

# Nutanix NCP-CI-AWS資格取得講座 & NCP-CI-AWS関連合格問題

P.S. Pass4TestがGoogle Driveで共有している無料かつ新しいNCP-CI-AWSダンプ: [https://drive.google.com/open?id=1Uckl6GurrdnDRN-4WX7\\_RJ6z6QNrIVNh](https://drive.google.com/open?id=1Uckl6GurrdnDRN-4WX7_RJ6z6QNrIVNh)

我々Pass4Testは一番信頼できるIT試験資料販売サイトになれるために、弊社はお客様に最完備かつ最新版のNCP-CI-AWS問題集を提供して努力します。我々の問題集によって、ほとんどの受験生は大方の人から見る大変なNutanix NCP-CI-AWS試験にうまく合格しました。この成功データはNCP-CI-AWS試験に準備する皆様にPass4TestのNCP-CI-AWS問題集を勧める根拠とします。もしあなたは残念的にNCP-CI-AWS試験に失敗したら、全額で返金することを承諾します。すべてのことはあなたの安心的に試験に準備できるのためのです。

## Nutanix NCP-CI-AWS 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"><li>Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li></ul>
トピック 2	<ul style="list-style-type: none"><li>Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li></ul>
トピック 3	<ul style="list-style-type: none"><li>Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li></ul>
トピック 4	<ul style="list-style-type: none"><li>Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li></ul>

## Nutanix NCP-CI-AWS関連合格問題 & NCP-CI-AWS学習関連題

トレントのNCP-CI-AWSガイドは、これらすべての質問を解決してNCP-CI-AWS試験に合格するのに役立ちます。弊社Pass4TestのNCP-CI-AWS学習資料は、暦年の試験概要と業界動向に従って、長年にわたって多くの専門家によって簡素化され、まとめられています。したがって、NCP-CI-AWS学習教材は理解しやすく、把握しやすいです。人生には、自分の業界を変えたい人もたくさんいます。彼らはしばしば、業界に参入するための足がかりとして専門的なNCP-CI-AWS資格試験を受けます。あなたがこれらの人々の1人である場合、NutanixのNCP-CI-AWS試験エンジンが最良の選択となります。

## Nutanix Certified Professional - Cloud Integration - AWS 認定 NCP-CI-AWS

## 試験問題 (Q44-Q49):

### 質問 # 44

When configuring an alert email in Prism Central deployed within an NC2 environment, what is required in order for the emails to be sent properly?

- A. Cluster Super Admin permissions
- B. A whitelisted public cloud console endpoint
- C. Name servers configured in Prism Central
- **D. SMTP server configured in Prism Central settings**

正解: D

解説:

To ensure that alert emails are sent properly from Prism Central within an NC2 environment, configuring an SMTP server in the Prism Central settings is required. The SMTP server facilitates the sending of email notifications for alerts and other communications.

SMTP Configuration:

Prism Central requires an SMTP server to send email alerts. This involves specifying the SMTP server address, port, and authentication details if needed.

The configuration must include the email address from which the alerts will be sent and the recipient addresses.

Steps to Configure SMTP Server in Prism Central:

Log in to Prism Central.

Navigate to the "Settings" menu.

Select "Email Server" under the "Alerts" section.

Enter the SMTP server details, including the server address, port, and authentication credentials.

Test the configuration to ensure emails are sent correctly.

### 質問 # 45

What is the purpose of an organization in the NC2 console?

- A. To link with NC2 subscription plans
- **B. To segregate clusters based on specific requirements**
- C. To map the on-premises Prism Central environment
- D. To Link with a Public Cloud account

正解: B

解説:

In the NC2 console, an organization is used to segregate clusters based on specific requirements. This segregation allows administrators to manage clusters more effectively by grouping them according to business units, projects, or other criteria. This organizational structure helps in maintaining clear boundaries and applying specific policies or permissions to different clusters within the same NC2 environment.

### 質問 # 46

An administrator has deployed NC2 on AWS. The cluster deployment completed successfully.

After deployment, the administrator created a subnet in AWS, added it as a network in Prism Element, deployed Prism Central using the newly-configured network, and registered the cloud cluster with it.

The on-premises network and AWS are connected via a Site-to-Site VPN. Cluster nodes, CVM, and Prism Central can communicate with each other, but cannot be accessed from the on-premises network.

What two issues might be the cause of this problem? (Choose two.)

- **A. Traffic from the on-premises network is not permitted by VM and Management security groups.**

- B. AWS Direct Connect must be used to establish connection between AWS and on-premises
- **C. The AWS VPC traffic is blocked by a firewall in the on-premises network.**
- D. The AHV firewall is blocking traffic from the on-premises network.

正解: A、C

解説:

Traffic from the on-premises network is not permitted by VM and Management security groups:

Ensure that the security groups assigned to the VMs and management interfaces in AWS allow inbound traffic from the on-premises network. Without appropriate security group rules, the traffic will be blocked.

The AWS VPC traffic is blocked by a firewall in the on-premises network:

Check if the firewall on the on-premises network is configured to allow traffic from the AWS VPC. Firewalls may have restrictive rules that block incoming traffic, preventing communication.

Reference:

Refer to AWS documentation on security groups and firewalls and Nutanix documentation on configuring networking for NC2 clusters.

#### 質問 # 47

An administrator wants to route the outbound and inbound traffic from the NC2 cluster through a proxy server. Which two statements are correct about using a proxy server? (Choose two.)

- **A. NC2 clusters using Flow Virtual Networking do not support a proxy server.**
- B. The proxy server must be configured only while creating a cluster because the proxy server settings cannot be configured after the cluster is deployed.
- **C. A proxy server is only supported with AOS 6.7.1.6 or higher versions and only with user-created VPCs.**
- D. The proxy configuration can be changed while tasks for adding or removing nodes are in progress.

正解: A、C

#### 質問 # 48

An administrator needs to backup Prism Central configuration data to an Amazon S3 bucket. Which pcd-cli command parameters is needed to satisfy this task?

- A. recover
- B. deployment-info
- C. list-protection-targets
- **D. protect**

正解: D

解説:

To backup Prism Central configuration data to an Amazon S3 bucket, the pcd-cli command with the protect parameter is used.

This parameter is specifically designed for creating protection policies and backing up Prism Central data.
