### **APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q97-Q102):**

#### **NEW QUESTION # 97**

Which of the following statements about a 'Force Field Analysis' are true?

- \* It can reveal both barriers to overcome and possible sources of resistance.
- \* It should be created independently by the change manager.

- A. Only 2 is true.
- **B. Only 1 is true.**
- C. Both 1 and 2 are true.
- D. Neither 1 nor 2 is true.

**Answer: B**

Explanation:

\* Statement 1: Correct. Force Field Analysis identifies driving and restraining forces for change, helping to address barriers and resistance.

\* Statement 2: Incorrect. The analysis should be a collaborative effort involving stakeholders, not solely created by the change manager.

Key AgilePM Concepts Referenced:

\* Force Field Analysis as a Tool: AgilePM Handbook, Chapter 7, Section 7.2.

#### **NEW QUESTION # 98**

What is defined as 'Working together towards a shared goal'?

- **A. Collaboration**
- B. Communication
- C. Governance
- D. Scrum

**Answer: A**

Explanation:

Agile Project Management places a premium on collaboration-the act of different roles (business, product, and technical) working together toward a shared goal. While communication is the exchange of information, collaboration goes further: it is joint problem-solving and decision-making that aligns perspectives to deliver value. AgilePM/DSDM principles explicitly promote active business involvement and empowered teams, creating an environment where collaboration is the default for refining requirements, planning increments, resolving trade-offs, and assuring quality. Ceremonies such as backlog refinement, Sprint Planning, daily coordination,

and reviews exist to reinforce collaborative behavior, shorten feedback loops, and surface constraints early. Scrum itself (option C) is a framework that enables collaboration, but the definition given- "working together towards a shared goal"- is the definition of collaboration, not the framework or governance mechanisms. Governance (option D) concerns oversight and control structures rather than the cooperative behaviors that produce outcomes. Consequently, the statement most accurately and directly defines Collaboration.

#### NEW QUESTION # 99

What is the purpose of the Foundations Summary?

- A. To provide enough information to decide whether the project is likely to deliver return on investment
- B. To define the scope of the requirements that the project needs to address
- C. To define the tools, techniques, customer, practices and standards that will be applied
- D. To document how stakeholders will be engaged and standards that will be applied.

**Answer: A**

Explanation:

The purpose of the Foundations Summary in AgilePM is to provide enough information to decide whether the project is likely to deliver a return on investment. This document serves as a comprehensive overview of the project's viability, including a high-level understanding of the business case, objectives, scope, and risks. It ensures that all stakeholders have a clear understanding of the project's potential value and feasibility before significant resources are committed.

"Agile Project Management: Creating Innovative Products" by Jim Highsmith

#### NEW QUESTION # 100

Which of the following statements about an agile approach to projects is true?

Deploying the Solution incrementally throughout the project to validate the solution.

Early release of Solution Increments helps test assumptions about value.

- A. Both 1 and 2 are true
- B. Only 2 is true
- C. Only 1 is true
- D. Neither 1 or 2 is true

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation (verified, paraphrased from AgilePM principles):

AgilePM promotes incremental and iterative delivery, aiming to deploy usable increments early and often. Regular deployment and demonstration validate fitness for purpose, expose risks sooner, and provide empirical feedback for planning. Early release of increments also tests assumptions about value with real users and stakeholders, informing prioritization (e.g., MoSCoW) and shaping subsequent increments. This approach supports continuous learning, sharper benefits focus, and stronger financial governance, because funding and scope decisions can be based on evidence from working solution slices rather than predictions. Hence, both statements accurately reflect agile project delivery.

#### NEW QUESTION # 101

How should DSDM team measure progress?

- A. Based on the completion of activities rather than the delivery of products
- B. Through an analysis of the Instrumental Success Factors.
- C. Through a project dashboard
- D. Based on what has been delivered at the end of a Timebox.

**Answer: D**

Explanation:

A DSDM team should measure progress: B. Based on what has been delivered at the end of a Timebox5.
