Palo Alto Networks PCCP Exam | New PCCP Test Sample - Professional Offer of Examcollection PCCP Dumps

Today is the best time to become competive BraindumpsPass and updated in the market. You can do this easily. Just enroll in the PCCP exam and start PCCP certification exam preparation Palo Alto Networks PCCP Exam Dumps. Solutions PCCP exam dumps after paying an affordable Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam questions charge and start this journey without wasting further time.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 2	• Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Topic 3	• Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.
Topic 4	• Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.

Examcollection Palo Alto Networks PCCP Dumps - PCCP Interactive Practice Exam

Our desktop-based Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) practice exam software needs no internet connection. The web-based Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) practice exam is similar to the desktop-based software. You can take the web-based Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based Palo Alto Networks PCCP Practice Exam. Both Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your Building Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) practice exams according to your needs.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q10-Q15):

NEW QUESTION # 10
Which product from Palo Alto Networks extends the Security Operating Platform with the global threat intelligence and attack context needed to accelerate analysis, forensics, and hunting workflows?

- A. Global Protect
- B. AutoFocus
- C. STIX
- D. WildFire

Answer: B

Explanation:
page 173 "AutoFocus makes over a billion samples and sessions, including billions of artifacts, immediately actionable for security analysis and response efforts. AutoFocus extends the product portfolio with the global threat intelligence and attack context needed to accelerate analysis, forensics, and hunting workflows.
Together, the platform and AutoFocus move security teams away from legacy manual approaches that rely on aggregating a growing number of detectionbased alerts and post-event mitigation, to preventing sophisticated attacks and enabling proactive hunting activities."

NEW QUESTION # 11
Organizations that transmit, process, or store payment-card information must comply with what standard?

- A. PCI DSS
- B. CISA
- C. HIPAA
- D. GDPR

Answer: A

Explanation:
PCI DSS stands for Payment Card Industry Data Security Standard, which is a set of requirements intended to ensure that all companies that process, store, or transmit credit card information maintain a secure environment1. The standard is administered by the Payment Card Industry Security Standards Council, and its use is mandated by the major card brands2. PCI DSS covers 12 requirements for compliance, organized into six control objectives, such as building and maintaining a secure network and systems, protecting cardholder data, and implementing strong access control measures3. NEW QUESTION # 12
What is an advantage of virtual firewalls over physical firewalls for internal segmentation when placed in a data center?

- A. They are dynamically scalable.
- B. They possess unlimited throughput capability.
- C. They have failover capability.

- D. They are able to prevent evasive threats.

Answer: A

Explanation:
Virtual firewalls offer the advantage of dynamic scalability, making them ideal for internal segmentation in data centers. They can be quickly deployed, resized, and adjusted to meet the needs of changing workloads and environments, unlike physical firewalls which require fixed hardware resources.

NEW QUESTION # 13
Web 2.0 applications provide which type of service?

- A. FWaaS
- B. PaaS
- C. SaaS
- D. IaaS

Answer: C

Explanation:
Web 2.0 applications provide the type of service known as Software as a Service (SaaS). SaaS is a cloud computing model that allows users to access and use web-based applications over the internet, without having to install or maintain any software on their own devices. SaaS applications are hosted and managed by a third- party provider, who is responsible for the security, performance, availability, and updates of the software.
SaaS applications are typically accessed through a web browser or a mobile app, and offer features such as user-generated content, social networking, collaboration, and interoperability. Examples of Web 2.0 SaaS applications include Facebook, X, Wikipedia, Gmail, and Salesforce. References:

NEW QUESTION # 14
Which type of LAN technology is being displayed in the diagram?

- A. Star Topology
- B. Mesh Topology
- C. Spine Leaf Topology

- D. Bus Topology

Answer: B

Explanation:
The diagram displays a mesh topology, where each device is connected to every other device in the network.
This topology is characterized by the multiple connections each node has, ensuring there is no single point of failure and providing redundant paths for data transmission, enhancing the reliability and resilience of the network. Mesh topology is one of the types of LAN technology that uses ethernet or Wi-Fi to connect devices12. References:
