Especially for candidates to take the CBCI exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our CBCI Study Materials give full consideration to this problem. We can send you a link within 5 to 10 minutes after your payment.

BCI Certificate of the Business Continuity Institute (CBCI) Sample Questions (Q29-Q34):

NEW QUESTION # 29

Consulting stakeholders, conducting a cost-benefit analysis, consulting with internal resources such as risk management and internal audit teams, and horizon scanning are some of the methods that might be used when:

- A. Identifying and assigning Business Continuity Management System (BCMS) roles and responsibilities
- B. Developing an exercise programme
- C. Defining the initial BCMS scope
- D. Measuring Business Continuity culture

Answer: C

Explanation:

Defining the initial scope of a BCMS requires a comprehensive understanding of organizational context, risks, and priorities. The CBCI 7.0 course recommends consulting with stakeholders, leveraging internal expertise (e.g., risk management, audit), performing cost-benefit analyses, and horizon scanning to capture potential future threats and opportunities. These methods ensure that the scope is appropriately focused and realistic, considering business objectives, resource availability, and external environment. This thorough approach lays the foundation for a relevant and effective BCMS.

NEW QUESTION # 30

Which of the following is an outcome of personnel embracing Business Continuity and the organization's Business Continuity Management System (BCMS)?

- A. A Business Continuity programme that is tailored specifically for the organization, taking into account its organizational culture
- B. Increased sales of products and services due to public confidence in the published information about the organization's resilience capability
- C. Validation of plans is no longer needed due to the high level of commitment from relevant personnel to their effective implementation
- D. A reduction in the need to update and review the BCMS due to the commitment of personnel in the development stage

Answer: A

Explanation:

Personnel embracing Business Continuity fosters a culture that supports the design and implementation of a BCMS tailored to the organization's unique culture, risks, and operational realities. The CBCI 7.0 course underscores that when personnel actively engage with continuity practices, the BCMS reflects actual organizational needs, leading to practical, accepted, and effective continuity programs. Commitment does not reduce the necessity for regular updates or validation; instead, it enhances the quality and relevance of those processes. While public confidence may improve indirectly, the key outcome is the fit-for-purpose nature of the BCMS driven by engaged personnel.

Reference: CBCI 7.0 Study Guide, Module 4: Business Continuity Culture, pages 67-70.

NEW QUESTION # 31

An outcome of the Solutions Design process is:

- A. Arrangements that protect the organization from negative publicity during business as usual operations
- B. **Business Continuity strategies and solutions that remain cost effective in terms of implementation and operational investment**
- C. Assurance that all personnel have high levels of occupational competence in their job roles
- D. Strategies and solutions that lead to financial savings due to the reduction in personnel engaged in operational activities

Answer: B

Explanation:

Solutions Design aims to develop strategies and solutions that effectively address Business Continuity requirements while balancing cost and practicality. The CBCI 7.0 course emphasizes that sustainable, cost-effective solutions ensure continuity measures are viable long-term and do not impose unnecessary financial burdens. Protecting reputation, reducing staff, or occupational competence, while important, are secondary or indirect outcomes. The focus remains on practical, affordable solutions.

Reference: CBCI 7.0 Study Guide, Module 5: Solutions Design, pages 90-95.

NEW QUESTION # 32

Which of the following is NOT correct in relation to Business Continuity plans?

- A. **They should contain detailed step-by-step instructions on what to do for every eventuality that could occur**
- B. They should be kept up to date
- C. They should be validated before being deemed operational
- D. They may include scenario-specific plans that are designed to address a particular threat

Answer: A

Explanation:

The CBCI 7.0 course explains that Business Continuity plans should not contain detailed step-by-step instructions for every possible eventuality, as this is impractical and can lead to overly complex, difficult-to-maintain plans. Instead, plans should provide clear, actionable guidance and procedures that focus on managing the most likely or impactful scenarios. Scenario-specific plans targeting particular threats can complement overarching plans to address specific risks more thoroughly. Validation through exercises and reviews is essential to confirm operational readiness, and plans must be regularly updated to reflect changes in organizational context, resources, and threats. Over-detailing can hinder flexibility and rapid decision-making during actual incidents.

Reference: CBCI 7.0 Study Guide, Module 5: Plans and Procedures, pages 80-82.

NEW QUESTION # 33

The purpose of a Business Continuity policy is to:

- A. Initiate the development of an effective response structure in case of disruption to products or services within the scope of the Business Continuity Management System (BCMS)
- B. Enable the Business Continuity professional to issue instructions to all on the changes that they will be required to make
- C. **Establish shared understanding of the importance of a BCMS and its relevance to the organization**
- D. Share the outcomes of a Business Impact Analysis with internal and external stakeholders

Answer: C

Explanation:

A Business Continuity policy acts as a foundational document that communicates the organization's commitment to Business

Continuity and sets out its scope, objectives, and principles. The CBCI 7.0 course stresses that the policy fosters a shared understanding across the organization about the importance of the BCMS and ensures that personnel recognize its relevance to their roles. It does not specify operational details or mandate actions but guides governance and culture. The policy supports alignment of efforts and continuous improvement of the BCMS.
