Plat-Admn-202 Labs - Valid Test Plat-Admn-202 Tips

Our company employs the first-rate expert team which is superior to others both at home and abroad. Our experts team includes the experts who develop and research the Plat-Admn-202 cram materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the Plat-Admn-202 latest exam file and whose articles are highly authorized. They provide strong backing to the compiling of the Plat-Admn-202 Exam Questions and reliable exam materials resources. They compile each answer and question carefully. Each question presents the key information to the learners and each answer provides the detailed explanation and verification by the senior experts. The success of our Plat-Admn-202 latest exam file cannot be separated from their painstaking efforts.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details

Topic 1	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 2	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 3	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 4	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 5	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Salesforce Certified Platform App Builder Sample Questions (Q95-Q100):

NEW QUESTION # 95
Northern Trail Outfitters (NTO) has created the custom objects Trail and Park in Salesforce to track trails and parks respectively.
NTO wants to track the total number of trails a park has on the park record without writing any code.
Which two actions should an app builder take to accomplish this requirement?
Choose 2 answers

- A. Use a master-detail relationship between the Park and Trail objects.
- B. Use a lookup relationship between the Park and Trail objects.
- C. Use a formula field on the Park record to show the total number of trails.
- D. Use a roll-up summary field on the Park record to show the total number of Trails.

Answer: A,D

Explanation:
To track the total number of trails associated with a park without writing code, the correct actions to take are:
Use a roll-up summary field on the Park record to show the total number of Trails (B). Roll-up summary fields calculate and display a value in a master record based on the values of fields in a detail record. They are used to count, sum, average, or get the minimum/maximum of values in related detail records.

Use a master-detail relationship between the Park and Trail objects (C). Master-detail relationships are necessary for roll-up summary fields as they allow the master object to control certain behaviors of the detail object and summarize data from those detail records.

A formula field (A) cannot dynamically count related records unless those records are linked via a master-detail relationship, and it cannot alone handle counts across related records without such a relationship. A lookup relationship (D) does not support roll-up summaries unless combined with additional tools like triggers or third-party apps, which involve coding or extra configuration outside standard object setup.

For more details, refer to the Salesforce Help documentation on master-detail relationships and roll-up summary fields:
Master-Detail Relationship: https://help.salesforce.com/articleView?id=relationships_considerations.htm&type=5 Roll-Up Summary Fields: https://help.salesforce.com/articleView?id=fields_about_roll_up_summary_fields.htm&type=5

NEW QUESTION # 96

An app builder is creating a custom object called Testimonial__c and wants toconnect Testimonial__c records with both the submitter's Contact record and Account record. If the Account is deleted, the Testimonial__c should also be deleted. If the Contact is deleted, but the Account remains, the Testimonial__c should remain.
How should this be accomplished?

- A. Make both the Contact and Account fields required on the Testimonial__c object and create lookup relationships fromTestimonial__c to Contact and to Account.
- B. Create a master-detail relationship from Testimonial__c to Accountand a lookup relationship from Testimonial__c to Contact.
- C. Make Testimonial__c a junction object between Account and Contact using master-detail relationships.
- D. Create a lookup relationship from Testimonial__c to Account and a master-detail relationship from Testimonial__c to Contact.

Answer: B

Explanation:
To connect Testimonial__c records with both the submitter's Contact record and Account record, an app builder should create a master-detail relationship from Testimonial__c to Account and a lookup relationship from Testimonial__c to Contact. A master-detail relationship creates a parent-child relationship between two objects and allows for roll-up summary fields, sharing settings, and cascading actions. A lookup relationship creates a loose association between two objects and allows users to relate records from one object to another. Source

NEW QUESTION # 97

Cloud Kicks wants to set up a new opportunity approval process and execute various action items based on the initial submission.
Which three action types should an app builder use in the approval process?
Choose 3 answers

- A. Invocable Process Builder
- B. Invocable Flow
- C. Outbound Message
- D. Task
- E. Email Alert

Answer: B,D,E

Explanation:
Email alert, task, and invocable flow are three action types that can be used in an approval process. Email alert can send an email message to one or more recipients. Task can assign a task to a user or queue. Invocable flow can launch a flow that performs complex logic and actions

NEW QUESTION # 98

The Service Manager provided the app builder with color code requirements for case age on open cases.
New cases populate a green circle
Day-old cases populate a yellow circle
Three-day-old cases populate a red circle

How should an app builder implement this requirement?

- A. Formula Field
- B. Lightning Web Component
- C. Quick Action
- D. Custom Button

Answer: A

Explanation:
A formula field is a read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change. You can use formula fields to display images based on certain conditions. In this case, a formula field can be used to display a green, yellow, or red circle image based on the case age.

NEW QUESTION # 99

Cloud Kicks (CK) switched to Lightning Experience and started using Chatter across its global workforce to support its fast-paced sales cycle. CK loves Chatter but struggle with gathering feedback from core team members, including understanding who is available to respond.
Which two ways could CK use Chatter to solve this problem?
Choose 2 answers

- A. Topics
- B. Streams
- C. Out of Office
- D. Polls

Answer: C,D

Explanation:
Polls and Out of Office are two ways that CK can use Chatter to gather feedback and understand availability. Polls allow users to create surveys and collect opinions from other users. Out of Office lets users set a status message and an end date to inform others when they are away or busy. Streams and Topics are not related to the problem.

NEW QUESTION # 100

......

Our Plat-Admn-202 cram materials take the clients' needs to pass the test smoothly into full consideration. The questions and answers boost high hit rate and the odds that they may appear in the real exam are high. Our Plat-Admn-202 exam questions have included all the information which the real exam is about and refer to the test papers in the past years. Our Plat-Admn-202 cram materials analysis the popular trend among the industry and the possible answers and questions which may appear in the real exam fully. Our Plat-Admn-202 Latest Exam file stimulate the real exam's environment and pace to help the learners to get a well preparation for the real exam in advance. Our Plat-Admn-202 exam questions won't deviate from the pathway of the real exam and provide wrong and worthless study materials to the clients.
