1Z0-182 High Quality & Exam 1Z0-182 Materials

In order to help these people who have bought the 1Z0-182 study materials of our company, There is a team of expert in our company, which is responsible to renovate and update the 1Z0-182 study materials provided by our company. We are going to promise that we will have a lasting and sustainable cooperation with customers who want to buy the 1Z0-182 Study Materials from our company. If you decide to buy our 1Z0-182 study materials, you will never miss any important information. In addition, we can promise the updating system is free for you.

Oracle Database 23ai Administration Associate Sample Questions (Q20-Q25):

NEW QUESTION # 20

In which two ways would you disable timing information collected for wait events and much of the performance monitoring capability of the database?

- A. By executing the PL/SQL procedure `DBMS_TIME_STATISTIC.LEVEL(BASIC)`.
- B. By setting the `STATISTICS_LEVEL` parameter to `BASIC`.
- C. By executing the PL/SQL procedure `DBMS_TIME_STATISTIC.DISABLE(TRUE)`.
- D. By setting the `TIMED_STATISTICS_LEVEL` system parameter to `FALSE`.
- E. By setting the `TIMED_STATISTICS` system parameter to `FALSE`.

Answer: B,E

Explanation:

A .True. `TIMED_STATISTICS = FALSE` disables timing data collection.

- B .False. No such procedure exists.
- C .False. No TIMED_STATISTICS_LEVEL parameter exists.
- D .True. STATISTICS_LEVEL = BASIC disables most performance monitoring.
- E .False. No such procedure exists.

NEW QUESTION # 21

Which two actions can you perform using DBCA for an existing database?

- A. Create a template that can be used to clone the database.
- B. Create an additional listener.
- C. Create nonstandard block size tablespaces.
- D. Change the character set.
- E. Change the server mode from dedicated to shared, and vice versa.

Answer: A,E

Explanation:

- A .False. DBCA can't change character sets post-creation.
- B .False. Listeners are managed via NetCA or lsnrctl.
- C .True. DBCA can switch server modes for existing DBs.
- D .False. Tablespaces are created via SQL, not DBCA for existing DBs.
- E .True. DBCA can generate clone templates from existing DBs.

NEW QUESTION # 22

Which three statements are true about roles?

- A. Object privileges may not be granted to roles.
- B. The SET ROLE statement can disable one or more roles for a session.
- C. The SET ROLE statement can enable one or more roles for a session.
- D. All roles granted to a user are set on default when the user logs in.
- E. Roles may be granted to other roles.
- F. Roles must be password protected.

Answer: B,C,E

Explanation:

Roles in Oracle manage privileges efficiently. Let's dive into each option:

A . Roles must be password protected.

False. Roles can be password-protected (e.g., CREATE ROLE mgr IDENTIFIED BY secret), but it's optional. Non-protected roles (default) are enabled automatically if granted, requiring no password.

Mechanics:Password-protected roles need SET ROLE mgr IDENTIFIED BY secret, enhancing security for sensitive privileges.

B . Roles may be granted to other roles.

True. Roles can form hierarchies (e.g., GRANT clerk TO mgr), allowing nested privilege management.

Mechanics:A user with mgr inherits clerk privileges indirectly. Revoking clerk from mgr cascades appropriately.

Practical Use:Simplifies complex privilege structures in large organizations.

C . The SET ROLE statement can enable one or more roles for a session.

True. SET ROLE role1, role2; activates specified roles for the session, assuming they're granted and not password-protected (or password is provided).

Mechanics:Enabled roles grant their privileges immediately within the session scope.

D . Object privileges may not be granted to roles.

False. Object privileges (e.g., GRANT SELECT ON emp TO clerk) are a primary use of roles, making this statement incorrect.

Why Incorrect:Roles are designed for this purpose, contradicting the option.

E . All roles granted to a user are set on default when the user logs in.

False. Only roles marked as DEFAULT ROLE (via ALTER USER ... DEFAULT ROLE role1) are enabled at login. Non-default roles require SET ROLE.

Mechanics:Check via SELECT * FROM DBA_ROLE_PRIVS WHERE DEFAULT_ROLE='YES'.

F . The SET ROLE statement can disable one or more roles for a session.

True. SET ROLE NONE disables all roles, or SET ROLE role1 implicitly disables others not listed, providing granular control.

Practical Use:Useful for testing or restricting privileges temporarily.

NEW QUESTION # 23

Which three statements are true about Deferred Segment Creation in Oracle databases?

- A. Indexes inherit the DEFERRED or IMMEDIATE segment creation attribute from their parent table.
- B. It is supported for Index Organized Tables (IOTs) contained in locally managed tablespaces.
- C. Sessions may dynamically switch back and forth from DEFERRED to IMMEDIATE segment creation.
- D. It is supported for SYS-owned tables contained in locally managed tablespaces.
- E. It is the default behavior for tables and indexes.

Answer: A,C,E

Explanation:

- A .False. IOTs require immediate segment creation.
- B .False. SYS-owned tables don't use deferred creation.
- C .True. Default since 11gR2, continued in 23ai.
- D .True. Indexes inherit this attribute unless overridden.
- E .True. Sessions can alter this via DEFERRED_SEGMENT_CREATION.

NEW QUESTION # 24

Which two statements are true about the Automatic Diagnostic Repository (ADR)?

- A. It supports diagnostics for Automatic Storage Management (ASM).
- B. The ADR base defaults to \$ORACLE_HOME/dbs if the DIAGNOSTIC_DEST parameter and the ORACLE_BASE environment variable are not set.
- C. It supports diagnostics for Oracle Clusterware.
- D. The ADR base defaults to \$ORACLE_HOME/rdbms/admin if neither DIAGNOSTIC_DEST nor ORACLE_BASE is set.
- E. It is held inside an Oracle database schema.

Answer: A,C

Explanation:

- A .False. ADR is file-based, not in a schema.
- B .False. No such default exists.
- C .True. ADR logs ASM diagnostics.
- D .True. Supports Clusterware diagnostics.
- E .False. Defaults to \$ORACLE_BASE or /u01/app/oracle if unset.

NEW QUESTION # 25

.....

According to different kinds of questionnaires based on study condition among different age groups, our 1Z0-182 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for Oracle Database 23ai Administration Associate 1Z0-182 Exams, thus inspiring them obtain the targeted Oracle 1Z0-182 certificate successfully.
