C-BCBTP-2502テストトレントは好評で、すべての献身で99%の合格率に達しました。多くの労働者がより高い自己改善を進めるための強力なツールとして、当社のC-BCBTP-2502認定トレーニングは、高度なパフォーマンスと人間中心のテクノロジーに対する情熱を追求し続けました。C-BCBTP-2502勉強のトレントを完全に理解するには、Webにアクセスするか、C-BCBTP-2502試験の質問のデモを無料でダウンロードして、C-BCBTP-2502トレーニングの質を試すためにWebJPNTestで提供します。ガイド。

## SAP C-BCBTP-2502 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"><li>• SAP Business SuiteによるCIO変革の実現：このセクションでは、ITトランスフォーメーション・マネージャーのスキルを評価し、CIO主導のデジタルトランスフォーメーションにおける価値提供におけるSAP Business Suiteの役割について解説します。エンタープライズITにおけるSAPポートフォリオの重要性を強調し、SAP BTPの機能を紹介するとともに、エンドツーエンドのプロセスや業界固有のユースケースとの連携方法を示します。受験者は、SAP BTPに含まれる主要製品を特定し、ポートフォリオを横断するコンポーネントがどのように統合されて測定可能な価値を実現するかを説明できる必要があります。</li></ul>
トピック 2	<ul style="list-style-type: none"><li>• SAP Business Technology Platformの理解：このセクションでは、SAPソリューションアーキテクトのスキルを評価し、SAP Business Suite 戦略全体における SAP Business Technology Platformの位置付けに焦点を当てます。変革の実現、企業戦略との整合性、デジタルイノベーションの支援におけるプラットフォームの役割を理解することが含まれます。受験者は、現代のビジネスプロセスにおけるSAP BTPの関連性と、他のSAP製品との統合方法を理解することが求められます。</li></ul>

C-BCBTP-2502テストサンプル問題、C-BCBTP-2502勉強ガイド

あなたの目標はとても高いですから、あなたに色々なヘルプをあげられる資料が必要です。JPNTest SAPのC-BCBTP-2502試験問題集はあなたが自分の目標を達成することを助けられます。JPNTest SAPのC-BCBTP-2502問題資料は高度に認証されたIT領域の専門家の経験と創造を含めているものです。当社の製品は、すべての可能性のある問題を試させられます。受験生の皆様に問題の100パーセント真実な解答を提供することを保証します。

## SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite 認定 C-BCBTP-2502 試験問題 (Q17-Q22):

### 質問 # 17

What is a competitive advantage of SAP BTP for businesses?

- A. Eliminates the need for AI-driven automation.
- B. Prevents integration with multi-cloud environments.
- C. Provides a unified platform for AI, analytics, and automation.
- D. Limits businesses to SAP ERP-only solutions.

正解: C

解説:

The primary competitive advantage of SAP BTP lies in its unified nature, bringing together AI, analytics, integration, and automation into a single cohesive platform. Many organizations struggle with "point solutions"-using one vendor for AI, another for database management, and a third for integration. This fragmentation creates technical debt and data silos. SAP BTP solves this by providing a consistent set of tools and a shared data model, which allows for faster innovation and a lower total cost of ownership.

By having these capabilities on a single platform, businesses can create "end-to-end" intelligent scenarios. For example, a company can use Integration Suite to pull data from a third-party CRM, SAP HANA Cloud to process that data in real-time, SAP AI Core to predict customer behavior, and SAP Build Process Automation to trigger a marketing campaign based on those predictions. This level of cross-functional orchestration is difficult to achieve with fragmented systems. Positioning SAP BTP as the "technological foundation" allows businesses to focus on business outcomes rather than managing infrastructure, giving them a significant edge in agility and speed-to-market compared to competitors using traditional, siloed architectures.

### 質問 # 18

Which SAP BTP service enables businesses to orchestrate and monitor enterprise-wide workflows?

- A. SAP Workflow Management
- B. SAP Business Network
- C. SAP Ariba
- D. SAP Conversational AI

正解: A

解説:

In the context of the Intelligent Enterprise, business processes often span multiple departments and different software systems. SAP Workflow Management (now largely integrated into the SAP Build Process Automation suite) is the specific BTP service designed to bridge these gaps. It allows organizations to digitize, manage, and operate business processes with high levels of transparency. The service provides a centralized platform to define process flows, set approval limits, and ensure that tasks are routed to the correct stakeholders in a timely manner.

