

Pass Guaranteed Quiz Microsoft - AZ-800 - Administering Windows Server Hybrid Core Infrastructure Fantastic Online Test

BONUS!!! Download part of ExamPrepAway AZ-800 dumps for free: https://drive.google.com/open?id=1BQzVBFof46PIH__tRVUn_cgXlcnkv

Features of our web-based certification for Administering Windows Server Hybrid Core Infrastructure (AZ-800) practice test and the desktop simulation software for Microsoft AZ-800 exam questions are similar. The web-based AZ-800 practice test is supported by operating systems. It is an internet-based self-assessment test, eliminating the need for any software installation. The web-based Microsoft AZ-800 Practice Exam is compatible with major browsers. Get a demo of our products, it's free to use. Upon completing the purchase, you will be able to immediately download the full version of our ExamPrepAway Administering Windows Server Hybrid Core Infrastructure (AZ-800) practice questions product.

Microsoft AZ-800 exam is an essential certification for IT professionals who want to demonstrate their skills in administering Windows Server hybrid core infrastructure. AZ-800 exam is designed to test the candidate's knowledge and expertise in implementing and managing hybrid infrastructure solutions using Windows Server technologies. Passing AZ-800 Exam validates that the candidate has the skills necessary to manage and deploy Windows Server workloads on-premise and in the cloud.

2026 Online AZ-800 Test | High Hit-Rate Administering Windows Server Hybrid Core Infrastructure 100% Free High Passing Score

Administering Windows Server Hybrid Core Infrastructure (AZ-800) dumps PDF version is printable and embedded with valid Microsoft AZ-800 questions to help you get ready for the Administering Windows Server Hybrid Core Infrastructure (AZ-800) exam quickly. Administering Windows Server Hybrid Core Infrastructure (AZ-800) exam dumps pdf are also usable on several smart devices. You can use it anywhere at any time on your smartphones and tablets. We update our Microsoft AZ-800 Exam Questions bank regularly to match the changes and improve the quality of AZ-800 Questions so you can get a better experience.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q153-Q158):

NEW QUESTION # 153

You have on-premises servers that run Windows Server as shown in the following table.

You have an Azure file share named share1 that stores two files named File2.docx and File3.docx.

You create an Azure File Sync sync group that includes the following endpoints:

share

D:\Folder1 on Server1

D:\Data1 on Server2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/storage/file-sync/file-sync-introduction>

NEW QUESTION # 154

You have servers that have the DNS Server role installed. The servers are configured as shown in the following table.

All the client computers in the New York office use Server2 as the DNS server.

You need to configure name resolution in the New York office to meet the following requirements:

- * Ensure that the client computers in New York can resolve names from contoso.com.
- * Ensure that Server2 forwards all DNS queries for internet hosts to 131.107.100.200.

The solution must NOT require modifications to Server1.

Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a conditional forwarder
- B. a reverse lookup zone
- C. a secondary zone
- D. a delegation
- E. a forwarder

Answer: A,E

Explanation:

A conditional forwarder is required for contoso.com.

A forwarder is required for all other domains.

When you have a conditional forwarder and a forwarder configured, the conditional forwarder will be used for the specified domain.

You could use a secondary zone for contoso.com but that would require a configuration change on Server1.

NEW QUESTION # 155

You have an Azure subscription that contains the following resources:

- * An Azure Log Analytics workspace
- * An Azure Automation account
- * Azure Arc.

You have an on-premises server named Server1 that is onboarded to Azure Arc. You need to manage Microsoft updates on Server1 by using Azure Arc. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Virtual machines data source of the Log Analytics workspace, connect Server1.
- B. On Server1, install the Azure Monitor agent
- C. Add Microsoft Sentinel to the Log Analytics workspace
- D. From the Automation account, enable Update Management for Server1.

Answer: B,D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/cloud-adoption-framework/manage/hybrid/server/best-practices/arc-update-management>

NEW QUESTION # 156

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are planning the deployment of DNS to a new network.

You have three internal DNS servers as shown in the following table.

The contoso.local zone contains zone delegations for east.contoso.local and west.contoso.local. All the DNS servers use root hints.

You need to ensure that all the DNS servers can resolve the names of all the internal namespaces and internet hosts.

Solution: On Server2 and Server3, you configure a conditional forwarder for contoso.local.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-r2-and-2008/cc794735\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-r2-and-2008/cc794735(v=ws.10))

NEW QUESTION # 157

You have two servers that have the Hyper-V server role installed. The servers are joined to a failover cluster both servers can connect to the same disk on an iSCSI storage device. You plan to use the iSCSI storage to store highly available Hyper-V virtual machines that will support live migration functionality. You need to configure a storage resource in the failover cluster to store the virtual machines.

What should you configure?

- A. attributed File System (DFS) Replication
- B. a storage pool
- C. Cluster Shared volumes (CSV)
- D. a mirrored volume

Answer: C

Explanation:

The Failover Clustering content in AZ-800 explains that Cluster Shared Volumes (CSV) allow multiple cluster nodes to simultaneously access the same NTFS/ReFS volume, making them the standard storage layout for highly available Hyper-V virtual machines and enabling features like Live Migration and Quick Migration. CSVs present a consistent namespace across nodes (e.g., C:\ClusterStorage\VolumeX) and are specifically recommended for storing VHDX files and configuration data for clustered VMs. By contrast, DFS Replication is not supported for virtual machine storage due to file-locking and consistency constraints; storage pools pertain to Storage Spaces, not an iSCSI LUN already presented to both hosts; and a mirrored volume on a single node does not provide cluster-wide, concurrent access. The guidance is explicit that when using a shared LUN (such as iSCSI) for clustered Hyper-V workloads, you should add the disk to the cluster, enable CSV, and place VMs on the CSV to support continuous availability and Live Migration without downtime. Thus, the correct storage resource is Cluster Shared Volumes (CSV).

NEW QUESTION # 158

.....

I just want to share with you that here is a valid AZ-800 exam cram file with 100% pass rate and amazing customer service. If you are not sure about your exam, choosing our AZ-800 exam cram file will be a good choice for candidates. We sell products by word of mouth. We are famous for our high pass-rate AZ-800 Exam Cram. If you try to use our study materials one time, you will know how easy to pass exam with our AZ-800 exam cram file. Our business policy is "products win by quality, service win by satisfaction".
