They work together and strive hard to maintain the top standard of Web-Development-Applications Exam Practice questions all the time. So you rest assured that with the BraindumpsPrep WGU Web-Development-Applications exam questions you will ace your Web-Development-Applications exam preparation and feel confident to solve all questions in the final WGU Web-Development-Applications exam.

Web-Development-Applications Detail Explanation - Reliable Web-Development-Applications Exam Labs

You can take the online WGU Web-Development-Applications practice exam multiple times. At the end of each attempt, you will get your progress report. By analyzing this report you can eliminate and overcome your mistakes. WGU Web-Development-Applications real dumps increase your chances of passing the Web-Development-Applications certification exam. A huge number of professionals got successful by using BraindumpsPrep Web-Development-Applications practice test material. In case you don't pass the WGU Web Development Applications, Web-Development-Applications test after using WGU Web-Development-Applications pdf questions and practice tests, you can claim your refund. You can download a free demo of any Web-Development-Applications exam dumps format and check the features before buying. Start WGU Web-Development-Applications test preparation today and obtain the highest marks in the actual Web-Development-Applications exam.

WGU Web Development Applications Sample Questions (Q99-Q104):

NEW QUESTION # 99

Which formats does the <audio> element in HTML5 support?

Choose 2 answers.

- A. Ogg
- B. MPEG-4
- C. M4A
- D. WAV
- E. WMA

Answer: A,D

Explanation:

The <audio> element in HTML5 supports the following formats depending on browser support:

WAV: Supported in all major browsers; uses PCM encoding and is uncompressed.

Ogg (Ogg Vorbis): An open-source, patent-free audio format. Supported in Firefox, Chrome, and Opera.

MP3: Widely supported but not included in this question.

M4A and MPEG-4 Audio may or may not play consistently depending on the container and encoding, but they're less standardized across all HTML5 implementations.

WMA (Windows Media Audio): Not supported by HTML5 natively and requires proprietary plugins.

"The audio element supports formats such as MP3, WAV, and Ogg, depending on the browser. Other formats like WMA and M4A are not guaranteed to work reliably." References:

HTML5 Specification (Audio section)

MDN Web Docs - <audio> element supported formats

W3Schools - HTML5 Audio Tag

NEW QUESTION # 100

Which type of operation should a developer use to set a condition when adding a media query?

- A. Bitwise
- B. Addition
- C. Multiplication
- D. Boolean

Answer: D

Explanation:

> "Media queries rely on Boolean logic to define conditions. Keywords like `and`, `or`, and `not` are used to combine or negate media features." Example:

```
```css
```

```
@media screen and (min-width: 600px) and (max-width: 900px)
```

```
```
```

References:

- * MDN Web Docs: Media Queries - Logical Operators
- * CSS Media Queries Level 4 Specification

NEW QUESTION # 101

Which application programming interface (API) should a developer use to track devices by their IP address?

- A. File
- **B. Geolocation**
- C. Document Object Model
- D. History

Answer: B

Explanation:

> "The Geolocation API is used to determine the physical location of a device. It typically uses IP address, Wi-Fi positioning, and GPS signals to approximate the user's location."

>

> It does not directly access the IP address but uses it behind the scenes in conjunction with other signals.

References:

- * MDN Web Docs: Geolocation API
- * W3C Geolocation API Specification

NEW QUESTION # 102

Given the following markup and no style sheet:

```
<input id="range" name="range" type="range">
```

Which control does the input element render?

- **A. Slider**
- B. Drop-down
- C. Text
- D. Button

Answer: A

Explanation:

The type="range" attribute in an <input> element renders a slider control.

* HTML Input Type range:

* Purpose: The range type is used for input fields that should contain a value from a range of numbers.

* Example:

* Given the HTML:

```
<input id="range" name="range" type="range">
```

* Explanation:

* This will render as a slider that the user can move to select a value within a range.

* References:

- * MDN Web Docs - <input type="range">
- * W3Schools - HTML Input Range

NEW QUESTION # 103

Given the following code:

```
```html
<input type="text" pattern="^\d{1,3}\.d+```
```
```

Which type of user input does the developer request by specifying the `pattern` attribute?

- A. Date
- B. Price
- C. Country code
- **D. Latitude/longitude**

Answer: D

Explanation:

> "The `pattern` attribute in HTML uses a regular expression to validate user input. In this case, the pattern `^-?\d{1,3}\.\d+` matches an optional minus sign, followed by 1 to 3 digits, a decimal point, and one or more digits."

>

> This format is typical for values such as latitude or longitude (e.g., `-73.935242` or `40.730610`).

References:

- * MDN Web Docs: pattern attribute
- * W3C HTML Living Standard: Pattern Matching

NEW QUESTION # 104

.....
