterprise virtualization platform FusionCompute and their desktop virtualization product FusionAccess. It includes planning, configuration, and deployment procedures for these Huawei-specific solutions.
Topic 2	• Describe the history of cloud computing: This section traces the evolution and development of cloud computing from its origins to its current state. It provides historical context for how cloud technology emerged and transformed over time.
Topic 3	• Describe what cloud computing is: This topic covers the fundamental definition and concept of cloud computing technology. It explains how cloud computing enables on-demand access to shared computing resources over the internet.
Topic 4	• Understand the differences between virtualization and cloud computing: This section clarifies how virtualization and cloud computing are related yet distinct technologies. It explains that virtualization is a key enabler of cloud computing but cloud encompasses broader service delivery models and characteristics.
Topic 5	• Understand KVM technology: This topic focuses on Kernel-based Virtual Machine (KVM) as a specific virtualization solution for Linux systems. It covers how KVM transforms Linux into a hypervisor to manage virtual machines efficiently.
Topic 6	• Be able to describe what virtualization is: This topic covers the concept of virtualization technology and how it enables multiple virtual instances to run on physical hardware. It explains the foundational role virtualization plays in creating isolated computing environments.

Free PDF H13-511_V5.5 - HCIA-Cloud Computing V5.5 High Hit-Rate Test Lab Questions

TestKingIT provides latest H13-511_V5.5 practice exam questions and H13-511_V5.5 certifications training material products for all those customers who are looking to pass H13-511_V5.5 exams. There is no doubt that the H13-511_V5.5 exams can be tough and challenging without valid H13-511_V5.5 brain dumps. We offer the guaranteed success with high marks in all H13-511_V5.5 exams. Our multiple H13-511_V5.5 certifications products let customers prepare and assess in the best way possible. We provide in-depth H13-511_V5.5 Study Material in the form of H13-511_V5.5 PDF dumps questions answers that will allow you to prepare yourself for the exam. H13-511_V5.5 exams PDF question answers also come with one year free update. We also provide live support chat to all our customers who have concerns about H13-511_V5.5 exams.

Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q10-Q15):

NEW QUESTION # 10
The operating system of each virtual machine can only see the resources provided by the virtualization layer Hypervvisor, and the resources of the virtual machines are invisible to each other.

- A. True
- B. False

Answer: A

NEW QUESTION # 11
Which of the following statements arefalseabout VLAN technology?

- A. A trunk interface is used to connect switches.
- B. An access interface is used to connect switches.
- C. A hybrid interface cannot be used to connect a switch and a server.

- D. A trunk link allows untagged packets from multiple VLANs to pass through.

Answer: B,C,D

Explanation:
VLAN technology is a fundamental topic in HCIA-Cloud Computing, especially for cloud network isolation and segmentation.
OptionAis false. Atrunk linkis designed to carry traffic frommultiple VLANs using VLAN tags (802.1Q).
Untagged traffic typically belongs to anative VLAN, not multiple VLANs.
OptionBis false. Ahybrid interfacecanbe used to connect a switch to a server. Hybrid interfaces support both tagged and untagged VLAN traffic and are commonly used in server and virtualization scenarios.
OptionCis true.Trunk interfacesare primarily used to connectswitch-to-switchlinks, allowing multiple VLANs to pass between switches.
OptionDis false.Access interfacesare designed to connectend devices(such as PCs or printers) and carry traffic foronly one VLAN, not for switch interconnections.
Therefore, the false statements areA, B, and D.

NEW QUESTION # 12
Both VRM and CAN have management functions. Which of the following are the functions of VRM? (Multiple choice)

- A. Manage the life cycle of virtual machines in the cluster and the distribution and migration of virtual machines on computing nodes
- B. Manage network resources (IPML AN) in the cluster and assign IP addresses to virtual machines
- C. Maintenance personnel can connect to the third-party management platform through the unified API interface provided by Fusion Computer to operate and maintain the entire system
- D. Unified management of virtual resources and user data, providing external services such as flexible computing, storage, and IP

Answer: A,B,C,D

NEW QUESTION # 13
The necessary conditions for a virtual machine to communicate with other virtual machines are?
(Multiple choice)

- A. Configure the correct IP address for the virtual machine
- B. Configure the gateway for the virtual machine
- C. Configure the correct MAC address for the virtual machine
- D. Configure a fixed IP address for the machine

Answer: A,C

NEW QUESTION # 14
During FusionAccess virtual desktop provisioning, when a VM is being created, which of the following components checks whether the specified VM group and desktop group exist?

- A. GaussDB
- B. HDA
- C. HDP
- D. HDC

Answer: D

Explanation:
In FusionAccess architecture:
HDC (Huawei Desktop Controller) is responsible for desktop lifecycle management, including provisioning logic, policy enforcement, and resource validation.
During VM creation, HDC verifies whether the specified VM group and desktop group exist and whether configurations are valid.
Other components:
GaussDB stores metadata.

HDA runs inside desktops.
HDP is a display protocol.
Thus, the correct answer is HDC.

NEW QUESTION # 15
.....

After using our H13-511_V5.5 study materials, you will feel your changes. These changes will increase your confidence in continuing your studies on H13-511_V5.5 real exam. Believe me, as long as you work hard enough, you can certainly pass the exam in the shortest possible time. The rest of the time, you can use to seize more opportunities. As long as you choose H13-511_V5.5 simulating exam, we will be responsible to you.
