Scaled Agile SAFe-RTE Exam Questions: Reduce Your Chances Of Failure

You know, your time is very precious in this fast-paced society. If you only rely on one person's strength, it is difficult for you to gain an advantage. Our SAFe-RTE learning questions will be your most satisfied assistant. On one hand, our SAFe-RTE exam braindumps contain the most important keypoints about the subject which are collected by our professional experts who have been devoting in this career for years. On the other hand, we always keep updating our SAFe-RTE Study Guide to the latest.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which SAFe Principle is being applied when a Release Train Engineer treats Suppliers as partners?

- A. Build incrementally with fast, integrated learning cycles
- B. Decentralize decision-making
- **C. Apply systems thinking**
- D. Assume variability; preserve options

Answer: C

Explanation:

The SAFe principle of 'Apply systems thinking' is the one being applied when a Release Train Engineer treats Suppliers as partners. This principle is about understanding the larger context of the work and how all parts of the system interrelate. In SAFe, suppliers are considered to be part of the solution train and are critical to the delivery of value. The framework emphasizes that for organizations to achieve mutual benefits, close collaboration and trust are required with suppliers. This involves deeply involving them in the solution's definition and building activities, and working with them to help adopt Lean-Agile Mindsets and practices for the

economic benefit of both parties¹. Treating suppliers as partners is a strategic approach that aligns with systems thinking by recognizing the importance of every element in the value stream and fostering an environment of collaboration and mutual growth.

NEW QUESTION # 16

What is one recommended practice when planning across large time zone differences?

- A. Choose one time zone for planning, then rotate for the next PI
- B. Choose the time zone with the most team members
- C. Plan by time zone, then consolidate the plans
- **D. Allow for overlapping hours**

Answer: D

Explanation:

One recommended practice when planning across large time zone differences is to allow for overlapping hours. This approach acknowledges the challenges posed by multiple time zones and seeks to find a common time window where all team members can actively participate in the planning process. By doing so, it ensures that everyone has the opportunity to contribute to the discussions and decision-making, which is crucial for alignment and collaboration in a distributed environment¹. This practice is part of creating a working agreement that accommodates time zone differences and supports effective communication and coordination among remote team members².

NEW QUESTION # 17

Scrum Masters are effective by using scrum methods, supporting SAFe principles and practices, and what else?

- A. Writing stories and enablers
- B. Managing architectural runway
- **C. Supporting delivery using Agile practices**
- D. Serving as a customer proxy

Answer: C

NEW QUESTION # 18

Product Management is responsible for which activity?

- **A. Defining Program Backlog content**
- B. Prioritizing the Portfolio Backlog
- C. Establishing an architectural vision for the Agile Release Release Train

Answer: A

Explanation:

Within the SAFe framework, Product Management has a pivotal role in defining the content of the Program Backlog. This involves the following key activities:

- * Curating and prioritizing the team backlog: Product Management is responsible for detailing and prioritizing the work items in the team backlog to ensure that the most valuable and necessary work is ready for implementation¹.
- * Deciphering features into implementable user stories: They break down complex features into smaller, more manageable user stories that can be completed by the development teams within an iteration¹.
- * Clarifying story specifics and ensuring that the team grasps them: Product Management works closely with the teams to ensure that there is a shared understanding of what each user story entails and what the acceptance criteria are¹.
- * Validating stories against the Definition of Done (DoD): They ensure that the user stories meet the team's Definition of Done, which is a shared understanding of what it means for work to be complete¹.
- * Collaborating with stakeholders, including Product Management, to maintain a clear product vision:

Product Management collaborates with various stakeholders to align the team's work with the overall product vision and strategic goals¹.

These activities are essential for maintaining a healthy Program Backlog, which is a critical component for the successful delivery of value through Agile Release Trains (ARTs) in the SAFe framework.

NEW QUESTION # 19

What is the next step after identifying the root cause during the problem-solving workshop?

- **A. Brainstorm solutions**
- B. Restate the problem
- C. Identify improvement backlog items
- D. Trace the chain of causality

Answer: A

Explanation:

After pinpointing the root cause in a problem-solving workshop, the next logical step is to focus on finding potential solutions:

*Collaboration for Solutions: The workshop fosters a collaborative environment to generate multiple solutions based on the identified root cause.

*Diverse Perspectives: Teams bring their unique expertise to the table for brainstorming creative solutions.

*Solution-Focused Mindset: The shift from problem analysis to solution ideation drives progress and resolution.

References:

*Scaled Agile Framework (SAFe), Inspect and Adapt Article: Outlines the problem-solving workshop, and while not directly specifying the order, it highlights the importance of solution finding
