Snowflake SnowPro Core Certification Exam Sample Questions (Q380-Q385):

NEW QUESTION # 380

Which steps will help optimize query performance? (Select TWO).

- A. Decreasing the size of the virtual warehouse
- B. Clustering a table
- C. Using the query acceleration service
- D. Increasing the size of the micro-partitions
- E. Indexing a column

Answer: A,D

NEW QUESTION # 381

What can the Snowflake SCIM API be used to manage? (Select TWO).

- A. Network policies
- B. Users
- C. Roles
- D. Session policies
- E. Integrations

Answer: B,C

Explanation:

The Snowflake SCIM (System for Cross-domain Identity Management) API is used for automated user and role management. It enables integration with identity providers (IdPs) for the provisioning and deprovisioning of user accounts and roles in Snowflake. This helps in managing access control and permissions systematically and aligns with identity governance practices.

* Snowflake Documentation: Managing Users and Roles with SCIM API

NEW QUESTION # 382

What does Snowflake recommend regarding database object ownership? (Select TWO).

- A. Use only MANAGED ACCESS SCHEMAS for objects owned by ACCOUNTADMIN.
- B. Create objects with SECURITYADMIN to ease granting of privileges later.
- C. Create objects with SYSADMIN.
- D. Create objects with a custom role and grant this role to SYSADMIN.
- E. Create objects with ACCOUNTADMIN and do not reassign ownership.

Answer: C,D

Explanation:

Snowflake recommends creating objects with a role that has the necessary privileges and is not overly permissive. SYSADMIN is typically used for managing system-level objects and operations. Creating objects with a custom role and granting this role to SYSADMIN allows for more granular control and adherence to the principle of least privilege. References: Based on best practices for database object ownership and role management.

NEW QUESTION # 383

How does the authorization associated with a pre-signed URL work for an unstructured file?

- A. The role specified in the GET REST API call must have sufficient privileges on the stage to access the referenced file using
