Reliable PEGACPDC25V1 Exam Simulator - PEGACPDC25V1 Exam Reference

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the PEGACPDC25V1 Certification. The prerequisite for obtaining the PEGACPDC25V1 certification is to pass the exam, but not everyone has the ability to pass it at one time. Because of not having appropriate review methods and review materials, or not grasping the rule of the questions, so many candidates eventually failed to pass even if they have devoted much effort.

Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q74-Q79):

NEW QUESTION # 74

U+ Bank wants to offer credit cards only to low-risk customers. The customers are divided into various risk segments from Good to Very Poor. The risk segmentation rules that the business provides use the Average Balance and the customer Credit Score. As a decisioning architect, you decide to use a decision table and a decision strategy to accomplish this requirement in Pega Customer Decision Hub.

Using the decision table, which label is returned for a customer with a credit score of 240 and an average balance 35000?

- A. Good
- **B. Poor**
- C. Very Poor
- D. Fair

Answer: B

Explanation:

Using the decision table, you can find the label for a customer with a credit score of 240 and an average balance of 35000 by following these steps:

* Start from the top row and check if the customer's credit score is less than 150. If yes, then the label is Very Poor. If no, then move to the next row.

* Check if the customer's credit score is less than 175 and their average balance is less than 25000. If yes, then the label is Poor. If no, then move to the next row.

* Check if the customer's credit score is less than 200 and their average balance is less than 50000. If yes, then the label is Fair. If no, then move to the next row.

* Check if the customer's credit score is less than 250 and their average balance is less than 75000. If yes, then the label is Good. If no, then move to the last row.

* The last row applies to all other cases that do not match any of the previous conditions. The label for this row is Very Poor.

In this case, the customer's credit score is not less than 150, so the first row does not apply. The customer's credit score is less than 175, but their average balance is not less than 25000, so the second row does not apply either. The customer's credit score is not less than 200, so the third row does not apply. The customer's credit score is less than 250 and their average balance is less than 75000, so the fourth row applies. Therefore, the label for this customer is Poor.

NEW QUESTION # 75

Regional Bank experiences an unexpected system outage affecting online banking services across multiple locations. The bank needs to immediately inform all customers about the temporary service disruption and provide alternative banking options. The communication must reach every customer simultaneously and should not be repeated.

Which communication approach should the bank use to address this urgent customer notification requirement?

- A. Schedule a regular always-on outbound communication with engagement policies
- B. Send individual personalized messages through the standard outbound schedules
- **C. Create a one-time action to deliver Immediate batch communication to all customers**
- D. Configure a promotional campaign with targeted audience segmentation rules

Answer: C

NEW QUESTION # 76

A decisioning architect wants to use the customer properties Gender and MonthlyAverageUsage in a Data Join component. Which decision component is required to enable access to these properties?

- A. None, properties are always available.
- B. Set Property.
- C. Proposition Data.
- D. Data Import.

Answer: A

NEW QUESTION # 77

U+ Bank, a retail bank, has purchased Pega Customer Decision Hub. The bank currently uses an external tool to design email content and a third-party email service provider to send emails to its customers.

As a decisioning architect, how do you recommend the bank implements this requirement?

- A. Create an external email treatment and use Customer Decision Hub to design the email.
- B. Create an internal email treatment and use Customer Decision Hub to design the email.
- C. Create an internal email treatment and import the email content HTML.
- D. Create an external email treatment and use an external tool to design the email.

Answer: D

Explanation:

To implement this requirement, you need to create an external email treatment and use an external tool to design the email. An external email treatment is a type of treatment that allows you to use a third-party email service provider to send emails to your customers. You can configure the external email treatment with the name of the provider, the authentication details, and the template ID that corresponds to the email content that you design using an external tool. This way, you can leverage your existing tools and processes for sending emails, while still using Customer Decision Hub to select the best actions and treatments for your customers.
