This age changes quickly, so we can't be passively, we should be actively to follow the age. When you choose to participate in FCSS_EFW_AD-7.6 exam, you are proved to be an active person who wants better development opportunities for yourself. Our ExamcollectionPass is willing to help those active people like you to achieve their goals. The most comprehensive and Latest FCSS_EFW_AD-7.6 Exam Materials provided by us can meet all your need to prepare for FCSS_EFW_AD-7.6 exam.

As professional model company in this line, success of the FCSS_EFW_AD-7.6 training materials will be a foreseeable outcome. Even some nit-picking customers cannot stop practicing their high quality and accuracy. We are intransigent to the quality of the FCSS_EFW_AD-7.6 exam questions and you can totally be confident about their proficiency sternly. Undergoing years of corrections and amendments, our FCSS_EFW_AD-7.6 Exam Questions have already become perfect. The pass rate of our FCSS_EFW_AD-7.6 training guide is as high as 99% to 100%.

FCSS_EFW_AD-7.6 Hottest Certification | FCSS_EFW_AD-7.6 Exam Revision Plan

Each format specializes in a specific study style and offers unique benefits, each of which is crucial to good FCSS - Enterprise Firewall 7.6 Administrator (FCSS_EFW_AD-7.6) exam preparation. The specs of each Fortinet FCSS_EFW_AD-7.6 Exam Questions format are listed below, you may select any of them as per your requirements.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q83-Q88):

NEW QUESTION # 83

An administrator received a FortiAnalyzer alert that a 1 TB disk filled up in a day. Upon investigation, they found thousands of unusual DNS log requests, such as JHCMQK.website.com, with no answers. They later discovered that DNS exfiltration was occurring through both UDP and TLS.

How can the administrator prevent this data theft technique?

- A. Use an IPS profile and DNS exfiltration-related signatures.
- B. Enable DNS Filter to protect against DNS exfiltration.
- C. Create an inline-CASB to protect against DNS exfiltration.
- D. Configure a File Filter profile to prevent DNS exfiltration.

Answer: A

Explanation:

The excessive DNS log requests with random subdomains suggest a DNS exfiltration attack, where attackers encode and transmit data via DNS queries. Since this technique can use both UDP and TLS (DoH - DNS over HTTPS), a comprehensive security approach is needed.

Using an IPS profile with DNS exfiltration-specific signatures allows FortiGate to:

- * Detect and block abnormal DNS query patterns often used in exfiltration.
- * Inspect encrypted DNS (DoH, DoT) traffic if SSL inspection is enabled.
- * Identify known exfiltration domains and techniques based on FortiGuard threat intelligence.

NEW QUESTION # 84

You configured the FortiGate devices in an enterprise network to join the Fortinet Security Fabric. You have a list of IP addresses that must be blocked by the data center firewall. This list is updated daily.

How can you automate updates to the firewall policy to add the IP addresses from the daily updated list?

- A. With an external connector from External Feeds
- B. With a CLI script in FortiManager
- C. With a Security Fabric automation
- D. With metadata variables in FortiManager

Answer: A

NEW QUESTION # 85

Refer to the exhibit, which shows a partial troubleshooting command output.

```
FortiGate # diagnose vpn tunnel list name Hub2Spoke1
list ipsec tunnel by names in vd 0
...
npu_flag=20 npu_rgw=10.10.2.2 npu_lgw=10.10.1.1 npu_selid=1
```

An administrator is extensively using IPsec on FortiGate. Many tunnels show information similar to the output shown in the exhibit. What can the administrator conclude?

- A. The two IPsec SAs, inbound and outbound, are copied to the NPU.
- B. Only the inbound IPsec SA is copied to the NPU.
- C. Only the outbound IPsec SA is copied to the NPU.
- D. IPsec SAs cannot be offloaded.

Answer: A

Explanation:

The `diagnose vpn tunnel list name Hub2Spoke1` command output provides key information about the offloading status of an IPsec VPN tunnel to the Network Processing Unit (NPU).

`npu_flag=20`:

This flag indicates that both inbound and outbound IPsec Security Associations (SAs) have been offloaded to the NPU, meaning the VPN traffic is processed in hardware instead of the CPU.

`npu_rgw=10.10.2.2` and `npu_lgw=10.10.1.1`:

These IPs represent the remote gateway (rgwy) and local gateway (lgwy), confirming that the tunnel is successfully offloaded.

`npu_selid=1`:

This value means the session selector for the NPU offloaded SA is active.

