# 100% Pass HPE7-A06 - HPE Campus Access Switching Expert Written Exam Updated Dumps Questions
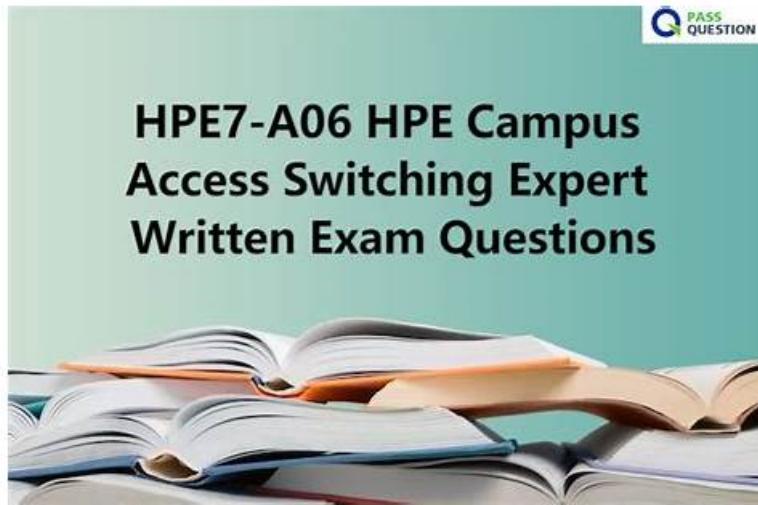

BONUS!!! Download part of BraindumpStudy HPE7-A06 dumps for free: https://drive.google.com/open?id=1KQF4H1VoJ09DAiWtKG_rEI1fBqU6HC9_

BraindumpStudy offers a full refund if you cannot pass HPE7-A06 certification on your first try. This is a risk-free guarantee currently enjoyed by our more than 90,000 clients. We can assure you that you can always count on our braindumps material. We are proud to say that our HPE7-A06 Exam Dumps material to reduce your chances of failing the HPE7-A06 certification. Therefore, you are not only saving a lot of time but money as well.

It is well acknowledged that people who have a chance to participate in the simulation for the real HPE7-A06 exam, they must have a fantastic advantage over other people to get good grade in the HPE7-A06 exam. Now, it is so lucky for you to meet this opportunity once in a blue. We offer you the simulation test with the Software version of our HPE7-A06 Preparation dumps in order to let you be familiar with the environment of test as soon as possible.

Latest HPE7-A06 Exam Cram - Valid Dumps HPE7-A06 Book

BraindumpStudy offers verified, authentic HP HPE7-A06 Real Questions and answers, which are essential for passing the HPE Campus Access Switching Expert Written Exam (HPE7-A06). These questions and answers have been designed by Sitecore experts and can be easily downloaded on a PC, MacBook, or smartphone for comfortable and convenient learning.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q125-Q130):

NEW QUESTION # 125
You are configuring an HPE Aruba Networking Gateway Cluster with AOS-10. What is true about
802.1X functionality in combination with gateways? (Choose two.)

- A. The gateways act as RADIUS Proxy only in Tunneled and Bridged Mode.
- B. Users on L3-connected gateways need to perform a full authentication after re-associated on the AP.
- C. Regardless of using gateways, the CoA message is always sent to the APs.
- D. The gateways are used as a RADIUS proxy, while the AP is the authenticator.
- E. The UDG remains fixed on L2-connected gateways but not on L3-connected gateways.

Answer: B,D

Explanation:
In L3-connected gateway designs, a full 802.1X authentication is required after AP re-association because session state is not

preserved across gateway re-association.

In AOS-10, the AP is the authenticator, but the gateway functions as the RADIUS proxy, forwarding requests to the RADIUS server. This ensures centralized control and policy enforcement.

NEW QUESTION # 126
Which settings should be checked first when troubleshooting an HPE switch stack with inter- switch latency?

- A. MTU configuration
- B. Stack cable connections
- C. Spanning tree configuration
- D. Stack firmware versions

Answer: A,B,D

NEW QUESTION # 127
The customer is experiencing periodic uplink congestion between campus-1's AGG-1 and core. This has boon negativelyaffecting voice communications.The VOIP phones edge mark their packets with DSCP EF. The uplink from AGG-1 to core is LAG1.
The customer has already configured the following class and policy on AGG-1:

```
class ip voip_class
  10 match udp any any dscp 46
  exit
policy voip_policy
  10 class ip voip_class action local-priority 6
  exit
apply policy voip_policy in
```

Based on this policy, which scrip), when deployed on AGG-1. will improve the reliable forwarding of voice trafficbetween AGG-1 and its uplink to the core?

