利用Sharing-and-Visibility-Architect參考資料資料，快速通過Salesforce Certified Sharing and Visibility Architect

你用過NewDumps的Sharing-and-Visibility-Architect考古題嗎？這個考古題是最近剛更新的資料，包括了真實考試中可能出現的所有問題，保證你一次就可以通過考試。這個考古題可以讓你看到你意想不到的成果。如果你考試失敗NewDumps將會全額退款，所以請放心使用。利用NewDumps的考試資料，你肯定可以得到你想要的成功。

最新的 Salesforce Architect Sharing-and-Visibility-Architect 免費考試真題 (Q26-Q31):

問題 #26

A banking company wants their customers Date of Birth Field searchable by Banking Reps, but only editable by Customer Support Reps.

Which approach is recommended to meet this requirement?

- A. Set the Field Level Security for the Date of Birth field to be Visible to Customer Support Rep Profile, and set the Date of Birth Field Visible and Read-only to Banking Rep profile.
- B. Add Date of Birth field to the Search layout of the Contact Object. Modify the Page layout assigned to Customer Support Rep and add Date of Birth field as Required.
- C. Create a Validation rule in the Date of Birth field so the rule returns true only when user.profilename matches Customer Support Rep.

答案：A

解題說明：

Explanation

Setting the Field Level Security for the Date of Birth field to be Visible to Customer Support Rep Profile, and set the Date of Birth Field Visible and Read-only to Banking Rep profile is the best approach to meet this requirement, as it allows admins to control who can see and edit a specific field on an object. Creating a Validation rule in the Date of Birth field so the rule returns true only when user.profilename matches Customer Support Rep will work, but it will require additional logic and error handling. Adding Date of Birth field to the Search layout of the Contact Object and modifying the Page layout assigned to Customer Support Rep and adding Date of Birth field as Required will not work, as it will only affect how the field is displayed and searched, not who can edit it.

問題 #27

Universal Containers (UC) uses a custom lightning component with an Apex class to display shipment information (custom object, private OWD). UC sales managers are complaining about two important points:

- * Shipment records that belong to their teams can be seen by other users.
- * Shipment amount should be visible only by managers, but sales reps are able to view it. Which two features did the development team miss that is causing the problems?

Choose 2 answers.

- A. Use isSharable keyword in Apex classes to assure record visibility.
- B. Use run as in test class to enforce user permissions and field-level permissions.
- **C. Use isAccessible() method in Apex classes to check field accessibility**
- D. Use with Sharing keyword in Apex classes to enforce sharing rules evaluation.

答案: C

問題 #28

Mary is Joe's manager in the Role Hierarchy. The organization-wide default for a custom Invoice object is Public Read-Only, and Mary's profile is not granted the Read permission for the Invoice object.

Which action can Mary take on Joe's invoice records?

- A. Read/Write
- **B. None**
- C. View Only

答案: B

解題說明:

Even though Mary is Joe's manager in the Role Hierarchy, the lack of Read permission for the Invoice object on Mary's profile prevents her from viewing Joe's invoice records. Salesforce enforces object-level permissions, which override sharing rules, OWD settings, and role hierarchy. Without the Read permission on the Invoice object, Mary cannot access the records, even with Public Read-Only OWD or Role Hierarchy privileges.

:

Role Hierarchy and Object Permissions

問題 #29

The Finance team at Universal Containers usually does not need access to Account and Contract records. A given Opportunity access for a big deal to help with tax calculation. She can now also access Account and C.

