Doing them again and again, you enrich your knowledge and maximize chances of an outstanding exam success.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q98-Q103):

NEW QUESTION # 98

What are three goals Ursa Major Solar can accomplish with experience Cloud moderation functionality?

Choose 3 answers

- A. Give members Audience Targeting permissions within the Experience site.
- B. Allow members to remove other member from the Experience site if desired.
- C. Allow members to flag posts comments files, and messages that are inappropriate or spam.
- D. Designer specific users as moderators so that they can closely monitor the site.
- E. Track Flagging and moderation activity within the Experience site.

Answer: C,D,E

Explanation:

UMS can accomplish three goals with Experience Cloud moderation functionality:

* Track Flagging and moderation activity within the Experience site. Moderation functionality allows UMS to view reports and dashboards that show the flagging and moderation activity on its site, such as the number of flagged items, the number of moderated items, and the flagging reasons.

* Allow members to flag posts comments files, and messages that are inappropriate or spam. Moderation functionality allows UMS to enable members to flag content that violates the site's guidelines or policies. Members can choose a flagging reason from a predefined list or enter their own reason.

* Designer specific users as moderators so that they can closely monitor the site. Moderation functionality allows UMS to assign specific users as moderators who have permission to manage content on its site. Moderators can review flagged items, delete or edit inappropriate content, ban or warn abusive users, or escalate issues to administrators.

NEW QUESTION # 99

Ursa Major Solar (UMS) has business and person accounts in its Salesforce org. UMS has partner portals created for its Silver partners, DreamHouse Realty (DR) and Cloud Kicks (CK).

UMS's Experience team is creating users for its partners. DR and CK users do not require access to opportunities, leads, and campaigns.

What are the two considerations for creating partner users and granting access?

Choose 2 answers

- A. Assign Partner Community license to partner users.
- B. Assign Customer Community Plus license to partner users.
- C. Only business accounts can be created as partner users
- D. Only person accounts can be created as partner users.

Answer: A,B

Explanation:

Two considerations for creating partner users and granting access are B and C. Partner users are external users who access your Experience Cloud site through a partner account. A partner account is an account that has the Is Partner checkbox enabled. To create partner users and grant access, you need to assign them a license type and a profile. Two license types that are suitable for partner users are Partner Community and Customer Community Plus. These license types allow partner users to access standard CRM objects, such as accounts, contacts, leads, opportunities, and cases, as well as custom objects and tabs. They also allow partner users to use roles and sharing rules to share records with other users.

NEW QUESTION # 100

Universal Containers (UC) maintains multiple customer-facing sites, but only one profile for all customer users. No customer has access to more than one site.

Which step should the UC system administrator take to grant customers access to the appropriate site?

- A. Enable the Customer Identity profile or permission set.
- B. Add user to the All Customer Portal Users public group.
- C. Create and assign a permission set to the users and site.
- D. Assign the profile to the site membership.

Answer: D

Explanation:

This option allows UC to grant customers access to the appropriate site. Site membership is a feature that defines which users can

access a site and what permissions they have. UC can assign the profile for all customer users to the site membership of each site and specify the default page access and object permissions for that profile. UC can also assign permission sets to the site membership to grant additional permissions to specific users⁴

NEW QUESTION # 101

Which step denotes the completion of an Experience Cloud site setup?

- **A. Activating the site**
- B. Assigning profiles to users
- C. Setting up SSO
- D. Assigning roles to users

Answer: A

Explanation:

The step that denotes the completion of an Experience Cloud site setup is activating the site. Activating the site is the final step that makes your Experience Cloud site live and accessible to your users and visitors. Before activating the site, you need to complete other steps such as creating pages, adding components, configuring settings, assigning permissions, and testing functionality. After activating the site, you can still make changes and updates as needed.

NEW QUESTION # 102

Universal Containers has recently launched a site for its retailers. Retailers are able to collaborate with other retailers around topics; however, retail managers aren't able to see records owned by their peers and subordinates. What should be done to resolve the issue?

- **A. Retail managers need to be given super user access.**
- B. Retail managers need to be put in the execute role in the Role Hierarchy
- C. A Sharing Set needs to be created.
- D. A sharing Rule needs to be created.

Answer: A

Explanation:

Super User access is a feature that allows you to grant access to records owned by other users who have the same role or a role below them in the role hierarchy. You can use Super User access to give retail managers access to records owned by their peers and subordinates.
