

# 2026 High Pass-Rate GH-900–100% Free Valid Test Questions | GitHub Foundations Valid Dump

2026 Latest ValidTorrent GH-900 PDF Dumps and GH-900 Exam Engine Free Share: [https://drive.google.com/open?id=1y1hzv\\_fm1v4HkoIgXBA04UsCI9kipsyg](https://drive.google.com/open?id=1y1hzv_fm1v4HkoIgXBA04UsCI9kipsyg)

Many students often feel that their own gains are not directly proportional to efforts in their process of learning. This is because they have not found the correct method of learning so that they often have low learning efficiency. If you have a similar situation, we suggest you try GH-900 practice materials. GH-900 test guide is compiled by experts of several industries tailored to GH-900 exam to help students improve their learning efficiency and pass the exam in the shortest time. Experts conducted detailed analysis of important test sites according to the examination outline, and made appropriate omissions for unimportant test sites. At the same time, GH-900 Exam Dump made a detailed description of all the incomprehensible knowledge points through examples, forms, etc., so that everyone can easily understand.

## Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.</li></ul>

**Free PDF Quiz Microsoft - GH-900 - GitHub Foundations Updated Valid Test Questions**

We decided to research because we felt the pressure from competition. We must also pay attention to the social dynamics in the process of preparing for the GH-900 exam. Experts at our GH-900 simulating exam have been supplementing and adjusting the content of our products. So our GH-900 Exam Questions are always the most accurate and authoritative. At the same time, our professional experts keep a close eye on the updating the GH-900 study materials. That is why our GH-900 training prep is the best seller on the market.

## Microsoft GitHub Foundations Sample Questions (Q27-Q32):

### NEW QUESTION # 27

GitHub Actions workflows can be directly triggered by which of the following events? (Choose three.)

- A. Disabling a GitHub runner
- **B. Creating an Issue**
- C. Committing a change to a local git repository
- D. Creating a new repository
- **E. Pushing to a GitHub repository**
- **F. Adding a comment to a discussion post**

**Answer: B,E,F**

Explanation:

GitHub Actions are automated workflows that can be triggered by various events on GitHub.

Some common events that trigger workflows include pushes to a repository, creation of issues, and comments on discussion posts.

Triggering GitHub Actions:

Option D (Pushing to a GitHub repository) is correct because this is one of the most common triggers for CI/CD workflows.

Option F (Creating an Issue) is correct because issues are commonly used as triggers for workflows, such as automatically assigning a label or notifying a team.

Option A (Adding a comment to a discussion post) is correct because actions can be triggered by activity on discussion posts, including comments.

### NEW QUESTION # 28

Which of the following outcomes can be achieved with a branch protection rule?

- A. Restrict who can view the branch.
- **B. Require approval before merging changes.**
- C. Block code pushes that contain hardcoded secrets.
- D. Require two-factor authentication (2FA) by code contributors.

**Answer: B**

Explanation:

Managing a branch protection rule

You can create a branch protection rule to enforce certain workflows for one or more branches, such as requiring an approving review or passing status checks for all pull requests merged into the protected branch.

Reference:

<https://docs.github.com/en/repositories/configuring-branches-and-merges-in-your-repository/managing-protected-branches/managing-a-branch-protection-rule>

### NEW QUESTION # 29

Which of the following are counted in the contribution graph on a user's profile? (Choose two.)

- A. followers
- B. issues closed
- **C. pull requests created**
- **D. commits made**
- E. public repositories

**Answer: C,D**

Explanation:

What counts as a contribution

On your profile page, the following actions always count as contributions:

Creating a new repository

Forking an existing repository

The following actions sometimes count as contributions:

Opening an issue

[B] Proposing a pull request

Submitting a pull request review

Opening a discussion

Answering a discussion

[C] Making a commit

Reference:

<https://docs.github.com/en/account-and-profile/reference/why-are-my-contributions-not-showing-up-on-my-profile#what-counts-as-a-contribution>

### NEW QUESTION # 30

Which of the following is an Innersource development practice?

- A. Adopting open source code into the organization
- B. Removing open source code from the organization
- C. **Sharing code between teams within the organization**
- D. Making all repositories publicly accessible

**Answer: C**

Explanation:

Innersource is a development practice where an organization adopts open-source development methodologies within its own internal environment. The primary goal of innersource is to break down silos and encourage collaboration across different teams within the organization.

Sharing Code Between Teams:

Option B is correct because innersource involves sharing code between teams within the organization, similar to how open-source communities share code across the public domain. This practice fosters collaboration, improves code quality, and allows for reuse of code, reducing duplication of efforts.

Incorrect Options:

Option A is incorrect because adopting open-source code into the organization is related to using open-source software, not specifically to innersource practices.

Option C is incorrect because removing open-source code from the organization is contrary to the principles of both open source and innersource.

Option D is incorrect because making all repositories publicly accessible refers to open source, not innersource. Innersource typically involves keeping code internal to the organization.

Reference:

GitHub Docs: What is Innersource?

Innersource Commons: The Basics

### NEW QUESTION # 31

Which of the following information is available by default in a user's GitHub profile?

- A. **Personal biography and profile picture**
- B. Public Secure Shell Protocol (SSH) keys
- C. Email address and password
- D. A list of the user's private repositories

**Answer: A**

Explanation:

A user's GitHub profile typically includes public information such as a personal biography, profile picture, and a list of public repositories. More sensitive information, like email addresses and passwords, is not publicly displayed.

Personal Biography and Profile Picture:

Option A is correct because these are standard elements displayed on a user's public GitHub profile. This information is meant to provide a brief introduction to the user and their interests or skills.

## NEW QUESTION # 32

.....

The GH-900 Exam Dumps are compiled by experienced experts, they are quite familiar with the development the exam and they are also the specialists of the field.
