

Pass Guaranteed Quiz 3V0-21.25 - Updated Test Advanced VMware Cloud Foundation 9.0 Automation Practice

Pass Guaranteed Quiz 2023 Salesforce Advanced-Administrator: Salesforce Certified Advanced Administrator Newest 100% Correct Answers

2023 Latest PrepAwayQuiz Advanced Administrator PDF Dumps and Advanced Administrator Exam Engine Free Show: <https://drive.google.com/...>

When we are in some kind of learning web site, often that learning business web page design is not revealing, and too much information is pushed. It will appear differently. Believe it or not, we face the more intense society, and we should present our competitors and get a Advanced Administrator correct answer to make our domain come true. Although it is not an easy thing to achieve it, since you choose our Advanced-Administrator program format, we will send the new updates for you a year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

PrepAwayQuiz's providing training materials is very close to the nature of the formal examination. Through our abundant practical training you can easily grasp IT underlines knowledge, and then gain a good preparation for your exam. We promise that we will do our best to help you pass the Salesforce Certified Advanced-Administrator Exam.

100% Advanced-Administrator Correct Answers

100% Pass Quiz Reliable Salesforce - Advanced-Administrator - 100% Salesforce Certified Advanced Administrator Correct Answers

Salesforce certified Advanced-Administrator exam has become a very popular test in the IT industry and in order to pass the exam you have to learn a lot of theory and effort to master Advanced IT professional knowledge. In such a time to be the elite society, come to history, PrepAwayQuiz. New Released Quiz 2023 Salesforce Advanced-Administrator: Salesforce Certified Advanced-Administrator Newest 100% Correct Answers

DOWNLOAD the newest Dumpcollection 3V0-21.25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1Ey1ihbdRYIFkQAIq7XgBGtAK_3_uSFoE

There are rare products which can rival with our products and enjoy the high recognition and trust by the clients like our products. Our products provide the 3V0-21.25 test guide to clients and help they pass the test 3V0-21.25 certification which is highly authorized and valuable. Our company is a famous company which bears the world-wide influences and our 3V0-21.25 Test Prep is recognized as the most representative and advanced study materials among the same kinds of products. Whether the qualities and functions or the service of our product, are leading and we boost the most professional expert team domestically.

VMware 3V0-21.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section focuses on understanding fundamental IT architectures, technologies, and industry standards that support VMware Cloud Foundation environments. It ensures candidates understand the foundational concepts required to design and manage automated cloud infrastructure solutions.

Topic 2	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware Solution: This section covers configuring and administering VMware Cloud Foundation Automation environments. It includes managing provider portals, organizations, integrations, governance policies, resource deployments, automation workflows, blueprints, and orchestrator components.
Topic 3	<ul style="list-style-type: none"> • Operation Management: This section focuses on monitoring and managing operational aspects of VMware Cloud Foundation Automation. It includes using VMware operations tools to monitor automation services, provider management, and organizational environments.
Topic 4	<ul style="list-style-type: none"> • Plan and Design the VMware Solution: This section focuses on designing VMware Cloud Foundation Automation environments based on business and technical requirements. It includes understanding tenancy deployment models, organization types, and the functional components used to structure and manage cloud resources.
Topic 5	<ul style="list-style-type: none"> • VMware Products and Solutions: This section covers VMware products related to VMware Cloud Foundation Automation, particularly components such as vSphere Supervisor and supervisor-based NSX networking. It focuses on identifying and differentiating architectural components and how they function within a deployment.

3V0-21.25 Valid Exam Topics - Best 3V0-21.25 Study Material

First and foremost, we have high class operation system so we can assure you that you can start to prepare for the 3V0-21.25 exam with our study materials only 5 to 10 minutes after payment. Fortunately, you need not to worry about this sort of question any more, since you can find the best solution in this website--our 3V0-21.25 Training Materials. With our continued investment in technology, people and facilities, the future of our company has never looked so bright. There are so many advantages of our 3V0-21.25 practice test and I would like to give you a brief introduction now.

VMware Advanced VMware Cloud Foundation 9.0 Automation Sample Questions (Q42-Q47):

NEW QUESTION # 42

What are two prerequisites to enable provisioning VMs via kubectl against tenant resources? (Choose two.)

- A. Create a new extensibility Action.
- B. Ask the Provider to generate a token via the system APIs.
- C. Generate an API token from the VCF Automation UI.
- D. Create a context via kubectl.
- E. Create a context via VCF CLI.

Answer: C,E

NEW QUESTION # 43

An administrator has been tasked with creating a provider content library. The following requirements must be satisfied:

- * The content library must be configured as a local content library.
- * The content library must be associated with the region called West.

Select the four steps involved in configuring the provider content library. (Choose four.)

vmware

Action Options

- Log into the Provider Management Portal.
- Ensure **Subscribe to an external library** is enabled.
- Ensure **Subscribe to an external library** is disabled.
- Specify the region called West.
- Log into the Organization Portal.
- Click **CREATE CONTENT LIBRARY**.

Action List

Answer:

Explanation:

Action Options

- Log into the Provider Management Portal.
- Ensure **Subscribe to an external library** is enabled.
- Ensure **Subscribe to an external library** is disabled.
- Specify the region called West.
- Log into the Organization Portal.
- Click **CREATE CONTENT LIBRARY**.