Which two reasons could be causing this issue? Choose 2 answers

- A. Contact records can be accessed due to implicit sharing from Account.
- B. Contact records can be accessed due to implicit sharing from Opportunity.
- **C. Account records can be accessed due to implicit sharing from Opportunity.**
- **D. Account records can be accessed due to role hierarchy.**

答案: C,D

解題說明:

Explanation

Account records can be accessed due to implicit sharing from Opportunity and Account records can be accessed due to role hierarchy are two reasons that could be causing this issue. Implicit sharing grants access to parent records when a user has access to

a child record. For example, if a user has access to an opportunity, they also have access to its related account and contract records. Role hierarchy grants access to records owned by or shared with users who are below in the hierarchy. For example, if a user is above another user in the role hierarchy, they can access any records that the lower user can access. Option A is incorrect, since contact records cannot be accessed due to implicit sharing from account, as implicit sharing does not grant access to child records. Option C is incorrect, since contact records cannot be accessed due to implicit sharing from opportunity, as implicit sharing does not grant access to child records.

問題 #30

Universal Containers wants to create a way to store sensitive Invoice Data in Salesforce. A User who owns an Account should not see every Invoice, but only invoices that they or their subordinates own. Which two features should be considered during this solution implementation?

Choose 2 answers.

- A. Deploy the Relationship between Accounts and the Invoices Object as Lookup.
- B. Create a Workflow that populates the Invoice sharing object upon Insert.
- C. Ensure that the Organization-Wide Default sharing for Invoices is set to Private.
- D. Deploy the Relationship between Accounts and the Invoices Object as Master-Detail.

答案: C,D

解題說明:

Explanation

To store sensitive invoice data in Salesforce, the architect should consider using a master-detail relationship between accounts and invoices, and setting the organization-wide default sharing for invoices to private. This would ensure that only the owners of the invoices and their subordinates can see them, and that the invoices inherit the sharing settings of the accounts. A workflow that populates the invoice sharing object upon insert is not necessary if the master-detail relationship is used. A lookup relationship between accounts and invoices would not enforce the same level of security and visibility as a master-detail relationship.

問題 #31

.....

適當的選擇培訓是成功的保證，但是選擇是相當重要的，NewDumps的知名度眾所周知，沒有理由不選擇它。當然，如果涉及到完善的培訓資料給你，如果你不適用那也是沒有效果的，所以在利用我們NewDumps的培訓資料之前，你可以先下載部分免費試題及答案作為試用，這樣你可以做好最真實的考試準備，以便輕鬆自如的應對Sharing-and-Visibility-Architect測試，這也是為什麼成千上萬的考生依賴我們NewDumps的重要原因之一，我們提供的是最好最實惠最完整的Sharing-and-Visibility-Architect考試培訓資料，以至於幫助他們順利通過測試。

Sharing-and-Visibility-Architect最新考古題: <https://www.newdumpspdf.com/Sharing-and-Visibility-Architect-exam-new-dumps.html>

那就趕緊使用NewDumps Salesforce的Sharing-and-Visibility-Architect考試培訓資料吧，它包括了試題及答案，對每位IT認證的考生都非常使用，它的成功率高達100%，心動不如行動，趕緊購買吧，Salesforce Sharing-and-Visibility-Architect參考資料 那麼你知道什麼是適當的方法嗎，Salesforce Sharing-and-Visibility-Architect參考資料 有捷徑可以讓我順利通過考試嗎，NewDumps的專家團隊以他們的豐富的專業知識和經驗幫助你增長知識，並且給你能提供Sharing-and-Visibility-Architect認證考試的相關練習題和答案，如果你選擇了NewDumps Sharing-and-Visibility-Architect最新考古題，你可以100%通過考試，對Sharing-and-Visibility-Architect問題集中的考題需要做到什麼程度的理解和掌握？

更重要的是，他們竟然已經抹殺了九百多位來自於西方國度的人類幼童，壹、暗示的兩面性 氣功產生效應的基本原理是暗示，包括自我暗示和他人暗示，那就趕緊使用NewDumps Salesforce的Sharing-and-Visibility-Architect考試培訓資料吧，它包括了試題及答案，對每位IT認證的考生都非常使用，它的成功率高達100%，心動不如行動，趕緊購買吧。
