

# Exam EXIN CDCP Simulator Fee, New CDCP Exam Topics

P.S. Free 2025 EXIN CDCP dumps are available on Google Drive shared by Itcertkey: [https://drive.google.com/open?id=1Dnmp7GKT5w9Jis-hpJNgVbH\\_sniDeIAv](https://drive.google.com/open?id=1Dnmp7GKT5w9Jis-hpJNgVbH_sniDeIAv)

The test software used in our products is a perfect match for Windows' CDCP learning material, which enables you to enjoy the best learning style on your computer. Our CDCP certification guide also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our CDCP learning material is that when the user finishes the exercise, he can get feedback in the fastest time. So, users can flexibly adjust their learning plans according to their learning schedule. We hope that our new design of EPI Data Centre test questions will make the user's learning more interesting and colorful.

## EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Water Supply: This topic is all about water supply techniques and application areas.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).</li></ul>
Topic 6	<ul style="list-style-type: none"><li>• Fire Safety</li><li>• Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>• Raised Floor</li><li>• Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.</li></ul>

## New CDCP Exam Topics, Free CDCP Braindumps

Improve Your Profession With CDCP Questions. Certified Data Centre Professional (CDCP) Questions – Best Strategy for Instant Preparation. To achieve these career objectives, you must pass the Certified Data Centre Professional (CDCP) examination. Are you ready to prepare for the challenging CDCPtest? Are you looking for the best EXIN Exam practice material? If your answer is yes, then you should rely on Itcertkey and get CDCP Real Exam Questions. Download these actual CDCP Exam Dumps and start your journey.

### EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q71-Q76):

#### NEW QUESTION # 71

What is a requirement of an FM200 (HFC-227) installation?

- A. Install the gas containers (tanks) close to the data centre.
- **B. It is a high-pressure gas; therefore nozzles must be mounted with two brackets.**
- C. Drainage system under the raised floor.
- D. Install pre-action sprinklers in the same room as the FM200.

**Answer: B**

Explanation:

FM200 (HFC-227) is a clean agent fire suppression system that uses a high-pressure gas to extinguish fires by reducing the oxygen concentration and absorbing the heat. FM200 is stored in cylinders at pressures of up to 42 bar (600 psi) and is released through nozzles into the protected area. Because of the high pressure, the nozzles must be mounted with two brackets to prevent them from moving or breaking during discharge. The brackets must be securely attached to the ceiling or wall and aligned with the nozzle outlet. The nozzle outlet must also be free of any obstructions that could affect the discharge pattern or distribution.

#### NEW QUESTION # 72

Which one of the following is the last stage in Stages of Combustion?

- A. Visible Smoke
- **B. Flaming Fire**
- C. Intense Heat
- D. Incipient

**Answer: B**

Explanation:

The last stage in stages of combustion is flaming fire, which occurs when the fuel vapors and oxygen are mixed in the right proportion and ignited by a flame or a spark. Flaming fire is characterized by visible flames, intense heat, and rapid oxidation. Flaming fire can cause severe damage to the data center equipment, personnel, and business continuity. Therefore, it is important to prevent or suppress flaming fire as soon as possible using appropriate fire detection and suppression systems.

#### NEW QUESTION # 73

What needs to be installed in the battery room when using Lithium-ion batteries?

- A. A proper ventilation system since Lithium-ion batteries produce highly flammable Hydrogen gas during charging.
- B. A proper supply of distilled water.
- C. High capacity air-conditioning equipment since Lithium-ion batteries are sensitive to high temperatures, which can reduce their lifetime.
- **D. A battery management system to monitor and prevent unsafe temperatures during charging/discharging.**

**Answer: D**

Explanation:

According to the EPI Data Centre Training Framework, lithium-ion batteries are becoming more popular in data centres due to their higher energy density, longer lifespan, and lower maintenance costs compared to lead-acid batteries<sup>1</sup>. However, lithium-ion batteries also have some drawbacks, such as higher initial cost, stricter safety requirements, and potential thermal runaway risks<sup>1</sup>. Therefore, a battery management system (BMS) is essential to monitor and control the voltage, current, temperature, and state of charge of each battery cell or module, and to prevent overcharging, over-discharging, or overheating<sup>2,3</sup>. A BMS can also communicate with the UPS system and provide information on the battery status, performance, and health<sup>2</sup>.

#### NEW QUESTION # 74

Which formula can be used to define risk?

- A. Risk = Time \* Quality
- B. Risk = Probability \* Cost
- **C. Risk = Impact \* Probability**
- D. Risk = Security \* Criminality

**Answer: C**

Explanation:

According to the CDCP Preparation Guide<sup>1</sup>, risk can be defined as the product of impact and probability.

Impact is the measure of the negative consequences or losses that may result from a risk event, such as downtime, data loss, or damage to the data centre. Probability is the measure of the likelihood or frequency of a risk event occurring, based on historical data, expert judgment, or statistical analysis. By multiplying impact and probability, risk can be quantified and compared, which helps in prioritizing and mitigating the risks. For example, a risk event that has a high impact but a low probability may have the same risk level as a risk event that has a low impact but a high probability.

#### NEW QUESTION # 75

Which Class of Fires involves ordinary combustible materials such as paper, wood and cloth?

- **A. Class A**
- B. Class D
- C. Class K
- D. Class B

**Answer: A**

Explanation:

According to the CDCP Preparation Guide, Class A fires involve ordinary combustible materials such as paper, wood and cloth.

These materials leave behind ash or embers when they burn. Class A fires can be extinguished by water or other cooling agents that reduce the temperature of the fuel below its ignition point.
