As to this fateful exam that can help you or break you in some circumstances, our company made these JN0-460 practice materials with accountability. We understand you can have more chances being accepted by other places and getting higher salary or acceptance. Our JN0-460 Training Materials are made by our responsible company which means you can gain many other benefits as well. You can enjoy free updates of JN0-460 practice guide for one year after you pay for our JN0-460 training questions.

The purchase procedure of our company's website is safe. The download, installation and using are safe and we guarantee to you that there are no virus in our product. We provide the best service and the best JN0-460 exam torrent to you and we guarantee that the quality of our product is good. Many people worry that the electronic JN0-460 Guide Torrent will boost virus and even some people use unprofessional anti-virus software which will misreport the virus. Please believe us because the service and the JN0-460 study materials are both good and that our product and website are absolutely safe without any virus.

2026 Updated JN0-460 – 100% Free Exam Format | JN0-460 Valid Test Forum

Windows computers support the desktop-based Juniper JN0-460 exam simulation software. These tests create scenarios that are similar to the actual JN0-460 examination. By sitting in these environments, you will be able to cope with exam anxiety. As a result, you will appear in the JN0-460 final test confidently.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 2	<ul style="list-style-type: none"> Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 3	<ul style="list-style-type: none"> Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 4	<ul style="list-style-type: none"> Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 5	<ul style="list-style-type: none"> Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q78-Q83):

NEW QUESTION # 78

What is the primary goal of Wired Assurance Management in a network environment?

- A. To minimize network security
- B. To maximize network downtime
- C. To optimize network performance and reliability**
- D. To increase manual configuration tasks

Answer: C

NEW QUESTION # 79

Which two statements are correct about deploying an EVPN-VXLAN fabric in a campus? (Choose two.)

- A. It simplifies Layer 2 network management.
- B. It is a Juniper Networks proprietary solution.
- C. It increases the scalability beyond traditional VLAN limitations.
- D. It increases physical bandwidth.

Answer: A,C

NEW QUESTION # 80

Which three administrator roles allow you to claim switches?(Choose three.)

- A. Observer
- B. Installer
- C. Super User
- D. Helpdesk
- E. Network Admin

Answer: B,C,E

Explanation:

In Juniper Mist Cloud, administrative roles define what actions a user can perform within an organization. The ability to claim and onboard switches is granted to roles that have configuration or deployment privileges.

"Only users with Super User, Network Admin, or Installer roles can claim, onboard, or delete devices such as access points, switches, or gateways within a Mist organization." Option A (Network Admin):Correct- can claim and manage network devices. Option B (Installer):Correct- role specifically intended for device onboarding and site setup.

Option C (Super User):Correct- full administrative privileges including device claiming.

Option D (Observer):Incorrect - view-only access.

Option E (Helpdesk):Incorrect - limited to troubleshooting functions, not device management.

NEW QUESTION # 81

Which three administrator roles allow you to claim switches?(Choose three.)

- A. Observer
- B. Installer
- C. Super User
- D. Helpdesk
- E. Network Admin

Answer: B,C,E

Explanation:

In Juniper Mist Cloud, administrative roles define what actions a user can perform within an organization.

The ability to claim and onboard switches is granted to roles that have configuration or deployment privileges.

"Only users with Super User, Network Admin, or Installer roles can claim, onboard, or delete devices such as access points, switches, or gateways within a Mist organization." Option A (Network Admin):Correct- can claim and manage network devices. Option B (Installer):Correct- role specifically intended for device onboarding and site setup.

Option C (Super User):Correct- full administrative privileges including device claiming.

Option D (Observer):Incorrect - view-only access.

Option E (Helpdesk):Incorrect - limited to troubleshooting functions, not device management.

NEW QUESTION # 82

From left to right, what is the correct hierarchical order of switch configuration priorities from least to most preferred?

- A. Site Configuration, Org-level template, Switch Settings
- **B. Org-level template, Site Configuration, Switch Settings**
- C. Site Configuration, Switch Settings, Org-level template
- D. Switch Setting, Site Configuration, Org-level template

Answer: B