Since both inbound and outbound SAs are offloaded, the administrator can conclude that the FortiGate NPU is handling IPsec encryption and decryption efficiently, reducing CPU load and improving VPN performance.

NEW QUESTION # 86

Refer to the exhibit, which contains the partial output of an OSPF command.

```
FortiGate # get router info ospf status
Routing Process "ospf 0" with ID 0.0.0.5
Process uptime is 0 minute
Process bound to VRF default
Conforms to RFC2328, and RFC1583Compatibility flag is enabled
Supports only single TOS(TOS0) routes
Supports opaque LSA
Do not support Restarting
This router is an ASBR
```

FORTINET

An administrator is checking the OSPF status of a FortiGate device and receives the output shown in the exhibit. Which statement on this FortiGate device is correct?

- A. The FortiGate device can inject external routing information.
- B. The FortiGate device does not support OSPF ECMP.
- C. The FortiGate device is a backup designated router.
- D. The FortiGate device is in the area 0.0.0.5.

Answer: A

Explanation:

From the OSPF status output, the key information is:

"This router is an ASBR" - This means the FortiGate is acting as an Autonomous System Boundary Router (ASBR).

An ASBR is responsible for injecting external routing information into OSPF from another routing protocol (such as BGP, static routes, or connected networks).

NEW QUESTION # 87

The IT department discovered during the last network migration that all zero phase selectors in phase 2 IPsec configurations impacted network operations.

What are two valid approaches to prevent this during future migrations? (Choose two.)

- A. Use routing protocols to specify allowed subnets over the tunnel.
- B. Configure an IPsec-aggregate to create redundancy between each firewall peer.
- C. Clearly indicate to the VPN which segments will be encrypted in the phase two selectors.
- D. Configure an IP address on the IPsec interface of each firewall to establish unique peer connections and avoid impacting network operations.

Answer: A,C

Explanation:

Zero phase selectors in IPsec Phase 2 mean that no specific traffic selectors (subnets) are defined, allowing any traffic to be encrypted through the VPN tunnel. This can cause unintended traffic forwarding issues and disrupt network operations.

To prevent this from happening during future migrations:

Using routing protocols ensures that only specific subnets are advertised over the tunnel. Dynamic routing (such as OSPF or BGP) helps define which networks should use the tunnel, preventing unintended traffic from being encrypted.

Clearly defining phase 2 selectors avoids the problem of encrypting all traffic by explicitly stating the allowed source and destination subnets. This prevents the tunnel from affecting unrelated network traffic.

NEW QUESTION # 88

.....

Our FCSS_EFW_AD-7.6 real exam has been on the top of the industry over 10 years with passing rate up to 98 to 100 percent.

Ranking the top of the similar industry, we are known worldwide by helping tens of thousands of exam candidates around the world. To illustrate our FCSS_EFW_AD-7.6 Study Materials better, you can have an experimental look of them by downloading our FCSS_EFW_AD-7.6 demos freely. And you will find it is quite fast and convenient.

FCSS_EFW_AD-7.6 Hottest Certification: https://www.examcollectionpass.com/Fortinet/FCSS_EFW_AD-7.6-practice-exam-dumps.html

Fortinet Valid FCSS_EFW_AD-7.6 Exam Sample As you know, certificates are self-evident proof of personal capacity no matter which are you are engaged in, As the rapid development of the science and technology and the fierce competition of market, it is urgent for many people to get FCSS_EFW_AD-7.6 certification, So you can trust on the validity and top standard of ExamcollectionPass FCSS_EFW_AD-7.6 exam practice test questions, The FCSS_EFW_AD-7.6 dumps have been verified and approved by the skilled professional.

Part I: Mastering Excel Ranges and Formulas, At best, it can help you to FCSS_EFW_AD-7.6 develop and express your solution, As you know, certificates are self-evident proof of personal capacity no matter which are you are engaged in.

Valid FCSS_EFW_AD-7.6 Exam Sample | 100% Pass | Latest Questions

As the rapid development of the science and FCSS_EFW_AD-7.6 Hottest Certification technology and the fierce competition of market, it is urgent for many people to get FCSS_EFW_AD-7.6 Certification, So you can trust on the validity and top standard of ExamcollectionPass FCSS_EFW_AD-7.6 exam practice test questions.

The FCSS_EFW_AD-7.6 dumps have been verified and approved by the skilled professional, You can give multiple practice tests to improve yourself and even access the result of previously given tests from the history to avoid mistakes while taking the FCSS - Enterprise Firewall 7.6 Administrator (FCSS_EFW_AD-7.6) test.
