

Free PDF 2026 Peoplecert - ITIL-4-Practitioner-Deployment-Management Reliable Exam Answers

P.S. Free 2026 Peoplecert ITIL-4-Practitioner-Deployment-Management dumps are available on Google Drive shared by Actual4dump: <https://drive.google.com/open?id=1CGXXt2YNZXW73yiSkyGgzGK4bazJDG7>

Our company has been working on the preparation of ITIL-4-Practitioner-Deployment-Management study materials, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the ITIL-4-Practitioner-Deployment-Management Exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our ITIL-4-Practitioner-Deployment-Management study materials.

If you are determined to purchase our ITIL 4 Practitioner: Deployment Management ITIL-4-Practitioner-Deployment-Management valid exam collection materials for your companies, if you pursue long-term cooperation with site, we will have some relate policy. Firstly we provide one-year service warranty for every buyer who purchased Peoplecert ITIL-4-Practitioner-Deployment-Management valid exam collection materials.

>> ITIL-4-Practitioner-Deployment-Management Reliable Exam Answers <<

ITIL-4-Practitioner-Deployment-Management Reliable Exam Answers |
Valid Peoplecert ITIL-4-Practitioner-Deployment-Management: ITIL 4

Practitioner: Deployment Management

Our company deeply knows that product quality is very important, so we have been focusing on ensuring the development of a high quality of our ITIL-4-Practitioner-Deployment-Management test torrent. All customers who have purchased our products have left deep impression on our ITIL-4-Practitioner-Deployment-Management guide torrent. If you decide to buy our ITIL-4-Practitioner-Deployment-Management test torrent, we would like to offer you 24-hour online efficient service, you have the right to communicate with us without any worries at any time you need, and you will receive a reply, we are glad to answer your any question about our ITIL-4-Practitioner-Deployment-Management Guide Torrent. You have the right to communicate with us by online contacts or by an email.

Peoplecert ITIL 4 Practitioner: Deployment Management Sample Questions (Q21-Q26):

NEW QUESTION # 21

[Measure and Improve Deployment Management]

An organization has an objective to create and use deployment approaches that would fit the needs of the organization and the context. How should the organization assess if this objective is achieved?

- A. By looking at the deployment backlog throughput
- B. By measuring percentage of deployments which did not follow the agreed policies and models
- C. By analyzing the adherence to deployment schedules
- D. **By asking stakeholders about their satisfaction with deployment lead times**

Answer: D

Explanation:

ITIL 4 emphasizes stakeholder satisfaction as a key indicator of whether a practice meets organizational needs and context, as it reflects the value delivered to users and the business. Option B, asking stakeholders about their satisfaction with deployment lead times, directly assesses whether deployment approaches are effective and aligned with expectations, making it the best method to evaluate the objective.

Option A (By looking at the deployment backlog throughput): Incorrect, as throughput measures efficiency but does not directly indicate whether the deployment approach fits the organization's needs or context.

Option B (By asking stakeholders about their satisfaction with deployment lead times): Correct, as stakeholder feedback on lead times reflects whether deployments are timely and valuable, aligning with ITIL 4's focus on value co-creation.

Option C (By measuring the percentage of deployments which did not follow the agreed policies and models): Incorrect, as non-compliance indicates process issues but does not directly assess fit with organizational needs or stakeholder satisfaction.

Option D (By analyzing the adherence to deployment schedules): Incorrect, as schedule adherence measures operational performance, not whether the approach meets broader contextual needs.

NEW QUESTION # 22

[Integrate Deployment Management with Other Practices]

An organization's end users have complained that major software updates happen during work hours, with insufficient notice, and sometimes disrupt users' work for an unacceptably long time. The deployment manager already has close alignment with the release manager and release processes, and has implemented CI/CD. What is the BEST action for the organization to take to ensure new software features are relevant to the end-users?

