SAP C_BCSBN_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understanding and Positioning SAP SCM Capabilities: This topic focuses on the ability to position the SAP Business Suite by emphasizing the features and benefits of SAP Supply Chain Management (SCM) solutions. It includes a strong understanding of how SAP SCM supports end-to-end supply chain processes such as demand planning, supply network planning, production planning, logistics, and order fulfillment.
Topic 2	<ul style="list-style-type: none">Integration and Strategic Value of SAP Business Suite with SCM: This section explores how the SAP Business Suite integrates with SAP SCM to improve overall supply chain performance. Candidates are assessed on their understanding of how this integration enhances visibility, collaboration, and responsiveness across the supply chain, enabling more efficient and agile operations.
Topic 3	<ul style="list-style-type: none">Customer Alignment and Value Communication: The final topic evaluates the ability to align SAP's supply chain solutions with specific customer business needs. It includes tailoring recommendations, addressing customer challenges, and clearly communicating value propositions. Sales professionals must demonstrate skills in articulating how SAP SCM delivers measurable business outcomes.

SAP Latest C_BCSBN_2502 Study Materials: SAP Certified Associate - Positioning SAP Business Suite via SAP Supply Chain Management Solutions - PDFBraindumps Professional Offer

By reviewing these results, you will be able to know and remove your mistakes. These C_BCSBN_2502 practice exams are created as per the pattern of the C_BCSBN_2502 real examination. Therefore, SAP Certified Associate - Positioning SAP Business Suite via SAP Supply Chain Management Solutions (C_BCSBN_2502) mock exam takers will experience the real exam

environment. It will calm down their nerves so they can appear in the SAP C_BCSBN_2502 final test without anxiety or fear.

SAP Certified Associate - Positioning SAP Business Suite via SAP Supply Chain Management Solutions Sample Questions (Q16-Q21):

NEW QUESTION # 16

How does carrier selection functionality in SAP TM optimize freight management in the global logistics network? Note: There are 2 correct answers to this question.

- A. Focuses on the lowest cost option available
- B. Automates international procurement processes
- C. Ensures transparency in transportation processes
- D. Improves production planning for transported materials

Answer: A,C

Explanation:

Solution:

The two correct benefits of the carrier selection functionality in SAP TM are:

1. Ensures transparency in transportation processes - The system provides a ranked list of eligible carriers, displaying real carrier rates, availability, and constraints, which promotes clarity in decision making.
2. Focuses on the lowest cost option available - During carrier selection, SAP TM uses optimization algorithms to find the most cost-effective carrier, taking into account constraints such as cost, priority, and equipment capacity.

Therefore, the correct answers are:

- * A. Focuses on the lowest cost option available
- * C. Ensures transparency in transportation processes

NEW QUESTION # 17

How does geolocation tracking in SAP Transportation Management reduce costs and improve carrier interactions for transporting perishable goods?

- A. Manages global logistics using real-time geolocation
- B. Optimizes financial processes
- C. Automates procurement
- D. Improves production processes

Answer: A

Explanation:

Solution:

Based solely on content from learning.sap.com (and related SAP documentation), the correct answer is:

- * D. Manages global logistics using real-time geolocation

Geolocation tracking in SAP Transportation Management, particularly via SAP Business Network Global Track & Trace, provides real-time visibility across global logistics networks. This functionality reduces costs and enhances interactions with carriers—especially for perishable goods—by enabling predictive ETAs, milestone awareness, event-triggered alerts, and seamless collaboration with carriers and logistics partners.

The other options (A, B, and C) are not relevant to geolocation tracking in this context.

NEW QUESTION # 18

How does the integration of product lifecycle management with logistics in SAP Transportation Management accelerate the market entry of new consumer products?

- A. Connects product development and logistics processes
- B. Aligns financial planning and resource management
- C. Increases production efficiency
- D. Automates procurement

Answer: A

Explanation:

Solution:

The correct answer from learning.sap.com is:

* B. Connects product development and logistics processes

This integration ensures that logistics considerations-such as packaging requirements, transportation planning, and distribution-are aligned directly with product design and development timelines, enabling faster time-to market for new consumer products.

NEW QUESTION # 19

How does real-time production orchestration in SAP Digital Manufacturing improve resource utilization within global manufacturing networks?

- A. Aligns financial optimization
- B. Manages production with AI automation in real-time
- C. Improves logistics
- D. Automates procurement

Answer: B

Explanation:

The correct answer is:

Solution:

B . Manages production with AI automation in real-time

SAP Digital Manufacturing's real-time Production Orchestration (Resource Orchestration) empowers supervisors to dispatch, schedule, monitor, and automatically balance production on a live basis-responding instantly to events on the shop floor and optimizing resources like labor, equipment, and materials us.io group.com+6learning.sap.com+6help.sap.com+6sap.com+8sap.com+8learning.sap.com+8.

Here's how the other options stack up:

- * A. Improves logistics - While orchestration connects operations with logistics, its primary purpose is on-floor execution and resource balancing-not optimizing logistics functions directly.
- * C. Automates procurement - This relates to supply chain/procurement modules in SAP, not manufacturing execution orchestration.
- * D. Aligns financial optimization - Financial alignment comes primarily from ERP integration, not from real-time production orchestration.

So the best fit is option B.

NEW QUESTION # 20

How do inventory optimization features in SAP IBP help companies to improve transparency in inventory management?

- A. Establishes connections between data sources
- B. Automates financial reporting
- C. Simplifies procurement procedures
- D. Integrates third-party systems

Answer: A

Explanation:

Solution:

The correct answer from learning.sap.com on how inventory optimization in SAP IBP improves transparency in inventory management is:

* B. Establishes connections between data sources.

SAP IBP enhances transparency by integrating diverse data-real-time ERP figures, forecasting models, supply signals, and external inputs-into a unified planning platform. This centralized visibility ensures stakeholders across the supply chain can make informed, aligned decisions based on real-time inventory insights.

Options A, C, and D are not highlighted in the context of transparency via inventory optimization on learning.sap.com.

NEW QUESTION # 21

.....

Our C_BCSBN_2502 practice prep is so popular and famous for it has the advantage that it can help students improve their test scores by improving their learning efficiency. Therefore, users can pass C_BCSBN_2502 exams with very little learning time. For another example, there are some materials that apply to students with professional backgrounds that are difficult for some industry rookie to understand. But our C_BCSBN_2502 Learning Materials are compiled to simple language for our customers to understand easily.