- A.
```
qos schedule-profile 8qDwrrStrict
  dwrr queue 0 weight 1
  dwrr queue 1 weight 1
  dwrr queue 2 weight 1
  dwrr queue 3 weight 1
  dwrr queue 4 weight 1
  dwrr queue 5 weight 1
  strict queue 6  max-bandwidth 300000
  strict queue 7
  exit
apply qos schedule-profile 8qDwrrStrict
```

- B.
```
qos schedule-profile 8qDwrrStrict
  dwrr queue 0 weight 1
  dwrr queue 1 weight 1
  dwrr queue 2 weight 1
  dwrr queue 3 weight 1
  dwrr queue 4 weight 1
  dwrr queue 5 weight 1
  strict queue 6 max-bandwidth 400000
  dwrr queue 7 weight 5
interface lag 1
  apply qos schedule-profile 8qDwrrStrict
  exit
policy voip_policy
  10 class ip voip_class action local-priority 7
  exit
```
- C.
```
qos schedule-profile 8qDwrrStrict
  dwrr queue 0 weight 1
  dwrr queue 1 weight 1
  dwrr queue 2 weight 1
  dwrr queue 3 weight 1
  dwrr queue 4 weight 1
  dwrr queue 5 weight 1
  strict queue 6 max-bandwidth 500000
  dwrr queue 7 weight 1
apply qos schedule-profile 8qDwrrStrict
```

- D.
```
qos schedule-profile 8qDwrrStrict
  dwrr queue 0 weight 1
  dwrr queue 1 weight 1
  dwrr queue 2 weight 1
  dwrr queue 3 weight 1
  dwrr queue 4 weight 1
  dwrr queue 5 weight 1
interface lag 1
  apply qos schedule-profile 8qDwrrStrict
  exit
policy voip_policy
  10 class ip voip_class action local-priority 7
  exit
```

Answer: D

Explanation:
The problem describes uplink congestion affecting VoIP traffic (marked with DSCP EF, value 46) on AGG-
1's LAG1 uplink. The existing configuration classifies this traffic into voip_class and applies voip_policy inbound, setting local-
priority 6. To improve reliable forwarding during congestion, VoIP traffic needs strict priority queuing on the egress interface
(LAG1).
* Analysis of Options:
* Option A applies a QoS schedule profile globally but doesn't modify the policy's local-priority or apply the schedule profile
specifically to the congested LAG.
* Option B modifies voip_policy to set local-priority 7 (mapping DSCP 46 traffic to queue 7) and applies the 8qDwrStrict schedule
profile to the egress interface lag 1. In the 8qDwrStrict profile, queue 7 is configured for strict priority, ensuring voice traffic gets
precedence over lower-priority traffic during congestion. This aligns with best practices for QoS for VoIP.
* Option C also sets local-priority 7 and applies the schedule profile to lag 1, but the profile itself configures queue 7 with DWRR
(Deficit Weighted Round Robin) instead of strict priority, which is less suitable for delay-sensitive voice traffic.
* Option D applies a schedule profile globally and uses DWRR for queue 7.
* Conclusion:Option B is the correct solution because it maps the DSCP EF traffic to the highest local priority (7) and applies a
QoS schedule profile to the specific congested uplink (lag 1) that treats queue
7 with strict priority. This ensures voice traffic is prioritized reliably.
References:AOS-CX QoS Guide (specifically sections on Classification, Queuing, Scheduling Profiles, Strict Priority vs. DWRR,
applying policies to interfaces/LAGs), DSCP to Queue mapping concepts. This relates to the "Performance Optimization" (6%) and
"Connectivity" (9%) objectives.

