

LEED-AP-Homes Download & Test LEED-AP-Homes Centres

BTW, DOWNLOAD part of Exam4PDF LEED-AP-Homes dumps from Cloud Storage: <https://drive.google.com/open?id=1myPMMFLEd1A6u5UB-nvJ76c-qEPaCaem>

Our LEED-AP-Homes guide questions are compiled and approved elaborately by experienced professionals and experts. The download and tryout of our LEED-AP-Homes torrent question before the purchase are free and we provide free update and the discounts to the old client. Our customer service personnel are working on the whole day and can solve your doubts and questions at any time. Our online purchase procedures are safe and carry no viruses so you can download, install and use our LEED-AP-Homes Guide Torrent safely.

New questions will be added into the study materials, unnecessary questions will be deleted from the LEED-AP-Homes exam simulation. Our new compilation will make sure that you can have the greatest chance to pass the exam. If you compare our LEED-AP-Homes training engine with the real exam, you will find that our study materials are highly similar to the real exam questions. So you just need to memorize our questions and answers of the LEED-AP-Homes Exam simulation, you are bound to pass the exam.

Test LEED-AP-Homes Centres & Actual LEED-AP-Homes Test

If you try to get the LEED AP Homes (Residential) Exam certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of LEED-AP-Homes exam, you can consider choose our LEED-AP-Homes Exam Questions to improve your knowledge to pass LEED-AP-Homes exam, which is your

testimony of competence. Now we are going to introduce our LEED-AP-Homes test guide to you, please read it carefully.

USGBC LEED AP Homes (Residential) Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

How many Regional Priority Credits can a LEED for Homes v4 project pursue?

- A. Two
- B. Three
- **C. Four**
- D. One

Answer: C

Explanation:

The LEED for Homes Rating System (v4) includes Regional Priority (RP) Credits, which provide bonus points for addressing location-specific environmental priorities. A project can pursue multiple RP credits based on its geographic location.

According to the LEED Reference Guide for Homes Design and Construction (v4):

Regional Priority Credits (1-4 points)

A LEED for Homes v4 project can pursue up to four Regional Priority Credits, which are selected based on the project's location and the environmental priorities identified for that region. Each RP credit awards one bonus point for achieving a designated existing credit that addresses regional environmental concerns.

Source: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

The LEED v4.1 Residential BD+C rating system confirms:

Regional Priority Credits

Projects can earn up to four bonus points by achieving Regional Priority Credits, which are assigned based on the project's ZIP code or region to address local environmental priorities.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is four (Option C), as a LEED for Homes v4 project can pursue up to four Regional Priority Credits.

Why not the other options?

* A. One: This underestimates the number of RP credits available.

* B. Two: This is also too low, as up to four credits can be pursued.

Reference: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

The LEED AP Homes Candidate Handbook emphasizes RP credits as part of the certification process and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of the four-credit limit.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Regional Priority Credits, p. 190.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming RP credit limits.

NEW QUESTION # 38

How many total Regional Priority credits are available for a project team to choose from in any region?

- **A. Six credits**
- B. Four credits
- C. Seven credits
- D. Eight credits

Answer: A

Explanation:

The LEED for Homes Rating System (v4) includes Regional Priority (RP) Credits, which provide bonus points for addressing location-specific environmental priorities. Each region has a set number of RP credits available, from which a project can earn up to

four points.

According to the LEED Reference Guide for Homes Design and Construction (v4):

Regional Priority Credits (1-4 points)

In each region, six Regional Priority Credits are available, based on the project's ZIP code or location, addressing critical environmental issues. A project can earn up to four bonus points by achieving any combination of these six credits.

Source: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

The LEED v4.1 Residential BD+C Crating system confirms:

Regional Priority Credits

Six RP credits are identified for each region, from which a project team can choose to pursue up to four for bonus points, based on local environmental priorities.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is six credits (Option B), as six Regional Priority Credits are available for a project team to choose from in any region, with a maximum of four points achievable.

Why not the other options?

