Useful CDFOM Free Exam Dumps - Pass CDFOM Exam

It is estimated conservatively that the passing rate of the exam is over 98 percent with our CDFOM study materials as well as considerate services. We not only provide all candidates with high pass rate study materials, but also provide them with good service. The thoughtfulness of our CDFOM Study Materials services is insuperable. What we do surly contribute to the success of CDFOM practice materials.

EXIN Certified Data Center Facilities Operations Manager Sample Questions (Q57-Q62):

NEW QUESTION # 57
Customers complain about support response times being too slow. After a check with the vendor about the agreed SLAs, it is

concluded that no violation occurred.
What is the likely cause of the customers complaining?

- A. Service Level Agreement reporting is unclear
- B. There is not enough operations staff to respond to customer complaints
- C. The Underpinning Contract with the vendor is not aligned with the customer Service Level Agreement
- D. Customers involved receive standard support only and should upgrade to a premium support level

Answer: C

Explanation:
This scenario reflects a classic misalignment between theService Level Agreement (SLA)that the data center guarantees to customers and theUnderpinning Contract (UC)or vendor contract that supports those services.
EPI's Service Level Management model stresses that all contractual layers must be fully aligned: SLAs (customer-facing), OLAs (internal agreements), and UCs (vendor contracts). If the vendor meets its contractual requirements but customers still experience slow response times, it means the vendor contract is not strict enough to support the SLA commitments.
For example, the SLA may require a 15-minute response time, but the vendor contract may only require a 2- hour response. In such cases, the data center cannot meet customer expectations, even when all parties technically meet their agreements. This mismatch is common in outsourced environments when capability assessment and contract alignment are overlooked.
Option A describes insufficient staffing, which would directly affect operations but is not indicated in the scenario. Option C assumes customers chose the wrong support tier, which is not stated. Option D deals with reporting clarity, not response speed.
Thus,misaligned UCsare the most likely root cause.

NEW QUESTION # 58
What is the main objective of the security incident management process?

- A. To address security breaches and potential weaknesses
- B. To test emergency response plans
- C. To comply with ISO 27001
- D. To verify whether the correct individuals are assigned as security guard

Answer: A

Explanation:
Security incident management is a core function in maintaining physical security integrity within the data center environment. The main purpose of this process is torespond to, manage, and eliminate security breaches and vulnerabilitiesthat could compromise facility protection, customer assets, or sensitive operational areas. According to EPI's security governance principles, a security incident may include unauthorized access attempts, misuse of credentials, badge anomalies, tailgating, tampering, suspicious activities, or procedural violations.
The security incident management process ensures that such events are logged, assessed, investigated, escalated, and resolved in a timely and structured manner. It also identifies root causes and potential systemic weaknesses that must be corrected to prevent recurrence. This includes reviewing procedures, improving physical controls, reinforcing training, and implementing corrective or preventive measures.
Option A is unrelated; guard assignment is part of staffing, not incident management. Option C refers to testing emergency plans, which is part of preparedness and exercises. Option D refers to compliance activities, but compliance is not theobjectiveof incident management-it is aresult.
Therefore, the correct answer isB - addressing breaches and weaknesses.

NEW QUESTION # 59
Of the below, which can be used to optimize succession planning?

- A. Relationship with manager
- B. Career development program
- C. Disciplinary program
- D. External recruitment

Answer: B

NEW QUESTION # 60
What is the main reason for (senior) management to be scheduled into the 'on-duty' roster?

- A. It provides management hands-on experience solving incidents.
- B. It involves management when incidents are escalating
- C. It provides management better insights with the number of incidents occurring
- D. It assists management in optimally reviewing monitoring thresholds

Answer: B

Explanation:
Senior management is included in the duty roster to support escalation procedures.
In EPI's operational model:
* Managers are not part of routine monitoring or incident handling.
* Their role is to intervene only when an incident escalates beyond operational authority, such as major outages, SLA-impacting events, or high-risk situations.
* Management provides decision-making, authorization, and resource allocation during escalations.
Why other options are incorrect:
* A: Managers should not gain "hands-on" experience during incidents.
* B: Incident reporting already provides insights; no roster needed.
* D: Monitoring thresholds are reviewed separately, not via duty rosters.
Thus, C is correct.
EPI DCFOM-Aligned Reference Concepts (Paraphrased)
* Management is involved in the escalation layer, not daily operations.
* Duty rosters ensure proper escalation handling and governance.

