## Fortinet NSE NSE8 NSE Exam Practice Test

Fortinet Network configuration NSE8 NSE Practice exam, a way to boost your performance and acquiring 100% success in your final Fortinet Network configuration NSE8 NSE exam. Such Fortinet Network configuration NSE8 NSE exam gives you confidence to pass the Fortinet Network configuration NSE8 NSE exam with only a single attempt. Fortinet Network configuration NSE8 Network Configurations Practice exams offer you a 100% of guaranteed success and gives you the confidence to be a Fortinet Network configuration NSE8 Network Configurations certified professional and have the credentials you need to be the outstanding Fortinet Network configuration NSE8 NSE expert with mega skills. The one more plus point of these tests is of full syllabus coverage with hands-on-practice of different questions consist different scenarios.

### Use authentic preparation material – Pass4Leads NSE8 Practice Questions

You can easily pass your Fortinet NSE8 NSE exam if you prepare for your Fortinet NSE8 Fortinet Network Security Expert 8 Written Exam exam from an authentic source. Pass4Leads are highly reputed and can provide you with an authentic and real study material through which you can get success in Fortinet Network Security Expert certification exam. You just need to get Fortinet NSE8 Network configuration study material from Pass4Leads who are known in the market. Not only focus on study material you also need to prepare through NSE8 NSE practice exam, which can increase your performance in the real Fortinet NSE8 exam.

Sample output to test PDF Combine only

The NSE8\_813 study materials are mainly through three learning modes, Pdf, Online and software respectively. Among them, the software model is designed for computer users, can let users through the use of Windows interface to open the NSE8\_813 study materials of learning. It is convenient for the user to read. The NSE8\_813 study materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the NSE8\_813 Study Materials can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online more conveniently at the same time. As far as concerned, the online mode for mobile phone clients has the same function.

Of course, a personal learning effect is not particularly outstanding, because a person is difficult to grasp the difficult point of the test, the latest trend in an examination to have no good updates at the same time, in order to solve this problem, our NSE8\_813 study braindumps for the overwhelming majority of users provide a powerful platform for the users to share. Here, the all users of the NSE8\_813 Exam Questions can through own ID number to log on to the platform and other users to share and exchange, can even on the platform and struggle with more people to become good friend, pep talk to each other, each other to solve their difficulties in study or life. The NSE8\_813 prep guide provides user with not only a learning environment, but also create a learning atmosphere like home.

## Fortinet NSE8\_813 Accurate Questions and Answers

Our NSE8\_813 training materials are sold well all over the world, that is to say our customers are from different countries in the world, taking this into consideration, our company has employed many experienced workers to take turns to work at twenty four

hours a day, seven days a week in order to provide the best after sale services on our NSE8\_813 Exam Questions. So as long as you have any question about our NSE8\_813 exam engine you can just feel free to contact our after sale service staffs at any time, and our NSE8\_813 training materials will help you get your certification.

## Fortinet NSE 8 - Recertification Exam Sample Questions (Q90-Q95):

### NEW QUESTION # 90

A customer would like to improve the performance of a FortiGate VM running in an Azure D4s\_v3 instance, but they already purchased a BYOL VM04 license. Which two actions will improve performance the most without making a FortiGate license change? (Choose two.)

- A. Migrate the FortiGate to an Azure D8s\_v3.
- B. Enable SR-IOV on the FortiGate.
- C. Migrate the FortiGate to an Azure F4s\_v2.
- D. Enable "Accelerated networking" on the Azure network interfaces.

**Answer: C,D**

Explanation:

Migrate the FortiGate to an Azure F4s\_v2:

Azure F-series instances are designed for compute-intensive workloads and provide higher CPU performance compared to D-series instances. By migrating to an F4s\_v2 instance, the FortiGate VM can achieve better performance without requiring a license change.

Enable "Accelerated networking" on the Azure network interfaces:

Accelerated networking reduces network latency and jitter by bypassing the virtual switch and enabling direct packet processing in the Azure host's hardware (SR-IOV). This significantly improves network performance and reduces CPU overhead, enhancing the performance of the FortiGate VM.