- A. Embed validation and testing within the deployment models
- B. Use infrastructure as code to support the software deployment
- C. **Align with the change enablement manager to improve the change planning procedures**
- D. Integrate deployment management and configuration management activities to improve version control

Answer: C

Explanation:

The issue involves poor timing, lack of notice, and disruptions from deployments, which points to deficiencies in change planning and communication. ITIL 4 emphasizes aligning deployment with change enablement to ensure changes are scheduled and communicated effectively, addressing user concerns. Option C, aligning with the change enablement manager to improve change planning procedures, directly tackles these issues by ensuring deployments are timed appropriately, users are informed, and disruptions are minimized, while also ensuring feature relevance through better planning.

Option A (Use infrastructure as code to support the software deployment): Incorrect, as IaC improves environment consistency but does not address scheduling, notice, or user relevance issues.

Option B (Embed validation and testing within the deployment models): Incorrect, as while testing improves quality, it does not resolve timing or communication problems affecting users.

Option C (Align with the change enablement manager to improve the change planning procedures): Correct, as change enablement ensures deployments are planned with user needs in mind, including timing, communication, and relevance of features.

Option D (Integrate deployment management and configuration management activities to improve version control): Incorrect, as version control enhances deployment accuracy but does not address user complaints about timing or disruption.

NEW QUESTION # 23

[Apply Deployment Management Processes]

What should the organization keep in mind when planning improvements to deployment models?

- A. The same deployment approach should be used for deployments of similar size
- B. User resistance to updates is not a relevant factor to consider when designing deployment models
- C. The impact of deployed software should not be considered when designing these models
- D. Deployment model updates should consider inefficient processes

Answer: D

Explanation:

ITIL 4 emphasizes continual improvement in deployment management, which includes identifying and addressing inefficiencies in deployment models to enhance performance, reliability, and value delivery. Option D directly aligns with this principle by focusing on streamlining inefficient processes during model updates.

Option A (The impact of deployed software should not be considered when designing these models): Incorrect, as ITIL 4 stresses that the impact of deployments on services, users, and the organization is a critical consideration to ensure value and minimize disruption.

Option B (User resistance to updates is not a relevant factor to consider when designing deployment models): Incorrect, as user experience and acceptance are key factors in ITIL 4's value co-creation model, and resistance must be addressed to ensure successful deployments.

Option C (The same deployment approach should be used for deployments of similar size): Incorrect, as ITIL 4 advocates for context-specific deployment models tailored to the unique needs of each service or environment, not a one-size-fits-all approach.

Option D (Deployment model updates should consider inefficient processes): Correct, as improving deployment models involves analyzing current processes, identifying bottlenecks or waste, and optimizing workflows to deliver greater value.

NEW QUESTION # 24

[Apply Deployment Management Processes]

What key output of the 'deployment model development and improvement' process can be used to trigger implementation of a newly updated deployment model?

- A. Lessons learned
- B. Updated knowledge management articles
- C. Change request
- D. Deployment review reports

Answer: C

Explanation:

In ITIL 4, the deployment model development and improvement process involves creating or refining models to enhance deployment effectiveness. Implementing a newly updated deployment model typically requires formal authorization and coordination, which is achieved through a change request (Option B). A change request initiates the process to assess, approve, and execute the model update in a controlled manner, ensuring alignment with organizational governance and other practices like change enablement.

Option A (Lessons learned): Incorrect, as lessons learned are an output for improving future processes, not a trigger for implementing a new model.

Option B (Change request): Correct, as a change request is the formal mechanism to propose and implement a new or updated deployment model, per ITIL 4's integration with change enablement.

Option C (Updated knowledge management articles): Incorrect, as knowledge articles support documentation and training but do not trigger implementation.

Option D (Deployment review reports): Incorrect, as review reports provide insights or feedback, not the authorization needed to

implement a model.

NEW QUESTION # 25

[Understand Roles and Responsibilities]

A fast-growing service provider is introducing separate roles of deployment manager and deployment practitioner. Which TWO activities is a deployment manager responsible for?

Ensuring that deployment records are up-to-date and correct

Prioritizing multiple deployments that require use of the same resources
Ensuring deployment plans support other service management plans
Capturing and verifying users' opinions on deployments

- A. 1 and 2
- B. 3 and 4
- **C. 2 and 3**
- D. 1 and 4

Answer: C

Explanation:

In ITIL 4, the deployment manager role focuses on strategic and coordinating activities, such as overseeing resource allocation and aligning deployment plans with broader service management objectives. The correct activities are:

Activity 2 (Prioritizing multiple deployments that require use of the same resources): A deployment manager ensures efficient resource use by prioritizing conflicting deployments, a key managerial responsibility.

Activity 3 (Ensuring deployment plans support other service management plans): The deployment manager aligns deployment activities with other practices (e.g., change enablement, release management) to ensure coherence across service management, another strategic task.

Activity 1 (Ensuring that deployment records are up-to-date and correct): This is typically a task for a deployment practitioner, who handles operational details like record-keeping, not a manager's core responsibility.

Activity 4 (Capturing and verifying users' opinions on deployments): This aligns more with practices like relationship management or service desk activities, not the deployment manager's role, which focuses on planning and execution rather than user feedback collection.

NEW QUESTION # 26

.....

We have professional technicians examine the website every day, therefore if you buy ITIL-4-Practitioner-Deployment-Management exam cram from us, you can enjoy a clean and safe online shopping environment. What's more, we offer you free demo to have a try before buying ITIL-4-Practitioner-Deployment-Management exam torrent, you can know what the complete version is like through free demo. ITIL-4-Practitioner-Deployment-Management Exam Materials cover most of knowledge points for the exam, and you can improve your ability in the process of learning as well as pass the exam successfully if you choose us. We offer you free update for 365 days for ITIL-4-Practitioner-Deployment-Management exam materials after purchasing.

ITIL-4-Practitioner-Deployment-Management Latest Exam Camp: <https://www.actual4dump.com/Peoplecert/ITIL-4-Practitioner-Deployment-Management-actualtests-dumps.html>

They can avoid spending unnecessary money and choose the most useful and efficient ITIL-4-Practitioner-Deployment-Management exam practice question. The clients at home and abroad strive to buy our ITIL-4-Practitioner-Deployment-Management test materials because they think our products are the best study materials which are designed for preparing the test ITIL-4-Practitioner-Deployment-Management certification. Moreover, the ITIL 4 Practitioner: Deployment Management exam information you will provide for downloading ITIL-4-Practitioner-Deployment-Management exam products will remain safe and secure, and it won't be used for any purposes.

We are hoping your participate, You are checking a system that ITIL-4-Practitioner-Deployment-Management has failed when you discover that it failed because one of the power supply wires running to the system board was damaged.

They can avoid spending unnecessary money and choose the most useful and efficient ITIL-4-Practitioner-Deployment-Management exam practice question. The clients at home and abroad strive to buy our ITIL-4-Practitioner-Deployment-Management test materials because they think our products are the best study materials which are designed for preparing the test ITIL-4-Practitioner-Deployment-Management Certification.

100% Pass Quiz Peoplecert - ITIL-4-Practitioner-Deployment-Management - Useful ITIL 4 Practitioner: Deployment Management Reliable Exam Answers

Moreover, the ITIL 4 Practitioner: Deployment Management exam information you will provide for downloading ITIL-4-Practitioner-Deployment-Management exam products will remain safe and secure, and it won't be used for any purposes.

You can download them and have a trial experience and then it is easy for you to choose which one is the best suitable Peoplecert ITIL-4-Practitioner-Deployment-Management practice dumps to you.

All of the questions we listed in our ITIL-4-Practitioner-Deployment-Management practice exam materials are the key points for the IT exam, and there is no doubt that you can practice all of ITIL-4-Practitioner-Deployment-Management best questions within 20 to 30 hours, even though the time Positive ITIL-4-Practitioner-Deployment-Management Feedback you spend on it is very short, however the contents you have practiced are the quintessence for the IT exam.