Action List

- Log into the Provider Management Portal.
- Click **CREATE CONTENT LIBRARY**.
- Specify the region called West.
- Ensure **Subscribe to an external library** is disabled.

Explanation:

- * Log into the Provider Management Portal.
- * Click **CREATE CONTENT LIBRARY**.
- * Specify the region called West.
- * Ensure **Subscribe to an external library** is disabled.

In VMware Cloud Foundation (VCF) 9.0, the Provider Management Portal is the centralized interface used by cloud providers to manage global infrastructure and shared resources across the entire fleet.

To satisfy the requirements:

- * **Administrative Context:** The task of creating global resources like a provider-level content library is a "Day 0/1" infrastructure task, which must be performed in the Provider Management Portal rather than a tenant-specific Organization Portal.
- * **Regional Association:** VCF 9.0 uses Regions to logically group underlying vSphere and NSX resources. Associating the library with the West region ensures that the templates and ISOs within that library are specifically available for workloads deployed into that regional infrastructure.
- * **Local vs. Subscribed:** A Local Content Library is one where the provider directly uploads and manages the content. The requirement specifies a local configuration; therefore, the option to **Subscribe to an external library** must be disabled. If it were enabled, the library would instead attempt to synchronize content from a remote URL (such as a public VMware repository or another VCF instance).

Once created, this library acts as a "golden repository" that the provider can then share with multiple tenant organizations, ensuring consistency across the private cloud fleet.

NEW QUESTION # 44

In VMware Cloud Foundation (VCF) Automation, which two statements identify the relationship between a storage policy and a region? (Choose two.)

- A. Regions can only use the default vSphere storage policy.
- **B. Storage policies determine which datastores are available in a region.**
- C. Regions automatically create storage policies based on cluster configuration.
- D. Storage policies must be replicated across all regions using the VCF Automation REST API.
- **E. A storage policy can be associated with one or more regions.**

Answer: B,E

Explanation:

In VCF 9.0, the Region construct acts as the bridge between physical vSphere infrastructure and the logical automation consumption layer. Storage policies (SPBM) are used to abstract the underlying physical datastores (such as vSAN, VMFS, or vVOLS). A region identifies which storage policies are available for consumption by the tenant organizations mapped to it. Consequently, storage policies determine which datastores are available within a region; if a datastore is not associated with a policy selected during region configuration, it cannot be used for workload placement. Furthermore, a storage policy can be associated with one or more regions. This allows a provider to offer standardized "Gold," "Silver," or "Bronze" storage tiers across different geographic or logical regions of the VCF fleet, ensuring a consistent consumption experience for developers regardless of which physical workload domain their virtual machines or Kubernetes pods are deployed into.

NEW QUESTION # 45

A customer requires a backup of blueprints within VMware Cloud Foundation (VCF) Automation to a third-party solution each time the blueprint is released.

What construct will satisfy the requirement?

- A. ArgoCD service
- B. Velero service
- C. CloudConfig
- D. Event broker subscription

Answer: D

Explanation:

To automate the export or backup of Blueprints (Cloud Templates) in VCF 9.0, the Event Broker Service (EBS) is the required mechanism. While Velero (Option A) is used for backing up vSphere Pods and ArgoCD (Option C) is for continuous delivery, neither is designed to "listen" for internal automation metadata changes.

By creating an Event Broker Subscription mapped to the "Blueprint Released" or "Template Version Created" topic, the administrator can trigger an action every time a developer finalizes a new version of their infrastructure code. This triggered action (typically an ABX or Orchestrator task) can then programmatically retrieve the YAML definition of the blueprint via the VCF Automation API and push it to an external third-party storage solution or a secondary Git repository for long-term archival and backup. This ensures that the organization maintains a complete, off-appliance history of its infrastructure designs, satisfying auditing and disaster recovery requirements.

NEW QUESTION # 46

A customer requires a backup of blueprints within VMware Cloud Foundation (VCF) Automation to a third-party solution each time the blueprint is released.

What construct will satisfy the requirement?

- A. ArgoCD service
- B. Velero service
- C. CloudConfig
- D. Event broker subscription

Answer: D

Explanation:

To automate the export or backup of Blueprints (Cloud Templates) in VCF 9.0, the Event Broker Service (EBS) is the required mechanism. While Velero (Option A) is used for backing up vSphere Pods and ArgoCD (Option C) is for continuous delivery, neither is designed to "listen" for internal automation metadata changes.

By creating an Event Broker Subscription mapped to the "Blueprint Released" or "Template Version Created" topic, the administrator can trigger an action every time a developer finalizes a new version of their infrastructure code. This triggered action (typically an ABX or Orchestrator task) can then programmatically retrieve the YAML definition of the blueprint via the VCF Automation API and push it to an external third-party storage solution or a secondary Git repository for long-term archival and backup. This ensures that the organization maintains a complete, off-appliance history of its infrastructure designs, satisfying auditing and disaster recovery requirements.

NEW QUESTION # 47

.....

Everyone is looking for ways to improve their ability. How can you stand out? Perhaps you can beat them in time. Our 3V0-21.25 exam materials don't require you to spend a lot of time learning, you can go to the 3V0-21.25 exam after you use them for twenty to thirty hours. This means that you can pass several exams when someone else passes an exam! Is it amazing? Yes, and only with our 3V0-21.25 Practice Engine, you can achieve all of these for we are the leader in this career for over ten years.