NEW QUESTION # 61
Heavy equipment needs to be moved to another side of the computer room so that the three (3) workers can continue their drilling and cutting off the wall for a new cable tray. Four (4) staff members are required to move the equipment so there is one extra staff member required to assist. The safety manager who is overseeing the works is asked to help moving the equipment.
Is the safety manager allowed to step in and assist with the move?

- A. Only if this does not create a security vulnerability
- B. Only when the total weight per person does not exceed the maximum allowed by local regulations
- C. Yes
- D. No

Answer: D

Explanation:
In EPI's safety and statutory requirements framework, the Safety Manager's role is strictly supervisory during ongoing work activities. They are responsible for monitoring, verifying compliance, ensuring safe practices, and intervening only to correct unsafe conditions- not to physically participate in the hazardous task.
Key safety principles include:
* Independence of the Safety Function The Safety Manager must remain impartial and fully observant.
If they participate directly in labor activities (such as lifting equipment), they can no longer maintain oversight of:
* ongoing safety compliance
* worker actions
* environmental hazards
* risk escalation
* Conflict of Responsibilities By physically engaging in the task, the Safety Manager becomes distracted and loses supervisory visibility, which introduces risk to the entire operation.
* Competency and Authorization Requirements Personnel assigned to physically move heavy equipment must:
* be authorized workers
* be trained in manual handling
* have been briefed for the specific PTW-controlled activity
The Safety Manager is not part of the operational lifting team unless specifically assigned beforehand, which is not the case here.
* EPI's Supervisory Separation Principle The safety oversight role must remain dedicated and unbroken during all hazardous or controlled work activities.
Therefore, the Safety Manager must not step in to replace or supplement labor resources.

Correct answer: A - No.
EPI DCFOM-Aligned Reference Concepts (Paraphrased, Not Verbatim)
* Safety oversight must remain independent and uninterrupted.
* Safety Manager responsibilities do not include participating in physical hazardous activities.
* Supervisory personnel cannot assume operational roles during high-risk work.

NEW QUESTION # 62
......

Our CDFOM practice materials are your best choice for their efficiency in different aspects: first of all, do not need to wait, you can get them immediately if you pay for it and download as your wish. Clear-arranged content is our second advantage. Some exam candidates are prone to get anxious about the CDFOM Exam Questions, but with clear and points of necessary questions within our CDFOM study guide, you can master them effectively in limited time.

Training CDFOM Pdf: https://www.actualcollection.com/CDFOM-exam-questions.html

Our professional expert is still working hard to optimize the CDFOM exam questions & answers, EXIN CDFOM Free Exam Dumps We are always here for you and you will be satisfied with our service, Additionally, EXIN CDFOM exam dumps are constantly updated with new CDFOM questions to ensure you're always prepared for CDFOM exam, We are so proud to tell you that according to the statistics from our customers' feedback, the pass rate of our CDFOM exam questions among our customers who prepared for the exam with our CDFOM test guide have reached as high as 99%, which definitely ranks the top among our peers.

We are sure that our test dumps are valid certainly, At latest, you can absolutely pass exam with you indomitable determination and our CDFOM Test Questions: Certified Data Center Facilities Operations Manager.

Our professional expert is still working hard to optimize the CDFOM exam questions & answers, We are always here for you and you will be satisfied with our service.

Overcome Exam Challenges with CDFOM EXIN CDFOM Exam Questions

Additionally, EXIN CDFOM exam dumps are constantly updated with new CDFOM questions to ensure you're always prepared for CDFOM exam, We are so proud to tell you that according to the statistics from our customers' feedback, the pass rate of our CDFOM exam questions among our customers who prepared for the exam with our CDFOM test guide have reached as high as 99%, which definitely ranks the top among our peers.
