Free PDF Quiz Dynatrace-Associate - Dynatrace Associate Certification Exam –The Best Latest Materials

The BraindumpsVCE Dynatrace Associate Certification Exam (Dynatrace-Associate) PDF format of questions is user-friendly, portable, and printable that's easy to use on smartphones, laptops, and tablets. This way, you can prepare for the Dynatrace-Associate test anywhere without time restrictions. For those who prefer a traditional reading experience, BraindumpsVCE Dynatrace Associate Certification Exam (Dynatrace-Associate) PDF questions also provides the option to print the Dynatrace-Associate questions, and read it in a convenient paper format. This flexibility empowers Dynatrace-Associate candidates to study anywhere and anytime, adapting to their individual preferences and schedules.

Dynatrace Associate Certification Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which of the following properties are added to your ingested log data when trace enrichment for logs is enabled? (Select all that apply)

- A. dt.trace_id
- B. dt.span_id
- C. DT_RELEASE_VERSION
- D. dt.security_context
- E. dt.entity.process_group_instance

Answer: A,B,E

Explanation:

When trace enrichment for logs is enabled in Dynatrace, additional metadata is automatically added to logs to correlate them with distributed traces.

The key properties added include:

- * dt.trace_id - uniquely identifies the distributed trace
- * dt.span_id - identifies the specific span within the trace
- * dt.entity.process_group_instance - links the log to the specific monitored process instance These attributes enable:
 - * Seamless correlation between logs and traces
 - * End-to-end observability across services
 - * Faster root cause analysis by linking logs directly to transactions

The other options are not part of trace enrichment:

- * dt.security_context is related to log access control, not trace enrichment
- * DT_RELEASE_VERSION is used for versioning metadata, not tracing

Reference: Based on official Dynatrace University training materials covering log monitoring and trace-log correlation.

NEW QUESTION # 42

At which environment levels can log ingestion rules be configured?

- A. Environment
- B. Process Group
- C. Host
- D. ActiveGate
- E. Host Group

Answer: A

Explanation:

Log ingestion rules in Dynatrace are configured at the environment level .

This ensures:

- * Centralized control of log ingestion
- * Consistent processing and filtering across all monitored entities
- * Unified configuration for all logs entering the platform

Other options are not valid configuration levels:

- * ActiveGate handles routing, not rule configuration
- * Host, Process Group, and Host Group are entity levels, not ingestion rule scopes Reference: Based on official Dynatrace University training materials on log monitoring and ingestion configuration.

NEW QUESTION # 43

What is the default retention period for Logs?

- A. 35 days
- B. 10 years
- C. 10 days
- D. 5 years

Answer: A

Explanation:

Dynatrace stores logs with a default retention period of 35 days .

This provides:

- * Sufficient time for analysis
- * Balance between storage and cost

Reference: Based on official Dynatrace University training materials on log management.

NEW QUESTION # 44

On the Data Explorer, how many metrics can you add to one chart?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

In Dynatrace Data Explorer , you can add up to 10 metrics to a single chart.

This allows users to:

- * Compare multiple metrics side by side
- * Correlate performance indicators
- * Build comprehensive visualizations for analysis

Lower numbers such as 3, 5, or 7 do not reflect the platform's supported maximum.

Reference: Based on official Dynatrace University training materials covering Data Explorer capabilities.

NEW QUESTION # 45

How best is the "Visually complete" metric defined?

- A. A simulated test that's run on the user's browser to evaluate how fast the browser can render an image
- B. When all of the elements visible to the user on a webpage are 100% loaded and rendered
- C. The amount of time the first CSS element takes to load
- D. When the largest element of the page is reported as rendered by the browser

Answer: B

Explanation:

Visually Complete measures the time when all visible elements on a page are fully rendered.

It reflects:

* What the user actually sees

* Completion of visual loading

Option B refers to Largest Contentful Paint (LCP) , not Visually Complete.

Reference: Based on official Dynatrace University training materials on RUM metrics.

NEW QUESTION # 46

.....

Did you often feel helpless and confused during the preparation of the Dynatrace-Associate exam? Do you want to find an expert to help but feel bad about the expensive tutoring costs? Don't worry. Our Dynatrace-Associate exam questions can help you to solve all the problems. Our Dynatrace-Associate Study Material always regards helping students to pass the exam as it is own mission. And we have successfully helped numerous of the candidates pass their exams.