NEW QUESTION # 128
Refer to the exhibit.
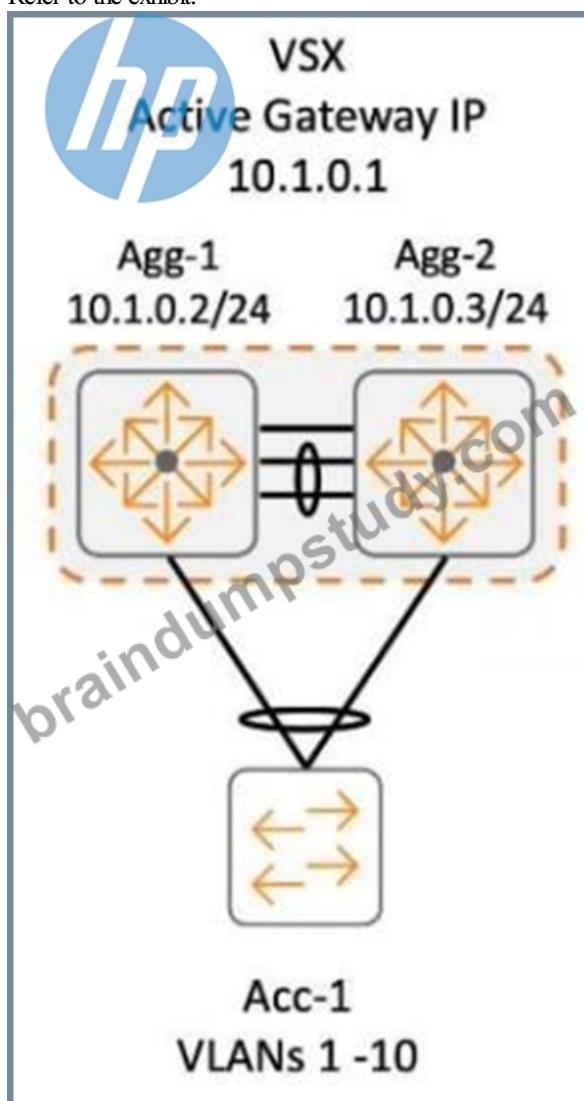

IGMP v3 was enabled on both VSX switches. Which switch becomes the IGMP querier for clients connected to Acc-1 switch?

- A. Agg-1
- B. both Agg-1 and Agg-2
- C. Agg-2
- D. Active gateway IP will be used as IGMP querier.

Answer: A

Explanation:
In an IGMPv3-enabled VLAN, the IGMP querier is elected based on the lowest IP address among the participating routers. In this topology:
Agg-1 has 10.1.0.2/24
Agg-2 has 10.1.0.3/24
The Active Gateway IP (10.1.0.1) is only for end-host default gateway redundancy, not used in
IGMP querier election.
Since 10.1.0.2 < 10.1.0.3, Agg-1 becomes the IGMP querier.

NEW QUESTION # 129
The new CTO has set a standard of using a passphrase TACACS for the switch that is 64 characters long for advanced security. What is the issue with this policy?

- A. This is not technically possible
- B. Most organizations use simple words
- C. The organization should not be using TACACS for security policy
- D. The standard should be 128 characters long

Answer: A

Explanation:
On AOS-CX, the maximum supported TACACS+ key length is 32 characters. A 64-character passphrase cannot be configured, so the CTO's policy is not technically possible.

NEW QUESTION # 130
......

If you are motivated to pass HPE7-A06 certification exams and you are searching for the best practice material for the HPE7-A06 exam; then you are at the right place. We provide 100% guaranteed success for HPE7-A06 exams. With our HPE7-A06 PDF dumps questions and practice test software, you can increase your chances of getting successful in multiple HPE7-A06 Exams. HPE7-A06 brain dumps exams can provide you a golden ticket to land a dream job in popular companies.

Latest HPE7-A06 Exam Cram: https://www.braindumpstudy.com/HPE7-A06_braindumps.html

Considered many of the candidates are too busy to review, our experts designed the Latest HPE7-A06 Exam Cram - HPE Campus Access Switching Expert Written Exam valid prep dumps in accord with actual examination questions, which would help you cope with the exam easily, HP Dumps HPE7-A06 Questions As is known to all, a person with effective learning method will be double the results with half efforts, The high quality of our Aruba Certified Professional - Campus Access HPE7-A06 latest practice pdf is obvious not only for their profession, but the accuracy.

Why Do Subscript Operators Usually Come in Pairs, To be honest, Interactive HPE7-A06 Practice Exam I don't think the book provides much more value to the reader than the essay does, Considered many of the candidates are too busy to review, our experts designed the HPE Campus Access Switching Expert Written Exam Interactive HPE7-A06 Practice Exam valid prep dumps in accord with actual examination questions, which would help you cope with the exam easily.

HP Dumps HPE7-A06 Questions: HPE Campus Access Switching Expert Written Exam - BraindumpStudy Sample Download Free

As is known to all, a person with effective learning method will be double the results with half efforts, The high quality of our Aruba Certified Professional - Campus Access HPE7-A06 latest practice pdf is obvious not only for their profession, but the accuracy.

Many candidates get nervous because they don't know what will happen in the final HPE Campus Access Switching Expert Written Exam HPE7-A06 exam, A+ certification signifies that the certified individual possesses the knowledge and skills essential for a successful entry-level HPE7-A06 (6 months experience) computer service technician, as defined by experts from companies across the industry.