The importance of this service lies in its ability to provide "live process visibility." Unlike traditional siloed workflows, SAP Workflow Management on BTP can pull data from various SAP Business Suite components-like Finance, Procurement, or HR-to create an end-to-end view of a business operation. This orchestration is critical for identifying bottlenecks and improving operational efficiency. While SAP Business Network and SAP Ariba facilitate external collaboration and procurement respectively, they do not provide the underlying technical framework for custom workflow orchestration across the entire enterprise landscape.

By utilizing BTP's workflow capabilities, companies can achieve a higher level of automation and governance, ensuring that business rules are consistently applied across all digital touchpoints, whether the underlying systems are cloud-based or on-premise.

### 質問 # 19

Which SAP BTP services support AI-driven automation? (Choose two).

- A. SAP Concur
- **B. SAP Business Process Intelligence**
- C. SAP Business Network
- **D. SAP AI Core**

正解: B、D

解説:

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models—from training to deployment— at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.

#### 質問 # 20

How does SAP BTP support hybrid cloud strategies?

- A. By eliminating the need for cloud-based analytics.
- B. By enforcing cloud-only solutions without on-premise support.
- C. By restricting enterprises to a single cloud vendor.
- **D. By allowing seamless integration between on-premise and cloud systems.**

正解: D

解説:

Most large enterprises do not operate solely in the cloud; they maintain a "hybrid" environment consisting of legacy on-premise systems (like SAP ERP 6.0) and modern cloud applications (like SAP S/4HANA Cloud).

SAP BTP supports hybrid cloud strategies by acting as the bridge between these two worlds. Through the SAP Connectivity Service and the Cloud Connector, BTP establishes a secure, encrypted tunnel that allows cloud-based services to access on-premise data and processes without requiring complex VPN setups or opening vulnerable firewall ports.

This capability is essential for businesses that are mid-transition in their digital transformation journey. It allows them to keep their core "system of record" on-premise for compliance or technical reasons while still taking advantage of cloud-native innovations on BTP, such as advanced analytics, AI, and mobile extensions.

By positioning BTP as a hybrid-ready platform, SAP ensures that customers can modernize at their own pace.

This "side-by-side" extensibility model ensures that the on-premise core remains clean and stable, while the cloud layer provides the agility needed to respond to market changes. This flexibility is a cornerstone of the SAP Business Suite's value proposition, offering a path to the cloud that respects the existing investments of the enterprise.

#### 質問 # 21

Which SAP BTP component provides a centralized hub for managing enterprise APIs?

- A. SAP Business Network
- B. SAP Ariba
- **C. SAP API Management**
- D. SAP SuccessFactors

正解: C

解説:

As businesses move toward a "composable" architecture, APIs (Application Programming Interfaces) become the essential links between different software components. SAP API Management, a core capability of the SAP Integration Suite on BTP, provides a centralized hub to design, publish, secure, and monitor these APIs.

In a complex SAP Business Suite environment, APIs might be exposed from S/4HANA, SuccessFactors, or even third-party non-

SAP systems. Without a centralized management tool, these connections become difficult to track, secure, and update. SAP API Management allows IT administrators to enforce consistent security policies (such as OAuth or rate-limiting) across all enterprise services, protecting sensitive data from unauthorized access. It also includes a "Developer Portal," which serves as a self-service catalog where developers can discover and test available APIs, significantly speeding up the development of new applications and integrations. By positioning API Management as a central pillar, SAP BTP enables "API-first" development, which is critical for digital transformation. This ensures that the enterprise is open and connectable, allowing for seamless communication between the digital core and the vast ecosystem of cloud services, mobile apps, and IoT devices.

## 質問 # 22

.....

すべての受験生はC-BCBTP-2502試験に順調に合格することを希望しますが、そんなに簡単ではありません。この試験を準備するあなたは心配する必要がありません。JPNTestの提供する問題集は受験生の試験への合格を保証することができます。我々の最新の問題集を利用して、気楽でC-BCBTP-2502試験に合格することができます。
