

100% Pass 4A0-113 - Nokia OSPF Routing Protocol Exam—High Pass-Rate Updated Testkings

P.S. Free 2025 Nokia 4A0-113 dumps are available on Google Drive shared by ExamBoosts: https://drive.google.com/open?id=1FWLHIQ_7B2JHQW1m5rChDLO7GrRF1ULo

There are three different versions of our 4A0-113 preparation prep including PDF, App and PC version. Each version has the suitable place and device for customers to learn anytime, anywhere. In order to give you a basic understanding of our various versions on our 4A0-113 Exam Questions, each version offers a free trial. So there are three free demos of our 4A0-113 exam materials. And you can easily download the demos on our website.

Nokia 4A0-113 certification exam consists of 60 multiple-choice questions that must be completed within 90 minutes. The passing score for the exam is 80%, and candidates must demonstrate a solid understanding of OSPF principles and practices in order to pass. 4A0-113 Exam can be taken at authorized Nokia testing centers or online through the Nokia Learning Platform.

Valid Nokia 4A0-113 Exam Format & Valid 4A0-113 Exam Materials

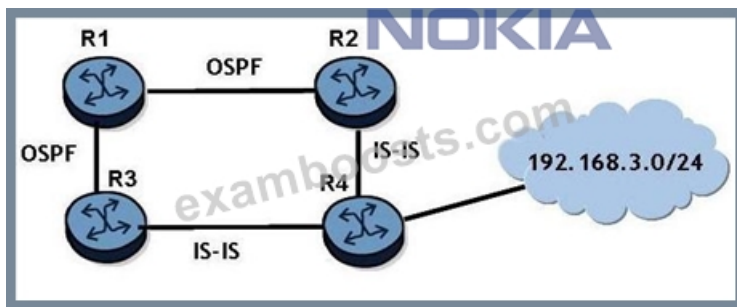

The Nokia OSPF Routing Protocol Exam (4A0-113) certification is a valuable credential that every Nokia professional should earn it. The Nokia 4A0-113 certification exam offers a great opportunity for beginners and experienced professionals to demonstrate their expertise. With the Nokia OSPF Routing Protocol Exam (4A0-113) certification exam everyone can upgrade their skills and knowledge. There are other several benefits that the 4A0-113 Exam holders can achieve after the success of the Nokia OSPF Routing Protocol Exam (4A0-113) certification exam. However, you should keep in mind to pass the Nokia 4A0-113 certification exam is not an easy task. It is a challenging job.

Nokia 4A0-113 Exam is a certification exam that tests the knowledge and skills of IT professionals in configuring and managing the Nokia OSPF routing protocol. Nokia OSPF (Open Shortest Path First) is a popular routing protocol used in modern computer networks. It is designed to efficiently route data packets between network devices, ensuring reliable and fast communication between devices. The Nokia 4A0-113 Exam is designed to test the candidate's ability to configure and troubleshoot Nokia OSPF routing protocols, as well as their knowledge of network protocols, routing algorithms, and network security.

Nokia OSPF Routing Protocol Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

Click the exhibit button.

If router R2 redistributes the IS-IS route to 192.168.3.0/24 into OSPF, router R3 will receive two routes to 192.168.3.0/24. What will be the preference of these two routes? Assume that all IS-IS routers are L1/L2 capable and are in the same area. Choose two answers.

- A. The OSPF external preference
- B. The IS-IS Level 2 external preference
- C. The IS-IS Level 1 external preference
- D. The OSPF internal preference
- E. The IS-IS Level 1 internal preference
- F. The IS-IS Level 2 internal preference

Answer: A,E

NEW QUESTION # 79

What is the protocol number for OSPF in the IP header?

- A. OSPF uses UDP, so the protocol number is 17.
- B. OSPF uses TCP, so the protocol number is 6.
- C. OSPF has its own protocol number of 89.
- D. OSPF does not use IP.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS OSPF Guide - OSPF Packet Transmission Section:

"OSPF is encapsulated directly over IP using protocol number 89. It does not use TCP or UDP." TCP (Protocol 6) # Incorrect.

UDP (Protocol 17) # Incorrect.

OSPF operates directly at IP layer using protocol number 89.

Thus, the correct answer is D.

NEW QUESTION # 80

What are the three databases maintained by a Link State Protocol?

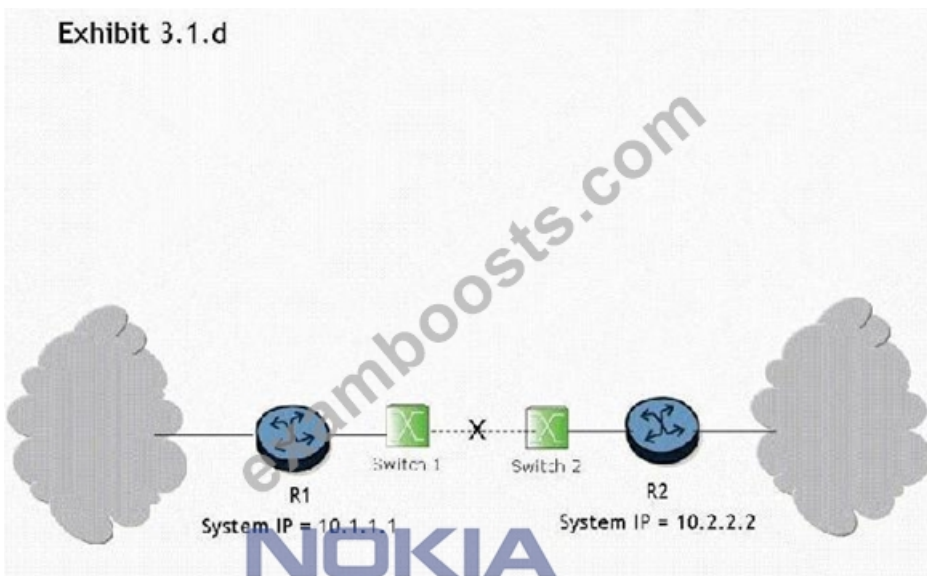

- A. Neighbor, topology, forwarding
- B. Neighbor, adjacency, route table
- C. There are only two databases: adjacency and topology
- D. Topology, routing, forwarding

Answer: A

NEW QUESTION # 81

Click the exhibit button.

Exhibit 3.1.d

What triggers convergence of the routing protocol when the link between switch 1 and switch 2 goes down?

- A. Convergence is triggered when an LSA is sent from router R1 to router R2 to indicate that the link is down. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged.
- B. Convergence is triggered when the switches notify the routers about the link state information. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged
- C. Convergence will not be triggered because switches cannot run routing protocols between them
- **D. Convergence is triggered when the adjacency between routers R1 and R2 drops as a result of Hello timeouts. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged.**
- E. Convergence is triggered when the physical interfaces between routers R1 and R2 go down. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged.

Answer: D

NEW QUESTION # 82

In which of the following types of areas does an OSPF router not set the E bit in its Type 1 LSA?

- A. Not so stubby area
- B. Backbone area
- **C. Stub area**
- D. Normal area

Answer: C

NEW QUESTION # 83
