

# AIGP Preparation Store | Interactive AIGP Questions

BONUS!!! Download part of Pass4SureQuiz AIGP dumps for free: <https://drive.google.com/open?id=1WuwrcQoFLVpoZpka3nU-XKE7polZy4BH>

Our website offer you one-year free update AIGP study guide from the date of you purchased. We will send you the latest version to your email immediately once we have any updating about the AIGP braindumps. Our goal is ensure you get high passing score in the AIGP Practice Exam with less effort and less time. The accuracy of our questions and answers will the guarantee of passing actual test.

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Understanding How Laws, Standards, and Frameworks Apply to AI:</b> This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Development:</b> This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li> </ul>

## New Release AIGP Questions - IAPP AIGP Exam Dumps

No doubt the IAPP Certified Artificial Intelligence Governance Professional (AIGP) certification is one of the most challenging certification exams in the market. This AIGP certification exam gives always a tough time to IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam candidates. The Pass4SureQuiz understands this hurdle and offers recommended and real AIGP Exam Practice questions in three different formats. These formats hold high demand in the market and offer a great solution for quick and complete IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam preparation.

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q64-Q69):

### NEW QUESTION # 64

Within an established AI governance infrastructure, what might be the most effective governance action to handle third-party AI systems deemed to be high-risk?

- A. Delegate the power, resources and authorization among executive leadership to perform risk management to each appropriate level throughout the management chain.
- B. Re-evaluate the purchase of the third-party AI system deemed to be high-risk, and consider other vendors.
- C. Establish policies for handling third-party system failures that include consideration of redundancy mechanisms for vital third-party AI system.
- **D. Align organizational impact assessment activities with relevant regulatory or legal requirements.**

**Answer: D**

Explanation:

Aligning impact assessment activities with regulatory and legal requirements ensures that high-risk third-party AI systems are evaluated rigorously and managed in compliance with relevant standards.

### NEW QUESTION # 65

All of the following are required for high-risk AI systems under the EU AI Act EXCEPT?

- A. Retaining system-generated logs for at least six months.
- B. Conducting a conformity assessment.
- **C. Publishing a detailed report on the training data used.**
- D. Conducting post-market monitoring.

**Answer: C**

Explanation:

The EU AI Act imposes several mandatory obligations on high-risk AI systems, but publishing a detailed report on training data is not one of them.

From the AI Governance in Practice Report 2024:

"It mandates drawing up technical documentation for high-risk AI systems, and requires high-risk AI systems to come with instructions for use that disclose various information, including characteristics, capabilities and performance limitations." (p. 34)

"To make high-risk AI systems more traceable, it also requires AI systems to be able to automatically allow for the maintenance of logs throughout the AI life cycle."

"Conducting post-market monitoring" and "conformity assessments" are explicit requirements for high-risk systems. (p. 34-35)

However, publishing detailed training data is typically required only for general-purpose AI systems with systemic risk, not standard high-risk AI systems.

\* A. Log retention, B. Post-market monitoring, and C. Conformity assessments are all required under the EU AI Act for high-risk systems.

### NEW QUESTION # 66

All of the following are obligations of providers under the EU AI Act EXCEPT:

- A. Record keeping
- B. Establishing a quality management system
- C. Ensuring human oversight in accordance with the instructions for use.
- D. Performing post-market monitoring

**Answer: C**

Explanation:

Under the EU AI Act, providers of high-risk AI systems are required to implement a quality management system (QMS) that includes various components such as risk management, data governance, post-market monitoring, and record-keeping. However, the responsibility for ensuring human oversight in accordance with the instructions for use primarily falls on the deployers of the AI system, not the providers. Deployers are the entities that operate or use the AI system within their scope of authority and are responsible for implementing the necessary human oversight measures as specified by the provider.

### NEW QUESTION # 67

The best practice to manage third-party risk associated with AI systems is to create and implement policies that?

- A. Require third-party AI systems to undergo a comprehensive audit by an external cybersecurity firm every six months.
- B. Focus on the technical aspects of AI systems, such as data security, while ethical risks are addressed through suitable contracts.
- C. Focus on the financial stability of third-party vendors as the primary criterion for risk assessment.
- D. Provide for an appropriate level of due diligence and ongoing monitoring based on the defined risk.

**Answer: D**

Explanation:

Third-party risk management for AI systems should be proportional and risk-based, involving initial due diligence and ongoing monitoring that reflects the level of risk posed by the third party's AI system.

From the AI Governance in Practice Report 2025:

"Third-party due diligence assessments to identify possible external risk and inform selection." (p. 11)

"Legal due diligence may include verification of the personal data's lawful collection by the data broker, review of contractual obligations..." (p. 19)

\* A focuses too narrowly on financial stability.

\* C is excessive and not scalable or aligned with best practices.

\* D appropriately separates ethical and technical risks; both must be evaluated holistically.

### NEW QUESTION # 68

A company that deploys AI but is not currently a provider or developer intends to develop and market its own AI system. Which obligation would then be likely to apply?

- Answer: D**

Once the company becomes a provider of an AI system, it becomes subject to the EU AI Act's provider obligations, the foundational one being the requirement to implement a formal risk- management framework for the system throughout its lifecycle.
