## Highly Authoritative 301a Exam Prep Easy for You to Pass 301a Exam

Free4Dump provide people a relatively short period of time with a great important 301a Exam tool to pass the qualification test. If someone choose the our high efficiency exam tool, our reliable 301a dump can help users quickly analysis in the difficult point, high efficiency of review, and high quality through the exam, work for our future employment and increase the weight of the promotion, to better meet the needs of their own development.

F5 301a Exam is a highly respected certification in the IT industry, and is recognized by many organizations as a valuable credential for IT professionals who specialize in F5 BIG-IP LTM technology. Earning this certification can open up new career opportunities and help IT professionals advance their careers. Additionally, this certification can help organizations ensure that their IT staff have the skills and knowledge needed to effectively manage and maintain their F5 BIG-IP LTM deployments.

## F5 BIG-IP LTM Specialist: Architect Set-Up & Deploy Sample Questions (Q163-Q168):

NEW QUESTION # 163

The picture belongs to static content, you can configure static content cache in FS to meet this demand. An LTM Specialist must configure session persistence for a highly available, highly utilized web-based application.

\* The following requirements are provided:

\* http proxy setup for security

persistence information available to the HA peer in case of failover

The LTM Specialist needs to minimize additional burden on the LTM device to the greatest extent possible.

Which persistence profile should be used?

- A. Destination Address Affinity
- B. Source Address Affinity
- C. Universal
- **D. Cookie insert**

**Answer: D**

### NEW QUESTION # 164

An LTM Specialist observes decreased performance and intermittent connection reaps LTM system.

```
ltm pool corp_tcp_pool {
  load-balance-mode observed-mode
  member {
    10.10.0.100
    address 10.10.0.100
  }
  10.10.0.101
  address 10.10.0.101
  10.10.0.59:8080
  address 10.10.0.59
}
monitor http
}
ltm profile tcp corp_tcp {
  app-service none
  default-from tcp
  idle-timeout 14400
}
ltm virtual main_vip http {
  destination 192.168.0.100/20
  ip-protocol tcp
  mask 255.255.255.255
  profiles {
    http { }
    corp_tcp { }
  }
  pool {
    main_http_pool
  }
  source 0.0.0.0/0
```

Based on the configuration, which action will address these issues?

- A. Use an optimized TCP profile.
- B. Use a default caching profile on the virtual server.
- C. Use a FastL4 profile on the virtual server
- **D. Use a shorter idle timeout on the TCP profile.**

**Answer: D**

### NEW QUESTION # 165

An LTM Specialist needs to create a pool with a set of monitor that checks both the pool members and corresponding application service ports. The pool members have services on port 80. The application service is on port 8009.

The LTM device should load balance traffic to the pool member when the pool member and corresponding application service pass monitor.

Which monitor and parameter set meets this requirement?

- A. TCP monitor for port 80  
Plus a custom TCP monitor with alias port 8009,  
And the pool's availability requirement set to All
- B. TCP monitor for port 8009  
Plus a custom TCP monitor with alias port 8009  
And the pool's availability requirement set to 1.

- C. TCP monitor for port  
Plus a custom TCP monitor with alias port 80  
And the pool's availability requirement set to ALL
- **D. TCP monitor for port\***  
Plus a custom TCP monitor with alias port 8009  
And the pool's availability requirements set to the ALL

**Answer: D**

#### NEW QUESTION # 166

An LTM Specialist configures a new HTTPS virtual server that contains a valid example.com ssl certificate. The LTM Specialist receives an error in the browser when connecting. What must be added to the SSL Client profile to fix this issue?

- A. A self-sign certificate
- B. A public root certificate
- C. A new example com certificate
- **D. An intermediate certificate**

**Answer: D**

#### NEW QUESTION # 167

An LTM device provides load balancing to a web application? The LTM device has two dual-core processors and a licensed SSL Transactions Per Second (TPS) limit of 500 CMP is enabled. TLS connections are used between client systems and virtual servers on the LTM device, as well as from the LTM device to servers used as part of LTM pool. TLS enabled virtual servers utilize certificates based on 2048-bit keys During a peak period, 2560 new TLS transactions per second are attempted to the web application via the LTM device. What will happen in this scenario?

- A. Nothing: TLS transactions per second are NOT affected by an SSL TPS license limit
- **B. 560 new TLS transactions will be silently discarded due to the SSL TPS license limit**
- C. 2060 new TLS transactions will be silently discarded due to the SSL TPS license limit
- D. Nothing: 2560 TLS transactions per second is within the SSI TPS license limit.

**Answer: B**

#### NEW QUESTION # 168

.....

There is no exaggeration that you can be confident about your coming exam just after studying with our 301a preparation materials for 20 to 30 hours. Tens of thousands of our customers have benefited from our exam materials and passed their exams with ease. The data showed that our high pass rate is unbelievably 98% to 100%. Without doubt, your success is 100% guaranteed with our 301a training guide. You will be quite surprised by the convenience to have an overview just by clicking into the link, and you can experience all kinds of 301a versions.
