Nowadays there is a growing tendency in getting a certificate. Plat-Dev-210 study materials offer you an opportunity to get the certificate easily. Plat-Dev-210 exam dumps are edited by the experienced experts who are familiar with the dynamics of the exam center, therefore Plat-Dev-210 Study Materials of us are the essence for the exam. Besides we are pass guarantee and money back guarantee. Any other questions can contact us anytime.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> OmniScripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 2	<ul style="list-style-type: none"> Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.
Topic 3	<ul style="list-style-type: none"> Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
Topic 4	<ul style="list-style-type: none"> Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.

Useful Salesforce Plat-Dev-210 Dumps | Reliable Plat-Dev-210 Exam Answers

As you can see, the most significant and meaning things for us to produce the Plat-Dev-210 training engine is to help more people who are in need all around world. So our process for payment is easy and fast. Our website of the Plat-Dev-210 study guide only supports credit card payment, but do not support card debit card, etc. Pay attention here that if the money amount of buying our Plat-Dev-210 Study Materials is not consistent with what you saw before, and we will give you guide to help you.

Salesforce Certified Omnistudio Developer Sample Questions (Q63-Q68):

NEW QUESTION # 63

A developer has a requirement to create a child FlexCard that contain all of its parent FlexCard's records in a Datatable.

- A. {Records}
- B. {recordId}
- C. {Params records}
- D. {Records[0]}

Answer: A

Explanation:

The correct syntax for passing all of the parent FlexCard's records to a child FlexCard is {Records}, which represents an array of records. The other options are incorrect because they either use an invalid syntax or refer to a single record instead of an array of records.

NEW QUESTION # 64

A developer creates an OmniScript to update billing information. After analyzing the different types of customer interactions that occur at the company, the developer determines updating billing information should be included in the majority of customer interactions, which are represented by more than 20 different FlexCards.

What is the most efficient way for the developer to configure the action that invokes the OmniScript?

- A. As a Lightning Action
- B. As an OmniStudio Action
- C. As a Custom Action
- D. As an OS Action

Answer: D

Explanation:

An OS Action is the most efficient way to configure the action that invokes the OmniScript, as it allows the developer to reuse the same OmniScript across multiple FlexCards without creating separate actions for each one. A Custom Action is used to invoke a custom Apex class or Lightning web component. An OmniStudio Action is used to invoke an Integration Procedure or a Calculation Procedure. A Lightning Action is used to invoke a Lightning component or a Visualforce page.

NEW QUESTION # 65

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields are input: Account id and Product Id. The integration Procedure data JSON contains the following nodes:

How should the Remote Action element be configured to pass the data correctly to the method?

- A. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.
- B. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:
- C. Add the following to Send JSON Path: accountId: %Accountd% ProductId% Details Products%
- D. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additional input:

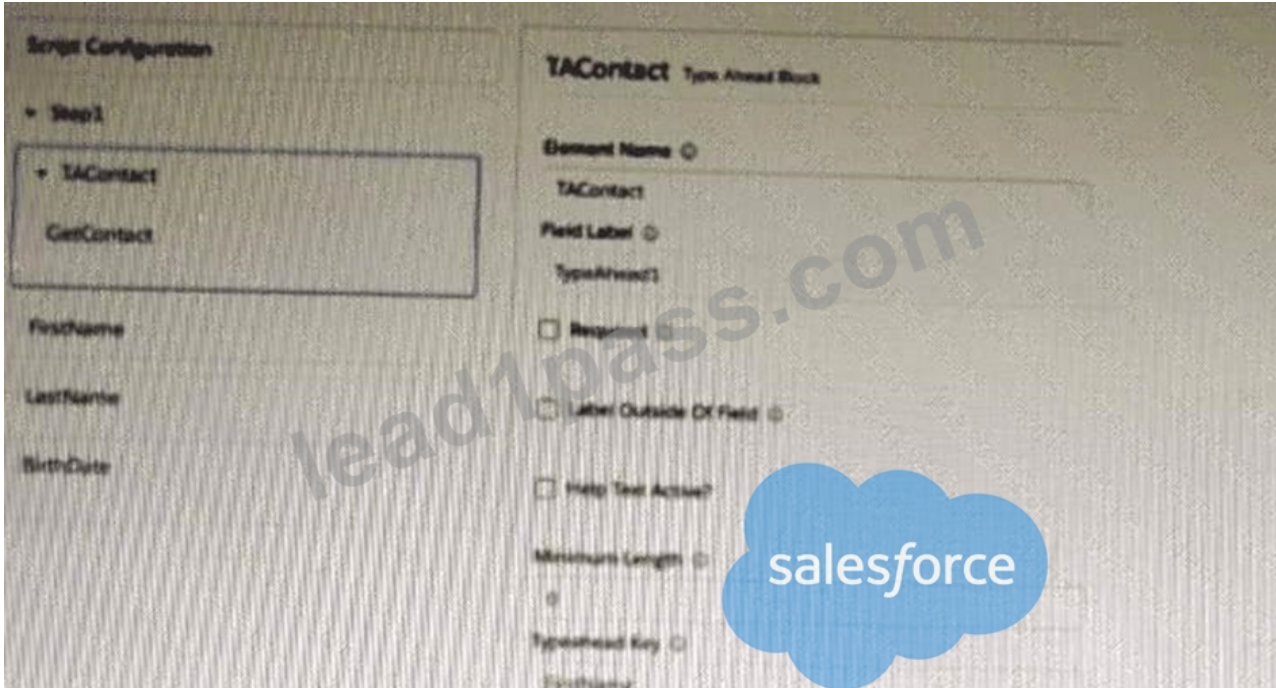

Answer: D

Explanation:

Checking the Send Only Additional Input checkbox allows the Remote Action element to send only the key /value pairs specified in Additional input to the Apex method. The Additional input should have the same keys as the method parameters, and the values should be set to `{{InputData.node}}` for each node. For example, `AccountId: {{InputData.AccountId}}` and `ProductId: {{InputData.Details.Products}}`.

NEW QUESTION # 66

Refer to the exhibit below.

What is the reason that the fields fail to display the fetched data?

- A. Use Data JSON is Not selected in the properties of the Type Ahead Block.
- B. FirstName, LastName, and BirthDate are not placed inside the Type Ahead Block.
- C. The typeHead key is not in the correct format.
- D. Lookup Mode is selected in the properties of the Type Ahead Block.

Answer: A

Explanation:

The Use Data JSON property must be selected in the properties of the Type Ahead Block in order to display the fetched data in the fields. The Lookup Mode property is used to specify the type of lookup to perform. The FirstName, LastName, and BirthDate fields can be placed inside or outside the Type Ahead Block. The typeHead key is in the correct format.

NEW QUESTION # 67

On a FlexCard canvas, several fields display with Salesforce data, but one of the fields shows only the label. What could cause this?

- A. In the FlexCard state, the Field type for the field does not match the type in the Salesforce record.
- B. There are No test Data test Parameters configured.
- C. The field name in the FlexCard state does not match the DataRaptorExtract's Output JSON Path name.
- D. In the Setup Pabel, {recordId} is misspelled in the Data Source Input Map.

Answer: C

Explanation:

According to the FlexCard Designer Overview page, one possible cause of a field showing only the label is that "the field name in the FlexCard state does not match the DataRaptor Extract's Output JSON Path name".

NEW QUESTION # 68

.....

Lead1Pass Plat-Dev-210 even guarantees that you will crack the Salesforce Certified Omnistudio Developer (Plat-Dev-210) test on the first try by using our dumps. If you fail to achieve success in the Salesforce Certified Omnistudio Developer (Plat-Dev-210) examination, then you can get a full refund according to terms and conditions.