### NEW QUESTION # 91

You have configured an HA cluster with two FortiGate devices. You want to make sure that you are able to manage the individual cluster members directly using port3.

```
config system ha
  set mode a-a
  set group-id 1
  set group-name main
  set hb dev port2 100
  set session-pickup enable
end
```

Referring to the configuration shown, in which two ways can you accomplish this task? (Choose two.)

- A. Create a management VDOM and disable the HA synchronization for this VDOM, assign port3 to this VDOM, then configure specific IPs for port3 on both cluster members.
- B. Allow administrative access in the HA heartbeat interfaces.
- C. Disable the sync feature on port3; then configure specific IPs for port3 on both cluster members.
- D. Configure port3 to be a dedicated HA management interface; then configure specific IPs for port3 on both cluster members.

**Answer: A,D**

### NEW QUESTION # 92

A company has just rolled out new remote sites and now you need to deploy a single firewall policy to all of these sites to allow Internet access using FortiManager. For this particular firewall policy, the source address object is called LAN, but its value will change according to the site the policy is being installed.

Which statement about creating the object LAN is correct?

- A. Create a new object called LAN and promote it to the global database.
- B. Create a new object called LAN and set meta-fields per remote site.
- C. Create a new object called LAN and use it as a variable on a TCL script.
- D. Create a new object called LAN and enable per-device mapping.

Answer: D

NEW QUESTION # 93

Refer to the exhibits.

**FortiSandbox**

FortiSandbox Inspection  Statistics...

FortiSandbox type: Appliance Cloud **Enhanced Cloud**

You must integrate a FortiMail and FortiSandbox Enhanced Cloud solution for a customer who is concerned about the e-mails being delayed for too long. According to the configuration shown in the exhibits, which would be an expected behavior?

- A. FortiMail will ignore the timeout value if content disarm and reconstruction (CDR) is enabled.
- B. If an attachment is sent to the FortiSandbox while the job queue is full, the e-mail might be delayed for up to 30 minutes,

then e-mail will be relayed to the mail server.

- C. FortiMail will not wait for results but only for attachments that have been already submitted to the FortiSandbox in the last 60 minutes.
- D. FortiMail will relay valid e-mails to the mail server as soon as it is done with other local inspections.

**Answer: B**

Explanation:

The FortiMail configuration integrates with FortiSandbox for attachment analysis. The timeout setting in FortiMail specifies how long it will wait for FortiSandbox to return analysis results before proceeding to relay the email. If the FortiSandbox job queue is full or delayed, the email could experience a delay.

If FortiSandbox is overloaded (job queue full), the email may experience a delay. Based on the configuration, the timeout value of 30 minutes suggests that emails may be delayed for up to 30 minutes before being relayed to the mail server if the FortiSandbox does not return results in time.

#### NEW QUESTION # 94

Refer to the configuration snippet:

```
config ips global
    set np-accel-mode basic
    set cp-accel-mode none
end
```

What will happen if you set the cp-accel-mode parameter to advanced? (Choose two.)

- A. The flow-based IPS signature correlation will be offloaded.
- B. nTurbo will be enabled.
- C. Enhanced IPSA will be enabled.
- D. The CP ASIC will start processing all IPS traffic.

**Answer: A,C**

Explanation:

Enhanced IPSA:

Setting the cp-accel-mode parameter to advanced enables enhanced IPS acceleration features that use the Content Processor (CP) to process IPS traffic more efficiently, including advanced signature matching.

Flow-based IPS Signature Correlation Offloading:

When cp-accel-mode is set to advanced, flow-based IPS traffic is offloaded to the CP for signature correlation, freeing up the CPU and improving performance.

#### NEW QUESTION # 95

.....

Our company has taken a lot of measures to ensure the quality of NSE8\_813 preparation materials. It is really difficult for yourself to hire a professional team, regularly investigate market conditions, and constantly update our NSE8\_813 exam questions. But we have all of them done for you. And our NSE8\_813 study braindumps have the advantage of high-effective. Just look at our pass rate of our loyal customers, with the help of our NSE8\_813 learning guide, 98% of them passed the exam successfully.