* A. Four credits: This is the maximum number of points a project can earn, not the total number of RP credits available.

* C. Seven credits: No region has seven RP credits; the standard is six.

Reference: LEED Reference Guide for Homes Design and Construction, v4, Regional Priority Credits, p. 190.

The LEED AP Homes Candidate Handbook emphasizes RP credits and their regional applicability, referencing the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of the six-credit availability.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Regional Priority Credits, p. 190.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming RP credit availability.

NEW QUESTION # 39

What are the benefits of rainwater harvesting in areas with substantial rainfall spikes?

- A. Helps to offset air pollution
- B. Helps to maintain required firewater levels
- C. Little-to-no benefit since precipitation is seasonal
- **D. Keeps water out of storm sewers**

Answer: D

Explanation:

The LEED for Homes Rating System (v4) addresses rainwater harvesting in the Sustainable Sites (SS) Credit: Rainwater Management, which aims to reduce runoff and manage stormwater on-site, particularly in areas with significant rainfall events.

According to the LEED Reference Guide for Homes Design and Construction (v4):

SS Credit: Rainwater Management (1-3 points)

Implement rainwater harvesting systems (e.g., rain barrels, cisterns) to capture and store rainwater, reducing runoff volume and keeping water out of storm sewers. This is particularly beneficial in areas with substantial rainfall spikes, as it mitigates flooding and reduces strain on municipal stormwater systems.

Source: LEED Reference Guide for Homes Design and Construction, v4, Sustainable Sites Credit: Rainwater Management, p. 76.

The LEED v4.1 Residential BD+C Crating system confirms:

SS Credit: Rainwater Management

Rainwater harvesting reduces runoff by capturing water on-site, preventing it from entering storm sewers, which is especially effective during heavy rainfall events.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is keeps water out of storm sewers (Option C), as rainwater harvesting captures runoff, reducing the burden on stormwater infrastructure, particularly in areas with seasonal or substantial rainfall spikes.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, SS Credit: Rainwater Management, p. 76.

B). Helps to maintain required firewater levels: Firewater systems are unrelated to rainwater harvesting, which is for non-potable

uses like irrigation. Reference: No mention in LEED v4 for Homes; irrelevant to rainwater management.

D). Little-to-no benefit since precipitation is seasonal. Rainwater harvesting is highly beneficial during rainfall spikes, as it captures excess water for later use, contradicting this option. Reference: LEED Reference Guide for Homes Design and Construction, v4, SS Credit: Rainwater Management, p. 76.

The LEED AP Homes Candidate Handbook emphasizes SS credits, including rainwater management, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of rainwater harvesting benefits.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Sustainable Sites Credit: Rainwater Management, p. 76.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming rainwater harvesting benefits.

NEW QUESTION # 40

In order to verify that environmentally preferable products are low-emitting, the project team must submit which of the following information?

- A. Product literature or certification labels
- B. Distance from manufacturing facility to project site
- C. Cost of qualifying product as a percentage of total project cost
- D. Date of purchase

Answer: A

Explanation:

The LEED for Homes Rating System (v4) awards points for the Materials and Resources (MR) Credit:

Environmentally Preferable Products when products meet criteria such as low emissions (e.g., low-VOC paints or adhesives).

Verification requires documentation to confirm compliance.

According to the LEED Reference Guide for Homes Design and Construction (v4):

MR Credit: Environmentally Preferable Products (1-4 points)

To verify that products are low-emitting, submit product literature or certification labels (e.g., GREENGUARD, SCS Indoor Advantage) demonstrating compliance with low-VOC or low-emission standards. This documentation confirms that products meet the credit's requirements for indoor environmental quality.

Source: LEED Reference Guide for Homes Design and Construction, v4, Materials and Resources Credit:

Environmentally Preferable Products, p. 161.

The LEED v4.1 Residential BD+C Crating system confirms:

MR Credit: Environmentally Preferable Products

Low-emitting products must be documented with product literature or third-party certification labels verifying compliance with VOC or emission standards.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is product literature or certification labels (Option C), as these provide the necessary evidence to verify low-emitting properties.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 161.

