## Free Salesforce OmniStudio-Developer Download, OmniStudio-Developer Answers Real Questions

The OmniStudio-Developer mock tests are specially built for you to evaluate what you have studied. These Salesforce Certified OmniStudio Developer (OmniStudio-Developer) practice exams (desktop and web-based) are customizable, which means that you can change the time and questions according to your needs. Our OmniStudio-Developer Practice Tests teach you time management so you can pass the Salesforce Certified OmniStudio Developer (OmniStudio-Developer) certification exam.

Salesforce OmniStudio platform is a powerful tool that allows developers to build and manage complex business processes within Salesforce. It provides a suite of tools and services that enable developers to create customized solutions that meet the unique needs of their organizations. The platform helps businesses automate their processes, streamline their operations, and improve their overall efficiency. With the Salesforce OmniStudio-Developer Certification, developers can demonstrate their ability to leverage the platform to deliver these benefits to their clients and organizations.

To prepare for the Salesforce OmniStudio-Developer Exam, candidates should have a thorough understanding of the Salesforce platform and its various tools and features. They should also have hands-on experience in building custom applications using Apex, Visualforce, and Lightning Components. Salesforce offers a range of training resources and study materials to help candidates prepare for the exam, including instructor-led courses, online tutorials, and practice exams. By dedicating time and effort to studying and practicing, developers can increase their chances of passing the exam and earning the valuable Salesforce Certified OmniStudio Developer credential.

## Salesforce Certified OmniStudio Developer Sample Questions (Q49-Q54):

### NEW QUESTION # 49

An OmniScript displays data from an API using Integration Procedure, but some of the data is missing. Which two configuration errors could cause this? Choose 2 answers

- A. The JSOW sent from the Integration Procedure Action does not match any of the Original Input for the Integration Procedure
- B. The Integration Procedure Preview Input Parameters do not match the JSON sent from the OmniScript.
- C. The missing data is trimmed in the Integration Procedure Action Response JSON Path.
- D. The element name for the missing data does not match the JSON node key in the Integration Procedure Response.

**Answer: C,D**

### NEW QUESTION # 50

A customer sets up to LWC Omniscripts, one embedded into another. Account is set in a Set Values element in the parent Omniscript.

The AccountId set in the parent Omniscript is used to another Set Values element ContextAccountId in the embedded Omniscript. The embedded Omniscript is activated.

While previewing the OmniScript flow from the parent, it is found that Account is set correctly in the parent OmniScript. However, ContextAccountId in the embedded OmniScript is not set with the AccountId from parent Omniscript. On previewing the embedded OmniScript individually, it is found that ContextAccountId is set correctly.

What is the reason for this? Refer to the exhibit below.

■

- A. The flag passDataJSON in the parent OmniScript is not configured correctly.
- B. Both parent and embedded OmniScripts have the same element name for the Set values element.
- C. The LWC PubSub Message flag in the Set Values action of the parent has not been set.
- D. A developer failed to include a Navigation Element to pass data from the parent OmniScript.

**Answer: C**

### NEW QUESTION # 51

Which three are true about Calculation Matrix inputs? Choose 3 answers

- A. They must be unique.
- B. They can represent ranges.
- C. They can be a combination of values.
- D. They must contain numerical data.

**Answer: A,B,C**

### NEW QUESTION # 52

Which two in an integration Procedure or DataRaptor can execute a function like CONCAT or DATEDIFF? Choose 2 answers

- A. In a Remote Action in an Additional Output value field.
- B. In a Set Values Action in a Value field.
- C. In a DataRaptor Action in an Input Parameters value field.
- D. In a DataRaptor in an Output TabOutput JSON Path.

**Answer: A,B**

Explanation:

A Set Values Action in a Value field and a Remote Action in an Additional Output value field can execute a function like CONCAT or DATEDIFF by using the syntax `{{function(parameters}}}`. For example, `{{CONCAT('Hello', 'World')}}}` or `{{DATEDIFF('2021-01-01', '2021-01-31')}}}`.

### NEW QUESTION # 53

A developer creates an OmniScript to update billing information. After analyzing the different types of customer interactions that occur at the company, the developer determines updating billing information should be included in the majority of customer interactions, which are represented by more than 20 different FlexCards.

What is the most efficient way for the developer to configure the action that invokes the OmniScript?

- A. As a Custom Action
- B. As an OS Action
- **C. As an OmniStudio Action**
- D. As a Lightning Action

**Answer: C**

### NEW QUESTION # 54
