## MB-700 Test Dumps Pdf | MB-700 Passguide

Actual4Dumps's experts have simplified the complex concepts and have added examples, simulations and graphs to explain whatever could be difficult for you to understand. Therefore even the average exam candidates can grasp all study questions without

any difficulty. Additionally, the MB-700 Exam takers can benefit themselves by using our testing engine and get numerous real exam like practice questions and answers. They will help them revising the entire syllabus within no time.

## Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q233-Q238):

### NEW QUESTION # 233

A company plans to implement Dynamics 365 Supply Chain Management.

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

#### Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

### NEW QUESTION # 234

A company plans to build Power Apps apps as part of their digital transformation strategy.

App makers require access to individual environments to learn how to build apps through the Community Plan. Tenant users require access to an environment in which they can test apps as well as have database backup and restore capabilities.

You need to recommend appropriate environments for the company.

What should you recommend? To answer, drag the appropriate environments to the correct requirements. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation

Box 1: Developer

Developer

Developer environments are created by users who have the Developer Plan license. They're special environments intended only for use by the owner. Provisioning developer environments can be restricted to admins (see Block trial licenses commands). The developer environment will be available as long as you actively use the Power Apps Developer Plan.

Box 2: Sandbox

These are non-production environments, which offer features like copy and reset. Sandbox environments are used for development and testing, separate from production. Provisioning sandbox environments can be restricted to admins (because production environment creation can be blocked), but converting from a production to a sandbox environment can't be blocked.

### NEW QUESTION # 235

You need to design the data import strategy for integration 1.

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Answer:

Explanation:

Explanation:

### NEW QUESTION # 236

A company implements Dynamics 365 finance and operations apps for its retail operations.

Unauthorized vendor checks have been created in the past resulting in check fraud.

The company must print a vendor aging report from a local printer in its headquarters location every week on Sunday night.

Every week on Monday, the comptroller must review the report and approve checks to issue to vendors.

You need to recommend a solution to meet the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Positive Pay

Positive Pay within Dynamics AX is one of the easiest systems to put into place to help prevent check fraud and protect your business. Positive Pay generates an electronic file that you can submit to your bank with a list of your approved checks, reducing the chance of processing any fraudulent checks.

Box 2: Electronic reporting

Electronic reporting (ER) is a configurable tool that helps you create and maintain regulatory electronic reporting and payments.

You can use ER to configure formats for both incoming and outgoing electronic documents in accordance with the legal requirements of various countries and regions. ER lets you manage these formats during their lifecycle. For example, you can adopt new regulatory requirements and generate business documents in the required format to electronically exchange information with government bodies, banks, and other parties.

The ER engine is targeted at business users instead of developers. Because you configure formats instead of code, the processes for creating and adjusting formats for electronic documents are faster and easier.

## NEW QUESTION # 237

A company plans to implement Dynamics 365 Supply Chain Management and Dynamics 365 Customer Service.

The company has two call centers. The company owns one call center, and the other is a third-party call center. All call center orders flow through to one distribution center for shipping.

The third-party call center will not be moving to Dynamics 365 Customer Service.

The distribution center ships incorrect item quantities to customers as a result of the following scenarios:

\* The company-owned call center places orders in which the unit of measure conversion logic does not convert properly from case to each.

\* The third-party call center uses an on-premises solution that frequently has network outages and cannot handle bidirectional asynchronous operations.

Call center data must flow through Microsoft Dataverse.

You must recommend an integration pattern for the Microsoft Dynamics 365 implementation for each call center solution.

Which integration patterns should you recommend? To answer, drag the appropriate integration patterns to the correct requirements.

Each integration pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:
