SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q26-Q31):

NEW QUESTION # 26

You requested Joule to draft meeting talking points. Which way of interacting with Joule does this represent?

- A. Chat talk
- **B. Transactional**
- C. Informational
- D. Be creative

Answer: B

NEW QUESTION # 27

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- **A. Tenant isolation**
- **B. Consent-based model training**
- C. Clean core maintenance
- **D. SAP-hosted AI infrastructure**

Answer: A,B,D

Explanation:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data.

NEW QUESTION # 28

Match the outcomes in the dropdown lists to the capabilities of Joule

Get the insights you need, when you need them.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Enable every employee to achieve more in a faster way.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Make every customer touchpoint count.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Answer:

Explanation:

Get the insights you need, when you need them.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Enable every employee to achieve more in a faster way.

Make every customer touchpoint count.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

NEW QUESTION # 29

What are some important features of the Joule Agent architecture? Note: There are 3 correct answers to this question.

- A. Managed agent runtime
- B. Shared agent services
- C. Seamless collaboration
- D. Bi-directional connectivity
- E. Agent to agent protocol

Answer: A,B,E

NEW QUESTION # 30

(Which URL should you use to find reliable information about existing and planned features of Joule quickly?)

- A. <https://roadmaps.sap.com/board?range=FIRST-LAST&q=Joule>
- B. <https://learning.sap.com/learning-journeys/Joule>
- C. <https://developers.sap.com/board?range=FIRST-LAST&q=Joule>
- D. <https://community.sap.com/topics/joule>

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The correct URL to quickly find reliable information about existing

and planned features of Joule is the SAP Road Map Explorer, as it is the official interactive tool designed for viewing current and future product features and innovations. This aligns with SAP's official resources for product roadmaps, which detail both existing capabilities and planned enhancements for tools like Joule, SAP's generative AI copilot.

Exact extracts supporting this:

From SAP Road Map Explorer description: "The SAP Road Map Explorer is an interactive tool that supports a customer's journey to SAP's future product portfolio and the Intelligent Enterprise." pages.community.sap.com From a specific Joule roadmap asset: "Preview the road map for the Joule copilot and start planning how to leverage its upcoming enhancements to grow efficiency and engagement across your business." sap.com The URL in option C directly searches the roadmap board for Joule across all time ranges (FIRST-LAST), providing comprehensive details on features.

Other options are incorrect because:

Option A (developers.sap.com) is for developer resources, tutorials, and boards, not specifically for product roadmaps or planned features.

Option B (learning.sap.com) focuses on learning journeys and educational content, such as courses on using Joule, but not on feature roadmaps.

Option D (community.sap.com) is a discussion forum for user topics and experiences, which may not provide official, reliable roadmap information.

NEW QUESTION # 31

.....

Customizable SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite (C_BCBAI_2509) practice exams allow you to adjust the time and SAP C_BCBAI_2509 questions numbers according to your practice needs.
