NEW QUESTION # 26

Zephyrus Relocation Services (ZRS) plans to build a portal for its partners. The portal needs to show company information and brand details on the Account Management page.

Which templates should ZRS consider to build the portal?

Choose 2 answers

- A. Build Your Own
- B. Help Center
- C. Customer service
- D. Partner Central

Answer: A,D

Explanation:

Partner Central and Build Your Own are two templates that ZRS can consider to build the portal for its partners. Partner Central is a template that is designed for managing partner relationships, such as recruiting, onboarding, training, and co-selling. Build Your Own is a template that allows you to create a custom site using Lightning Web Components and other web standards.

NEW QUESTION # 27

Ursa Major Solar would like to expose the custom object SolarPanels to its customer portal. This particular object contains 150 fields, and a majority of the fields are technical codes and internal information.

How should the administrator limit the fields available in the customer portal?

- A. Utilize the Developer Console with coding to hide unwanted fields.
- B. Use Field-Level Security to remove access to the unwanted fields.
- C. Utilize CSS overrides to hide unwanted fields.
- D. Create a page variation for the customer portal to hide unwanted fields.

Answer: B

Explanation:

To limit the fields available in the customer portal, the administrator should use Field-Level Security to remove access to the unwanted fields. Field-Level Security is a feature that allows the administrator to control the visibility and editability of fields for different profiles and permission sets. The administrator can use Field-Level Security to hide or make read-only the technical codes and internal information fields for the customer portal profile or permission set.

NEW QUESTION # 28

The system administrator at Dreamhouse Realty (DR) is giving Experience Builder access to two colleagues who will be responsible for creating and managing new microsites. One contributor needs to create and customize the site, but not publish it. The other colleague is tasked with adding contributors and publishing the final site.

Which Experience Builder roles should the system administrator grant?

- A. Publisher and Builder
- B. Builder and Experience Admin
- C. Experience Admin and Publisher
- D. Viewer and Publisher

Answer: A

Explanation:

To grant Experience Builder access to two colleagues who will be responsible for creating and managing new microsites, the system administrator should grant Publisher and Builder roles. Publisher and Builder are two Experience Builder roles that define what users can do on the site. Publisher is a role that allows users to add contributors, publish changes, and activate or deactivate sites. Builder is a role that allows users to create and customize sites, but not publish them.
