

# NCP-EUC New Dumps Book, New NCP-EUC Exam Prep

DOWNLOAD the newest PDFTorrent NCP-EUC PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1mVAysbiiv\\_KWcyBeYRYX\\_dh10oj1NELM](https://drive.google.com/open?id=1mVAysbiiv_KWcyBeYRYX_dh10oj1NELM)

Not only that our NCP-EUC exam questions can help you pass the exam easily and smoothly for sure and at the same time you will find that the NCP-EUC guide materials are valuable, but knowledge is priceless. These professional knowledge will become a springboard for your career, help you get the favor of your boss, and make your career reach it is peak. What are you waiting for? Come and take NCP-EUC Preparation questions home.

So you should have to be vigilant and prepare well to crack the NCP-EUC exam. For complete, comprehensive, and instant Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC exam preparation, the PDFTorrent NCP-EUC Dumps are the right choice. You can trust NCP-EUC exam questions and start Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC exam preparation. No doubt the PDFTorrent is one of the leading and reliable platforms that has been helping NCP-EUC Exam candidates in their preparation. The PDFTorrent offers valid, updated, and real Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC exam practice questions that perfectly and quickly prepare the NCP-EUC exam candidates.

## NCP-EUC New Dumps Book & Free PDF 2026 Nutanix Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Realistic New Exam Prep

PDFTorrent Nutanix NCP-EUC practice test software is the answer if you want to score higher in the Nutanix NCP-EUC exam and achieve your academic goals. Don't let the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) certification exam stress you out! Prepare with our Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam dumps and boost your confidence in the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam. We guarantee your road toward success by helping you prepare for the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) certification exam. Use the best PDFTorrent Nutanix NCP-EUC practice questions to pass your Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam with flying colors!

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q158-Q163):

### NEW QUESTION # 158

How should the storage containers be configured to follow Nutanix storage best practices?

- A. Use separate containers.  
Enable Compression for persistent VMS.  
Enable Compression and Deduplication for non-persistent VMS
- B. Use a single container.  
Enable Compression and Erasure Coding for both VMS
- **C. Use separate containers.**  
**Enable Compression for non-persistent VMS.**  
**Enable Compression and Deduplication for persistent VMS**
- D. Use a single container.  
Enable Compression and Deduplication for both VMS

**Answer: C**

Explanation:

Nutanix recommends using separate containers for persistent and non-persistent VMS. For persistent VMS, enable compression and deduplication. For non-persistent VMS, enable compression only. According to Nutanix documentation, it is recommended to use multiple containers, with each container representing an individual performance workload. This allows for better performance isolation and easier management. For example, one container could be used for VDI workloads, while another container could be used for general-purpose workloads.

As for compression and deduplication, it is recommended to enable them for all VMs. Compression reduces the amount of storage space required and increases the performance of the system, while deduplication reduces the amount of duplicate data stored on the system. Erasure coding can also be used as an alternative to replication for data protection.

### NEW QUESTION # 159

Due to software licensing, a company has a requirement to only deploy certain apps to different groups of users while also having a single desktop image for all users. An administrator wants a way to do this without installing apps in the image and hiding them based on user groups or having double-hop sessions.

Which option should the administrator use to deliver user group specific apps?

- A. Application publishing
- **B. Application layering**
- C. Application masking
- D. Application installs on-demand

**Answer: B**

Explanation:

To meet the requirement of a single desktop image without "installing apps in the image and hiding them" (which excludes Application Masking, Option D), and avoiding "double-hop sessions" (which excludes Application Publishing, Option B), the correct solution is Application Layering.

Application Layering (such as Citrix App Layering or similar technologies supported on Nutanix) allows applications to be packaged into separate virtual disks (layers). These layers are attached to the OS at runtime based on user identity or group membership. This keeps the base image clean and generic while delivering specific apps to specific users, satisfying all conditions in the scenario.

### NEW QUESTION # 160

An administrator is configuring an existing VM to use a virtual Trusted Platform Module (vTPM).

What additional step must be taken to support Secure Boot?

- A. Provision the VM with a CD-ROM drive.
- B. Set the virtual hardware type to legacy BIOS.
- C. Hardware TPM must be a pass-through device.

- **D. Set the VM machine type to q35.**

**Answer: D**

Explanation:

To enable Secure Boot and vTPM on a Nutanix AHV cluster, specific VM configuration requirements must be met. According to the Nutanix AHV Administration and Security guides, Secure Boot prevents malicious code from loading during the boot process by ensuring that only signed drivers and OS loaders are used.

When configuring a VM for Secure Boot, the machine type must be set to q35. The standard legacy machine type (i440fx) does not support the necessary features for Secure Boot and vTPM operations in this context.

Documentation for creating or updating a VM with these features via the Acropolis CLI (aCLI) explicitly includes the parameter `machine_type=q35` in the command string (e.g., `vm.create vm-name machine_type=q35 uefi_boot=true secure_boot=true virtual_tpm=true`). Furthermore, if an administrator attempts to update an existing VM to enable Secure Boot without this machine type, the operation will fail or require the conversion, as Secure Boot and vTPM are supported specifically on the Q35 virtual hardware platform combined with UEFI boot mode.

Legacy BIOS (Option C) is explicitly unsupported for Secure Boot, as UEFI is a strict prerequisite. Hardware TPM pass-through (Option D) is not used; instead, AHV utilizes a software-based vTPM that keeps the crypto keys independent of the underlying hardware to allow for VM mobility.

Relevance of the video: The video provides a step-by-step visual guide on enabling Credential Guard and Secure Boot for Windows VMs on Nutanix AHV, which directly illustrates the configuration steps and requirements discussed in the question, including the necessary VM settings.

Enabling Credential Guard for AHV Windows VMs

#### NEW QUESTION # 161

An administrator is upgrading a 3-node Nutanix Files Server during a routine maintenance window. The administrator observes that users experience connectivity problems with their profile containers becoming disconnected from their virtual desktops when a File Server VM (FSVM) reboots. What could be implemented to address this?

- A. Add additional File Server VMs (FSVM).
- B. Configure Access-based enumeration on the share.
- C. Use a Standard Share within Nutanix Files.
- **D. Configure Continuous Availability on the share.**

**Answer: D**

Explanation:

To support non-disruptive operations for sensitive workloads such as VDI user profiles (e.g., FSLogix or Citrix Profile Management), Nutanix Files supports Continuous Availability (CA) for SMB shares.

Standard SMB shares may experience a brief pause or disconnect during an FSVM failover or upgrade (rolling reboot), which causes VDI profile containers to detach, leading to application crashes or session hangs. Continuous Availability enables persistent file handles, allowing the client session to transparently failover to another FSVM node without disconnecting the application or user session. This is the specific feature designed to address connectivity issues during maintenance windows for VDI workloads.

#### NEW QUESTION # 162

An administrator has been given a new support role for a group of 1000 users, which are all running Windows 10 Linked Clone virtual desktops,

The administrator learns quickly that the environment has been undersized with constant complaints from the user community around running out of storage. The administrator further discovers that the environment is memory constrained.

Which feature should the administrator enable to help relieve the capacity issue?

- **A. Deduplication**
- B. Erasure Coding
- C. Compression
- D. Auto-tiering

**Answer: A**

Explanation:

Deduplication is a process that eliminates duplicate data blocks and reduces the amount of storage space required for virtual

desktops. Deduplication can be enabled at both cluster level and container level on Nutanix.

Deduplication can also work with VCAI (View Composer Array Integration), which is a feature that uses Nutanix native NFS snapshot technology to clone VMs<sup>2</sup>. VCAI can improve performance and reduce storage consumption for linked-clone desktop pools.

Another feature that can help with capacity issue is Shadow Clones, which is a distributed caching mechanism that allows multiple VMs to read from a single vDisk copy stored locally on each node<sup>3</sup>. Shadow Clones can reduce network traffic and improve boot times for virtual desktops.

## NEW QUESTION # 163

.....

For candidates who are going to buying NCP-EUC training materials online, you may pay more attention to the privacy protection. We respect the private information of you. If you choose us, we can ensure you that your personal information such as your name and email address will be protected well. Once the order finishes, your personal information will be concealed. Besides, NCP-EUC Exam Materials contain both questions and answers, and it's convenient for you to have a check of answers. We have online and offline chat service for NCP-EUC exam materials, if you have any questions, you can have a conversation with them.

**New NCP-EUC Exam Prep:** <https://www.pdf torrent.com/NCP-EUC-exam-prep-dumps.html>

In order to meet the time requirement of our customers, our experts carefully designed our NCP-EUC test torrent to help customers pass the exam in a lot less time, Nutanix NCP-EUC New Dumps Book Its pdf book carries all the exam alike questions and additional required details, Do you have the confidence to clear the exam without NCP-EUC study materials, You can find everything that you need to pass test in our NCP-EUC valid vce.

Do not take your future betting on tomorrow, Developers NCP-EUC of iPhone and Android apps must also consider how they will approach marketing their app when released, In order to meet the time requirement of our customers, our experts carefully designed our NCP-EUC Test Torrent to help customers pass the exam in a lot less time.

## **Nutanix NCP-EUC New Dumps Book: Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam - PDFTorrent Try Free and Buy Easily**

Its pdf book carries all the exam alike questions and additional required details, Do you have the confidence to clear the exam without NCP-EUC study materials?

You can find everything that you need to pass test in our NCP-EUC valid vce, Can I install the Nutanix NCP-EUC Test Engine Software (VCE) on Mac or Linux?
