Scrum PSPO-I certification exam is an assessment of skills in specific areas, including stakeholder engagement, product vision, customer value, requirements management, product backlog management, and product road mapping. PSPO-I exam is ideal for aspiring product owners, team members who support the product owner, and individuals who want to validate their product ownership skills. Successful completion of the Scrum PSPO-I Exam confirms an individual's ability to carry out product ownership functions efficiently and effectively, emphasizing the importance of transparency, inspection, and adaptation.

Scrum Professional Scrum Product Owner I Sample Questions (Q129-Q134):

NEW QUESTION # 129

When does one Developer take ownership of a Sprint Backlog item?

- A. During the Daily Scrum.
- **B. They don't.**
- C. During the Sprint Planning meeting.

Answer: B

NEW QUESTION # 130

What is the Product Owner responsible for during the Sprint Retrospective?

(choose the best answer)

- **A. Participating as a Scrum Team member.**
- B. The Product Owner should not take part in Sprint Retrospective.
- C. Summarizing and reporting the discussions to the stakeholders that they represent in the Scrum Team.
- D. Capturing requirements for the Product Backlog.

Answer: A

NEW QUESTION # 131

The Sprint Retrospective is a formal opportunity to inspect and adapt Scrum artifacts.

- A. FALSE
- **B. TRUE**

Answer: B

NEW QUESTION # 132

During the Sprint Retrospective a Scrum Team has identified several high priority process improvements. Which of the following statements is most accurate?

(choose the best answer)

- A. The Scrum Master selects the most important process improvement and places it in the Sprint Backlog
- B. The Scrum Team should decline to add a process improvement to the Sprint Backlog when things are running smoothly.
- **C. The Scrum Team may add the items to the Sprint Backlog for the next Sprint.**
- D. The Scrum Team should choose at least one high priority process improvement to place in the Product Backlog.

Answer: C

Explanation:

The Scrum Guide states that "By the end of the Sprint Retrospective, the Scrum Team should have identified improvements that it will implement in the next Sprint. Implementing these improvements in the next Sprint is the adaptation to the inspection of the Scrum Team itself."¹ This means that the Scrum Team may add the high priority process improvements to the Sprint Backlog for the next Sprint, as part of their plan to deliver the Increment and achieve the Sprint Goal. The Sprint Backlog is owned and managed by the Developers, who can update it throughout the Sprint as more is learned.¹ References:

NEW QUESTION # 133

Who determines when it is appropriate to update the Sprint Backlog during a Sprint?
(choose the best answer)

- A. The Developers.
- B. The Scrum Team.
- C. The Project Manager.
- D. The Product Owner.

Answer: A

Explanation:

* The Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal. The Sprint Backlog is a highly visible, real-time picture of the work that the Developers plan to accomplish during the Sprint, and it belongs solely to the Developers.

* The Developers are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

* The Developers are also responsible for updating the Sprint Backlog throughout the Sprint. The Sprint Backlog is a plan with enough detail that changes in progress can be understood in the Daily Scrum. The Developers modify the Sprint Backlog throughout the Sprint, and the Sprint Backlog emerges during the

* Sprint. This emergence occurs as the Developers work through the plan and learn more about the work needed to achieve the Sprint Goal.

* As new work is required, the Developers add it to the Sprint Backlog. As work is performed or completed, the estimated remaining work is updated. When elements of the plan are deemed unnecessary, they are removed. Only the Developers can change its content and order during a Sprint.
