2026 Unparalleled Oracle New 1z0-076 Test Questions Pass Guaranteed Quiz

2026 Latest PassLeaderVCE 1z0-076 PDF Dumps and 1z0-076 Exam Engine Free Share: https://drive.google.com/open?id=11nLuPiu19BLgnU9WGRVjPEJil4s0NP6P

In order to meet all demands of all customers, our company has employed a lot of excellent experts and professors in the field to design and compile the 1z0-076 test dump with a high quality. It has been a generally accepted fact that the 1z0-076 exam reference guide from our company are more useful and helpful for all people who want to pass exam and gain the related exam. We believe this resulted from our constant practice, hard work and our strong team spirit. With the high class operation system, the 1z0-076 study question from our company has won the common recognition from a lot of international customers for us. If you decide to buy our 1z0-076 test dump, we can assure you that you will pass exam in the near future.

Oracle 1z0-076 Exam Syllabus Topics:

Topic	Details
Topic 1	• Performing Role Transitions: Here, the concept of database roles is explained, along with the steps for performing switchovers, failovers, and maintaining physical standby sessions during role transitions.
Topic 2	• Creating a Data Guard Broker Configuration: This section delves into the practical aspects of creating and managing a Data Guard broker configuration, including command-line and Enterprise Manager approaches.
Topic 3	• Oracle Data Guard Basics: This topic covers the essential architecture and concepts of Oracle Data Guard. It includes sub-topics such as the physical and logical standby database comparison, benefits of Data Guard, and its integration with multi-tenant databases.
Topic 4	• Backup and Recovery Considerations in an Oracle Data Guard Configuration: In this topic, Backup and recovery procedures in a Data Guard configuration are discussed, including RMAN backups, offloading to physical standby, and network-based recovery.
Topic 6	• Creating a Logical Standby Database: This topic guides users through the process of creating and managing a logical standby database, including SQL Apply filtering.
Topic 7	• Managing Oracle Net Services in a Data Guard Environment: The section focuses on Oracle Net Services and its role in Data Guard networking setup.

Oracle 1z0-076 Test Sample Online - 1z0-076 Hot Spot Questions

If you are interested in purchasing valid and professional test prep materials, our 1z0-076 exam questions will be our wise choice. To know our questions details and format we provide free PDF demo of our 1z0-076 exam questions for your reference before purchasing. You will have a better understanding for your products. You will find our 1z0-076 Exam Guide torrent is accurate and helpful and then you will purchase our 1z0-076 training braindump happily. We provide free demo of 1z0-076 study guide download before purchasing.

Oracle Database 19c: Data Guard Administration Sample Questions (Q86-Q91):

NEW QUESTION # 86
You must configure flashback database for your Oracle 19c databases that will be part of a Data Guard Broker configuration. The databases are all in ARCHIVELOG mode.
You will execute the SQL statement:
ALTER DATABASE FLASHBACK ON;
Which three are true concerning this command?

- A. It will execute successfully while an Oracle 19c primary database is open.
- B. It will execute successfully on an Oracle 19c logical standby database while SQL apply is active.
- C. It will execute successfully on an Oracle 19c physical standby database while Real Time Query is active.
- D. If executed successfully on an Oracle 19c primary database, flashback will also be enabled on all logical standby databases that are part of the configuration.
- E. If executed successfully on an Oracle 19c primary database, flashback will also be enabled on all physical standby databases that are part of the configuration.
- F. It will execute successfully while an Oracle 19c primary database is mounted.

Answer: A,B,F

Explanation:
The command ALTER DATABASE FLASHBACK ON; enables the Flashback Database feature, which provides a way to quickly revert an entire Oracle database back to a previous point in time. This command can be executed while an Oracle 19c primary database is either open (option A) or mounted (option B). It is also applicable to an Oracle 19c logical standby database while SQL Apply is active (option E). However, it's important to note that enabling Flashback Database on the primary does not automatically enable it on all associated standby databases, whether they are physical or logical. Each database in a Data Guard configuration must have Flashback Database explicitly enabled if desired. Real Time Query being active on a physical standby does not directly relate to the ability to execute this command on the standby. Reference: The explanation is based on Oracle's concepts for Flashback Technology and Data Guard configurations as detailed in the Oracle Database Backup and Recovery User's Guide and the Oracle Data Guard Concepts and Administration guide.

NEW QUESTION # 87
Which TWO statements are true about database parameters for databases in a Data Guard environment?

- A. If DB_RECOVERY_FILE_DEST is specified, then LOG_ARCHIVE_DEST_n is not required for local archive logs.
- B. LOG_FILE_NAME_CONVERT applies to online redo logs and archived logs.
- C. DB_FILE_NAME_CONVERT is only required if the standby database is on the same host as the primary database.
- D. COMPATIBLE must have identical values for primary and standby databases.
- E. The databases that are part of a Data Guard configuration must have different DB_UNIQUE_NAME initialization parameters.

Answer: D,E

NEW QUESTION # 88
You must configure on Oracle Data ....
1. A primary database
2. Three Physical Standby Databases
Examine these requirements:
A designated physical standby database should become the primary database automatically whenever the primary database fails.
2. The chosen protection mode should provide the highest level of protection possible without violating the other requirement.
Which redo transport mode and protection mode would you configure to meet these requirements?

- A. ASYNC and Maximum Performance
- B. SYNC and Maximum Protection
- C. FASTSYNC and Maximum Availability
- D. FASTSYNC and Maximum Protection

Answer: C

Explanation:
To meet the requirements of automatic failover and the highest level of protection without data loss, the combination of FASTSYNC redo transport mode and Maximum Availability protection mode is appropriate.
FASTSYNC ensures that the performance impact on the primary database is minimized while still providing synchronous transport.
Maximum Availability protection mode offers the highest level of data protection without compromising the availability of the primary database. In case of a network failure or a standby failure, the primary will not halt, avoiding disruption to the primary database operations.
ReferencesOracle Data Guard Concepts and Administration guide, which details the different protection modes and their respective levels of data protection and impact on database operations.

NEW QUESTION # 89
Which three statements are true....... With no Oracle Streams or Goldengate configured?

- A. They are required only for synchronous redo transport
- B. They are required on a logical standby for real-time apply
- C. They are required on a physical standby for real-time apply.
- D. The LGWR process writes to them on ....
- E. It is recommended to have them on the...
- F. Only standby databases can write redo....

Answer: B,C,D

Explanation:
C; The LGWR (Log Writer) process is responsible for writing redo entries from the redo log buffer to the online redo log files on the primary database. This is a fundamental process in the Oracle Database architecture, ensuring that all changes made to the database are captured for purposes such as recovery, replication, and high availability.
D; Real-time apply on a logical standby database requires standby redo log files. The standby redo log files are used to store redo data received from the primary database before it is applied to the logical standby database.
This enables the logical standby to apply changes as they are received, without waiting for the current redo log file to be archived.
E: Similarly, on a physical standby database, standby redo log files are used for real-time apply. They store redo data from the primary database, allowing the physical standby to apply redo data concurrently as it is received, rather than waiting for redo log files to be archived. This capability is crucial for maintaining a physical standby database that is closely synchronized with the primary database with minimal lag.
These functionalities are integral to Oracle Data Guard configurations and are not dependent on Oracle Streams or Oracle GoldenGate, which are separate technologies for data replication and integration.

NEW QUESTION # 90
The Oracle database 19c Observer is currently running on host1 and you wish to have it running on host2.
Examine this list of possible steps:
1) Stop the observer on host1
2) Disable Fast-Start Failover
3) Update the broker configuration with the new observer hostname
4) Enable Fast-Start Failover
5) Start the Observer on host2
Which contains the minimum required steps to move the observer to host2?

- A. Execute tasks 1, 2, 3, 4, and 5
- B. Execute tasks 1, 3, and 5
- C. Execute only task 5
- D. Execute tasks 1 and 5

Answer: B

Explanation:

* Stop the Observer on host1 to ensure that there are no conflicts between the instances of the Observer running on different hosts.
* Update the Data Guard Broker configuration with the new hostname for the Observer. This step is crucial to redirect the Data Guard Broker to communicate with the Observer on the new host.
* Start the Observer on host2 to resume its operations in the new environment.

Disabling and re-enabling Fast-Start Failover (steps 2 and 4) are not strictly necessary for moving the Observer to a new host. These steps would be more relevant if changes to the configuration of Fast-Start Failover itself were required, which is not the case when simply relocating the Observer.

NEW QUESTION # 91

......

Free demo is available for 1z0-076 training materials, so that you can have a better understanding of what you are going to buy. Free demo will represent you what the complete version is like. We suggest you try free domo before buying. In addition, 1z0-076 training materials are high quality and accuracy, since we have a professional team to collect the latest information of the exam. Therefore if you choose 1z0-076 Exam Dumps of us, you can get the latest version timely. We provide you with free update version for one year for 1z0-076 training materials.
