

Dump NCP-CI-AWS File - Valid NCP-CI-AWS Test Registration

How to Get Ready for the Nutanix NCP-CI-AWS Exam Quickly?

In today's challenging IT sector, earning the Nutanix NCP-CI-AWS certification helps you accelerate your career. The Nutanix Certified Professional NCP-CI-AWS certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the NCP-CI-AWS certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Nutanix Certified Professional - Cloud Integration - AWS v6.7 NCP-CI-AWS exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest NCP-CI-AWS exam questions in three formats. With the help of these real [Nutanix Dumps](#), you can get ready for the exam in a short time.

Authentic (Valid) Details Regarding The Nutanix NCP-CI-AWS Exam Questions

Our Nutanix Nutanix Certified Professional - Cloud Integration - AWS web-based practice test software has all the specifications of the desktop Nutanix Certified Professional - Cloud Integration - AWS practice exam software. This web-based Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) practice test software doesn't need any installation or plugins. You can attempt the Nutanix Nutanix Certified Professional - Cloud Integration - AWS web-based practice test using Chrome, Firefox, Opera, Internet Explorer, or Nutanix Edge. Our browser-based Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) practice exam software is also compatible with Windows, Mac, Linux, Android, and iOS.

If you have time to know more about our NCP-CI-AWS study materials, you can compare our study materials with the annual real questions of the exam. In addition, we will try our best to improve our hit rates of the NCP-CI-AWS exam questions. You will not wait for long to witness our great progress. It is worth fighting for your promising future with the help of our NCP-CI-AWS learning guide. As you can see that our NCP-CI-AWS training braindumps are the best seller in the market.

Valid NCP-CI-AWS Test Registration & Valid Dumps NCP-CI-AWS Files

Our website focus on helping candidates pass Nutanix certification exams with our Valid NCP-CI-AWS Practice Questions and detailed test answers. The most reliable NCP-CI-AWS dumps pdf are written by our professional IT experts who have rich experience in actual test. And you will be enjoyed one-year free updating after you make payment.

Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.
Topic 2	<ul style="list-style-type: none">• Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.
Topic 3	<ul style="list-style-type: none">• Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.
Topic 4	<ul style="list-style-type: none">• Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.

Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q32-Q37):

NEW QUESTION # 32

An administrator planned to create a new NC2 cluster and chose the existing AWS VPC infrastructure in the workflow. The administrator need two private subnets to complete the configuration.

What are these two private subnets used for..

- A. For Prism Element and Prism Central management
- **B. For user VMs and cluster management**
- C. For DNS and NTP management
- D. For private NAT and Elastic IP management

Answer: B

Explanation:

The requirement for two private subnets in the NC2 cluster configuration workflow serves the same purposes:

One subnet is designated for user VMs, ensuring user workloads are separated from management operations.

The other subnet is designated for cluster management, maintaining the integrity and security of management processes and internal communications.

NEW QUESTION # 33

An administrator has been tasked with deploying a new production NC2 cluster on AWS and is studying the deployment..

AWS supports EC2 bare-metal instances in regions with at least how many partitions?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

AWS supports EC2 bare-metal instances in regions with at least 3 partitions. Partitions in AWS provide high availability and fault tolerance by distributing instances across different hardware to minimize the impact of hardware failures.

Reference:

AWS EC2 Bare Metal Instances Documentation

NEW QUESTION # 34

An administrator has been tasked with ensuring NC2 VMs are able to access AWS resources. The NC2 VM traffic must not traverse the internet.

in which two ways would the administrator achieve this? (Choose two.)

- A. By using a NAT Gateway.
- B. By using an Interface Endpoint
- C. By using a VPC Peer.
- D. By using a Gateway Endpoint

Answer: B,C

Explanation:

To ensure that NC2 VMs can access AWS resources without traversing the internet, the administrator can use AWS VPC Peering and Interface Endpoints. Both methods ensure that traffic stays within the AWS network, maintaining security and efficiency.

Interface Endpoint:

Interface Endpoints allow you to privately connect your VPC to supported AWS services. They use AWS PrivateLink to route traffic directly to services within the AWS network, bypassing the public internet.

Steps:

Create an interface endpoint for the required service in the AWS VPC console.

Ensure the security groups and route tables are configured to allow traffic to the interface endpoint.

VPC Peering:

VPC Peering allows the routing of traffic between VPCs using private IP addresses, without the need for internet gateways, NAT devices, or VPN connections.

Steps:

Create a VPC peering connection between the VPCs.

Update the route tables to direct traffic between the peered VPCs.

Ensure security group rules allow the necessary traffic between VPCs.

NEW QUESTION # 35

An administrator has created an NC2 cluster on AWS, but the NC2 console has issued this alert:

```
Cluster failed to create. Max retries for provisioning cluster nodes reached. Deleting cluster.
Refer to KB 9774 (https://portal.nutanix.com/kb/9774) to understand possible causes for the cluster
creation failures.
```

Which two scenarios could have resulted in the cluster creation failure? (Choose two.)

- A. Bad Terraform (TF) state in provisioning
- B. AWS Quota exceeded/instance limit exceeded
- C. Insufficient permissions
- D. No available AWS credits

Answer: B,C

Explanation:

The error message in the image indicates that the cluster creation failed due to reaching the maximum retries for provisioning cluster nodes. Here are two possible scenarios that could lead to this issue:

Insufficient Permissions (Answer B):

If the AWS user or role used to create the cluster does not have sufficient permissions, it can result in failures during the provisioning process. Proper IAM policies must be attached to ensure that the necessary actions can be performed, such as launching instances, creating VPCs, or managing networking components.

AWS Quota Exceeded/Instance Limit Exceeded (Answer D):

AWS imposes quotas and limits on the number of instances and other resources that can be created within an account. If these quotas are exceeded, new instances cannot be provisioned, causing the cluster creation to fail. This can be resolved by requesting a

quota increase from AWS.

NEW QUESTION # 36

An administrator seeks to ensure that the newly created NC2 organization named Finance can only deploy clusters into certain cloud regions.

What action should the administrator take to do this?

- A. Configure IAM permission in cloud accounts to restrict access to certain regions.
- B. Open a support ticket with Nutanix to whitelist the allowed regions for the Finance NC2 organization.
- C. Configure RBAC roles on the Finance NC2 organization to allow access to regions.
- D. Specify allowed regions when configuring a cloud account for the Finance NC2 organization.

Answer: D

Explanation:

To ensure that the newly created NC2 organization named Finance can only deploy clusters into certain cloud regions, the administrator should specify the allowed regions during the cloud account configuration.

This action restricts the regions available for cluster deployment, ensuring compliance with organizational policies or regulatory requirements.

The allowed regions can be set in the cloud account settings associated with the Finance NC2 organization, defining the geographical scope of operations.

Reference:

Refer to the Nutanix documentation on NC2 cloud account configuration and region restrictions.

NEW QUESTION # 37

.....

The authoritative, efficient, and thoughtful service of NCP-CI-AWS learning question will give you the best user experience, and you can also get what you want with our study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose NCP-CI-AWS test guide, we will be very happy. We look forward to meeting you. You can choose your favorite our study materials version according to your feelings. When you use NCP-CI-AWS Test Guide, you can also get our services at any time. We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as NCP-CI-AWS learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood.
