Using this, you can prepare for your test with ease.

PMI Agile Certified Practitioner Sample Questions (Q465-Q470):

NEW QUESTION # 465
How can an agile team working on a new product ensure alignment with external stakeholders?

- A. Work with the scrum master and stakeholders to ensure agile principles are followed
- B. Ask the product owner to provide a detailed product specification document
- C. Conduct story-mapping exercises to clarify deliverables and release priorities
- D. Hold a kick-off meeting to assign roles and responsibilities

Answer: C

Explanation:
The correct answer is B - Conduct story-mapping exercises to clarify deliverables and release priorities. Story mapping is a visual practice that aligns stakeholders and teams around a shared understanding of the product vision, user workflows, and incremental delivery plans.
From the PMI Agile Practice Guide:
"Story mapping is a collaborative activity used to understand the user's journey, prioritize features, and identify releases. It is highly effective for stakeholder alignment and promoting shared understanding." (PMI Agile Practice Guide, Section 5.4 - Story Mapping)
Also supported by Mike Griffiths:
"Story mapping promotes visibility, alignment, and prioritization. It fosters collaboration between the team and stakeholders and helps translate business objectives into user stories." (Mike Griffiths, PMI-ACP Exam Prep, Chapter 3 - Value-Driven Delivery)
Why other options fall short:
* A reverts to heavy documentation, which agile discourages.
* C is a one-time event and doesn't sustain alignment.
* D focuses on adherence to process rather than collaboration and planning clarity.

NEW QUESTION # 466
A full cycle of design-code-verifyrelease practiced by extreme Programming (XP) teams is called:

- A. Iteration
- B. Burndown
- C. Story

- D. Timebox

Answer: A