B). Cost of qualifying product as a percentage of total project cost: Cost data is used for overall credit calculations, not low-emission verification. Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

D). Distance from manufacturing facility to project site: This is relevant for Option 1: Local Production, not low-emission verification. Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

The LEED AP Homes Candidate Handbook emphasizes MR credits, including documentation requirements, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of product literature.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Materials and Resources Credit: Environmentally Preferable Products, p. 160-161.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming low-emission documentation.

NEW QUESTION # 41

Who of the following may submit to Green Business Certification Inc. a LEED for Homes project for certification?

- A. The Owner or designated project team member
- B. The Energy Rater
- C. The Quality Assurance Designee
- D. The Green Rater

Answer: A

Explanation:

The LEED for Homes Rating System (v4) outlines the certification process, including who is authorized to submit a project to the Green Business Certification Inc. (GBCI) for LEED certification.

According to the LEED Reference Guide for Homes Design and Construction (v4):
Certification Process

The project owner or a designated project team member (e.g., the project manager or LEED AP) is responsible for submitting the LEED for Homes project to GBCI for certification, coordinating with the LEED Green Rater for documentation and verification.

Source: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 28.

The LEED v4.1 Residential BD+C Rating system confirms:

Certification Process

The owner or a designated project team member submits the project to GBCI for certification, supported by the Green Rater's verification reports and documentation.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is the Owner or designated project team member (Option D), as they are authorized to submit the project to GBCI.

Why not the other options?

* A. The Green Rater: The Green Rater conducts field inspections and prepares verification reports but does not submit the project.

* B. The Energy Rater: The Energy Rater focuses on energy performance (e.g., HERS Index) and does not handle submission.

Reference: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 28.

The LEED AP Homes Candidate Handbook emphasizes the certification process, including submission roles, and references the LEED Reference Guide for Homes Design and Construction as a key resource.

The exam is based on LEED v4, ensuring the relevance of owner submission.

References:

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming submission roles.

NEW QUESTION # 42

.....

No doubt the LEED AP Homes (Residential) Exam (LEED-AP-Homes) certification is one of the most challenging certification exams in the market. This LEED AP Homes (Residential) Exam (LEED-AP-Homes) certification exam gives always a tough time to LEED AP Homes (Residential) Exam (LEED-AP-Homes) exam candidates. The Exam4PDF understands this hurdle and offers

recommended and real USGBC LEED-AP-Homes Exam Practice questions in three different formats. These formats hold high demand in the market and offer a great solution for quick and complete LEED AP Homes (Residential) Exam (LEED-AP-Homes) exam preparation.

Test LEED-AP-Homes Centres: <https://www.exam4pdf.com/LEED-AP-Homes-dumps-torrent.html>

Our LEED-AP-Homes practice exam questions have self-assessment features that will help you prepare for the exam without going through any trouble, Dear customers, as you know, more and more people are entering this area, so the competition becomes much harder (Test LEED-AP-Homes Centres - LEED AP Homes (Residential) Exam latest test simulator), USGBC LEED-AP-Homes Download In modern society, many people are not sure about their future development.

You'll have more fun, be more productive, and be less frustrated if you Test LEED-AP-Homes Centres take a moment to appreciate the difference, I think it's a breakthrough for using this type of material in information processing, Lou said.

100% Pass USGBC LEED-AP-Homes Download - Unparalleled LEED AP Homes (Residential) Exam

Our LEED-AP-Homes Practice Exam Questions have self-assessment features that will help you prepare for the exam without going through any trouble, Dear customers, as you know, more and more people are LEED-AP-Homes entering this area, so the competition becomes much harder (LEED AP Homes (Residential) Exam latest test simulator).

In modern society, many people are not sure about their future development, Valid LEED-AP-Homes Test Topics High quality with 99 % pass rate, This exam can improve your professional capacity with great chance if you choose our LEED AP Homes (Residential) Exam exam questions.
