Pegasystems PEGACPBA24V1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Pega Express: This section of the exam measures skills of Business Analysts and Delivery Managers and covers the benefits and best practices of the Pega Express delivery approach. Candidates learn about the Pega Express values and best practices framework, the process and advantages of Directly Capture Objectives (DCO), and understand the four phases of Pega Express delivery along with relevant terminology.
Topic 2	<ul style="list-style-type: none">• Reporting: This domain measures reporting capabilities of Reporting Analysts and Data Visualization Specialists. Candidates learn the benefits of using Insights, creating visualizations with tables and charts, and utilizing columns and filters for effective data representation.
Topic 3	<ul style="list-style-type: none">• Case Management: This domain targets Case Designers and Process Architects and explores designing a case lifecycle, including setting case statuses and adding instructions for tasks. Candidates demonstrate ability to configure service level agreements with urgency, goals, and deadlines, and manage routing of assignments to users, work groups, or queues. This section also includes configuring email correspondence, identifying duplicate cases, adding optional actions and automating workflow decisions using conditions. Candidates learn to pause and resume case processing, skip stages or processes, configure child cases, use automation shapes appropriately, and create and manage user teams.
Topic 4	<ul style="list-style-type: none">• Application Development: This section evaluates skills of Pega Business Architects and Developers in application development. It covers the roles and skills of a Pega Business Architect, identification of project stakeholders, and benefits of Pega's Center-out™ business architecture. Candidates learn about App Studio's value, understand rules, rulesets, classes, and the role of generative AI. The domain also covers Pega's CI• CD pipeline with Deployment Manager, use of collaboration tools, managing application development with user stories, feedback, and bug tracking, and using tools like Case Type Backlog and Estimator for project scoping.

Pegasystems Certified Pega Business Architect 24 Sample Questions (Q112-Q117):

NEW QUESTION # 112

...wants to create a mobile app experience for users and CSRs for its Transaction Dispute application, following requirements, which option requires you to configure distinct mobile app channels?

- A. The mobile app customizes currency units and date/time format according to the location of the users.
- B. CSRs can create other case type instances on the mobile app.
- **C. Mobile app color palettes are different for users and CSRs.**
- D. The mobile app supports all mobile phone operating systems.

Answer: C

Explanation:

Mobile app color palettes are different for users and CSRs: Configuring distinct mobile app channels is required when you need different UI elements, such as color palettes, for different user groups (e.g., users and CSRs).

* Pega Academy, Mobile Channel Configuration, Customizing the User Interface.

NEW QUESTION # 113

What will happen when the user submits CollectInfo? Examine the screenshot below for Validate rule A which is referenced in a flow action named CollectInfo:

The screenshot shows the Pega Property Editor interface. On the left, under the 'PROPERTY' tab, the value '.SSN' is entered in a search field. On the right, under the '*Req Conditions' tab, a rule condition is defined: 'IF.SSN equals THEN display message:'. Below this, under the 'ADDITIONAL VALIDATION' tab, a rule 'B' is listed in a search field. A large watermark 'PEGA itexamdownload.com' is visible across the center of the screenshot.

What will happen when the user submits CollectInfo? Response:

- A. Validate rule A is overridden by Validate rule B
- **B. Validate rule A is executed, followed by Validate rule B**
- C. Validate rule B is executed only if Validate rule A fails
- D. Validate rule A is executed if certain conditions are true, otherwise Validate rule B is executed

Answer: B

NEW QUESTION # 114

Which of the following statements about responsive breakpoints is true?

- **A. Custom responsive breakpoints are configured in App Studio.**

- B. Responsive breakpoints rely on fixed widths.
- C. By default, tables have two responsive breakpoints.
- D. Responsive breakpoint behavior changes based on the device brand.

Answer: A

Explanation:

The statement that is true about responsive breakpoints is:

C). Custom responsive breakpoints are configured in App Studio. This allows you to define how the UI behaves at different screen sizes.

* Responsive Breakpoints: These are used to adapt the UI layout for different screen sizes, ensuring a good user experience on all devices.

NEW QUESTION # 115

Automating decisions based on business logic enables _____.

Response:

- A. architects to improve the performance of the application
- B. architects to spend less time building the application
- C. application users to mark a specific location for business exceptions that may arise in the process flow
- D. application users to focus on more nuanced decisions that require business expertise

Answer: D

NEW QUESTION # 116

Drag the data type description from the left to the blank rectangle next to the appropriate sourcing option.

Data type description	Source
A small company uses a Pega application for job applications. The Available positions data type includes fields for position title, description, and qualifications.	Pega system of record
An auto repair shop uses a Pega application to schedule appointments. The Vehicle data type includes fields for make, model, and year. The application must be able to accommodate any vehicle.	External system of record
A standardized test enrollment application contains a Special accommodations data type. Special accommodations include needing readers, large-print exams, special seating, or extended time.	No system of record

Solution:

Data type description	Source
A small company uses a Pega application for job applications. The Available positions data type includes fields for position title, description, and qualifications.	Pega system of record
An auto repair shop uses a Pega application to schedule appointments. The Vehicle data type includes fields for make, model, and year. The application must be able to accommodate any vehicle.	External system of record
A standardized test enrollment application contains a Special accommodations data type. Special accommodations include needing readers, large-print exams, special seating, or extended time.	No system of record

Determine whether the given solution is correct? Response:

- Answer: B**
