

100% Pass Quiz 2026 EUNA_2024: Professional ArcGIS Utility Network Associate 2024 Test Pdf

ArcGIS Utility Network Associate 2024 Practice Exam

Question 1: What is the primary purpose of the ArcGIS Utility Network?

- A) To manage and analyze utility assets
- B) To create marketing campaigns
- C) To design social media strategies
- D) To generate financial reports

Answer: A

Explanation: The ArcGIS Utility Network is designed to manage and analyze utility infrastructure efficiently, supporting operational and planning needs.

Question 2: Which of the following is a core component of the Utility Network model?

- A) Geographic basemaps
- B) Network elements and associations
- C) Video streaming services
- D) E-commerce transactions

Answer: B

Explanation: The Utility Network model is built around network elements, their associations, and relationships, which enable detailed infrastructure management.

Question 3: What benefit does a utility network provide compared to traditional GIS systems?

- A) Enhanced social interaction
- B) Improved network connectivity and data integrity
- C) Reduced data storage
- D) Simplified website design

Answer: B

Explanation: Utility networks offer improved connectivity management and data integrity, which are essential for handling complex utility infrastructures.

Question 4: In ArcGIS Utility Network, what role do associations play?

- A) They connect network elements and define their relationships
- B) They serve as decorative elements
- C) They store media files
- D) They manage user accounts

Answer: A

Explanation: Associations in the utility network link various network elements and help define the connectivity and relationships necessary for accurate analysis.

Question 5: Which of the following best describes a utility network's design purpose?

- A) Managing and visualizing utility systems
- B) Developing mobile applications
- C) Creating digital art
- D) Analysing financial markets

Answer: A

Explanation: The utility network is specifically designed for managing and visualizing the interconnected systems of utilities, ensuring efficient operations.

For a long time, high quality is our EUNA_2024 exam torrent constantly attract students to participate in the use of important factors, only the guarantee of high quality, to provide students with a better teaching method, and at the same time the EUNA_2024 practice materials bring more outstanding teaching effect. And with the three different versions of our EUNA_2024 Exam Questions on the web, so high-quality EUNA_2024 learning guide help the students know how to choose suitable for their own learning method, our EUNA_2024 study materials are a very good option for you to pass the exam.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q36-Q41):

NEW QUESTION # 36

A GIS administrator must decide between different deployment options for ArcGIS Utility Network. Which of the following correctly describes the two supported deployment types?

- A. Cloud deployment vs. on-premise deployment
- B. Partitioned deployment vs. hierarchical deployment
- C. Single-user in a file geodatabase, and multi-user in an enterprise geodatabase with branch versioning

Answer: C

Explanation:

Single-user deployments exist in file geodatabases. Multi-user deployments require enterprise geodatabases with branch versioning.

NEW QUESTION # 37

ArcGIS Utility Network includes a diagram function to visually represent network connectivity. Which elements compose a utility network diagram?

- A. Asset groups, terminals, and network categories
- B. Rules, layouts, and layer definitions
- C. Subnetworks, tiers, and ranks

Answer: B

Explanation:

Diagrams are built from rules (logic), layouts (arrangement), and layer definitions (symbolization).

NEW QUESTION # 38

When configuring valves or switches in ArcGIS Utility Network, are terminals necessary if both sides of the device are equal?

- A. No, terminals are only required when sides differ, multiple ports exist, or flow is directional
- B. Yes, all devices must have terminals
- C. No, terminals are only required if the device is a subnetwork controller

Answer: A

Explanation:

If both sides of a device are identical, terminals are unnecessary. Terminals are used when sides differ or multiple ports exist.

NEW QUESTION # 39

A GIS analyst encounters error code 9: "Invalid Connectivity - More than one junction edge rule applicable." What does this mean, and how should it be corrected?

- A. A device with terminals matches more than one rule; fix by removing invalid rules or specifying the correct terminal connection
- B. Subnetwork definition conflict; fix by recalculating tiers
- C. Duplicate device features; fix by merging duplicates

Answer: A

Explanation:

Error 9 occurs when multiple rules apply to the same terminal-device connection. Fix with the Terminal Connections tool or by removing invalid rules.

NEW QUESTION # 40

When modeling underground pipelines, which type of structural feature would represent the casing that contains those pipes?

- A. Structure junction
- B. Structure boundary
- C. Structure line

Answer: C

Explanation:

Structure lines are used to contain domain network line features, such as pipe casings.

NEW QUESTION # 41
