

Exam HQT-4160 Forum & HQT-4160 Exam Review

EXAM DESCRIPTION

**Hitachi Vantara Qualified Professional
VSP 5000 Series Installation
HQT-4160 Exam**

Exam Type
Qualification

Format
Proctored, closed book exam

Credential
Hitachi Vantara Qualified Professional - VSP 5000 Series Installation

Validity 3 years

Delivery
[Kyrion Webassessor System](#)*

Questions 35

Passing Score 65%

Duration 60 minutes

Cost
US \$100 or equivalent in local currency (plus local tax, depending on location)

Supporting Material
• 1090Pi - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1	System Architecture
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2	System Pre-Installation and Installation
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3	System Configuration
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

Being respected and gaining a high social status maybe what you always long for. But if you want to achieve that you must own good abilities and profound knowledge in some certain area. Passing the HQT-4160 certification can prove that and help you realize your goal and if you buy our HQT-4160 Quiz prep you will pass the HQT-4160 exam successfully. Our product is compiled by experts and approved by professionals with years of experiences. You can download and try out our latest HQT-4160 quiz torrent freely before your purchase.

Hitachi HQT-4160 certification exam is an essential credential for IT professionals who want to demonstrate their expertise in installing and configuring Hitachi Vantara's VSP 5000 Series storage solutions. Hitachi Vantara Qualified Professional - VSP 5000 Series Installation certification validates the skills and knowledge of professionals who work with large-scale enterprise storage systems and is a valuable asset for those looking to advance their careers in storage management.

Hitachi HQT-4160 certification exam covers a range of topics, including pre-installation planning, installation and configuration of the VSP 5000 Series storage system, and post-installation tasks such as troubleshooting and maintenance. HQT-4160 Exam is designed to test the candidate's knowledge of the Hitachi Vantara VSP 5000 Series storage system and their ability to install and configure it effectively. Successful completion of the exam demonstrates that the candidate has the skills and knowledge required to install and configure the VSP 5000 Series storage system to meet the needs of modern data centers.

HQT-4160 - Newest Exam Hitachi Vantara Qualified Professional - VSP 5000

Series Installation Forum

The PassCollection is a leading platform that has been assisting the Hitachi HQT-4160 exam candidates for many years. Over this long time period countless HQT-4160 exam candidates have passed their Hitachi HQT-4160 Exam. They got success in Hitachi Vantara Qualified Professional - VSP 5000 Series Installation exam with flying colors and did a job in top world companies.

Hitachi HQT-4160: Hitachi Vantara Qualified Professional - VSP 5000 Series Installation exam is a great way for professionals to demonstrate their expertise in working with Hitachi Vantara VSP 5000 Series storage systems. Passing HQT-4160 Exam is a great way for professionals to enhance their career prospects and to demonstrate their commitment to their profession. With the growing demand for professionals with expertise in storage and data management, this certification is sure to open up many exciting career opportunities.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which two statements are true about the spare drive in a VSP 5000 system? (Choose two.)

- A. The VSP 5000 system will allocate a spare slot automatically if "Spare slot allocation" is set to "Variable" at installation time.
- B. The customer can decide which slot is to be used for the spare drive.
- C. Only slot 11 and slot 23 of DBS2 can be used as spare.
- D. If one of the slot 11 of the SBX is used as spare, the 3 remaining slots 11 could only be used as spare.

Answer: A,B

Explanation:

The customer can decide which slot is to be used for the spare drive.

With "Fixed" spare slot allocation, the customer has the flexibility to select which drive slot will serve as the spare during system configuration.

The VSP 5000 system will allocate a spare slot automatically if "Spare slot allocation" is set to "Variable" at installation time.

If the "Variable" option is chosen for spare slot allocation, the system automatically selects and assigns spare drive locations.

NEW QUESTION # 19

When a hot spare drive is activated in a VSP 5000 system, it's important to:

- A. Reconfigure the RAID settings
- B. Power down the system to avoid data loss
- C. Perform a full backup of the system
- D. Immediately order a replacement for the hot spare

Answer: D

Explanation:

In the Hitachi VSP 5000 storage system, a hot spare is a drive reserved to automatically replace a failing drive in a RAID group. When it is activated:

The hot spare takes over the failed drive, and RAID rebuild begins.

At this point, the system no longer has a spare available for future failures.

Therefore, it is critical to order and install a new hot spare as soon as possible to maintain full redundancy and data protection.

NEW QUESTION # 20

Which document is essential to review before starting the pre-installation process for a VSP 5000 storage system?

- A. The customer service plan
- B. The annual maintenance contract
- C. The latest software compatibility list
- D. The installation site requirements

Answer: D

Explanation:

Before beginning the pre-installation process for a Hitachi VSP 5000, it is crucial to review the installation site requirements. This ensures that the physical environment is suitable for the system and meets operational standards. Key factors include:

Rack space and floor loading for the storage system

Power requirements (voltage, redundancy, and distribution)

Cooling and airflow specifications

Network connectivity requirements

Environmental considerations such as humidity, temperature, and dust control

Reviewing this document helps avoid delays, prevent equipment damage, and ensures a smooth installation.

NEW QUESTION # 21

Which statement is correct regarding the Interconnect Switches (ISWs) on VSP 5000 systems?

- **A. ISWs are standalone, optional switches that can be used for both network and data path.**
- B. ISWs are switches that route data between nodes using Hitachi Interconnect Edge and X-Path cables, and they are located on the Hitachi Service and Network Boxes (HSNBXs).
- C. ISWs are switches that provide redundancy for data path and they are only used when the number of CBX pairs is higher than two.
- D. ISWs are switches that route data between nodes and they are located on each controller of the node.

Answer: A

Explanation:

The Interconnect Switches on a VSP 5000 are delivered as standalone 1 U switch chassis that house both the PCIe "interconnect" modules (for routing data between controller nodes) and an Ethernet switch (for management/network traffic), so they serve both network and data-path roles.

NEW QUESTION # 22

During the parts-replacement process on a VSP 5000 storage system, what is the recommended action before removing any component?

- A. Notifying all connected users about the impending downtime
- **B. Ensuring the system is in maintenance mode**
- C. Documenting the serial number of the component
- D. Isolating the power supply to the specific component

Answer: B

Explanation:

Before replacing any component in a Hitachi VSP 5000 storage system, it is critical to put the system or the affected controller/module into maintenance mode.

This ensures:

No active I/O is directed to the component being replaced.

Data integrity is preserved during the removal and replacement process.

The system prevents accidental disruptions to other parts of the storage array.

Automatic failover or rebuild processes do not interfere with the replacement.

NEW QUESTION # 23
