

Try VMware 2V0-17.25 Questions To Clear Exam in First Endeavor

2026 Latest ExamsReviews 2V0-17.25 PDF Dumps and 2V0-17.25 Exam Engine Free Share: https://drive.google.com/open?id=1m-uob_TYNRYI-Z3jUUDFRyTrxEOWkv-V

Our 2V0-17.25 test torrent keep a look out for new ways to help you approach challenges and succeed in passing the 2V0-17.25 exam. And our 2V0-17.25 qualification test are being concentrated on for a long time and have accumulated mass resources and experience in designing study materials. There is plenty of skilled and motivated staff to help you obtain the 2V0-17.25 Exam certificate that you are looking forward. We have faith in our professional team and our 2V0-17.25 study tool, and we also wish you trust us wholeheartedly.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 2	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.
Topic 3	<ul style="list-style-type: none">VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 4	<ul style="list-style-type: none">Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.

Free PDF Quiz 2026 2V0-17.25: Efficient Valid Test VMware Cloud Foundation 9.0 Administrator Format

As is known to us, there are best sale and after-sale service of the 2V0-17.25 certification training dumps all over the world in our company. Our company has employed a lot of excellent experts and professors in the field in the past years, in order to design the best and most suitable 2V0-17.25 latest questions for all customers. More importantly, it is evident to all that the 2V0-17.25 Training Materials from our company have a high quality, and we can make sure that the quality of our products will be higher than other study materials in the market. If you want to pass the 2V0-17.25 exam and get the related certification in the shortest time, choosing the 2V0-17.25 training materials from our company will be in the best interests of all people.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q80-Q85):

NEW QUESTION # 80

An administrator is responsible for managing a VMware Cloud Foundation (VCF) instance. The administrator has been tasked with configuring VCF Automation to support a new critical project that requires logical isolation from the other ongoing development activities located within the workload domain.

The administrator has been tasked with completing the following:

- Ensure that all workloads for the project can only be managed by the application development (appdev) team.
- Ensure that all workloads for the appdev project only get deployed to one of the newly created network segments.
- Ensure that the self-service user can specify the VLAN number which will determine which appdev network a workload gets deployed to.
- Ensure that all workloads deployed to appdev segments automatically get an IP address from the internal IPAM solution.

The administrator completed the following tasks:

- Creates the necessary network infrastructure including new segments in NSX.
- Creates a new VCF Automation project and configures appdev team access to the project.

Before starting to develop any templates for the new appdev project, what three additional tasks in VCF Automation must the administrator complete to allow the deployment of workloads to different clusters? (Choose three.)

- **A. Add a capability tag using vlan: <number> to each corresponding appdev network segment based on the vlan number.**
- **B. Add the net: appdevcapability tag to all network segments discovered by NSX.**
- C. Create a new network profile, include all appdev network segments in the network profile and add the net: appdevtag to the profile.
- D. Add all appdev networks to the existing development project's network profile.
- **E. Configure each appdev network with a gateway, subnet mask and IP range from the internal IPAM.**
- F. Create a custom group that specifies the network name.

Answer: A,B,E

Explanation:

VCF Automation requires capability tags on discovered NSX network segments to make them selectable and enforce placement constraints, so tagging appdev segments with the appropriate network capability is required. Each appdev network must be configured with gateway, subnet, and IP ranges so the internal IPAM can automatically assign IP addresses during deployment. VLAN-based placement selection is achieved by applying a vlan capability tag to each network segment, allowing self-service users to choose a VLAN number that determines the target appdev network.

NEW QUESTION # 81

An administrator needs to manage a large inventory of VMs spread across multiple data centers. Which features in vCenter can help organize these objects effectively?

- A. vSphere Pod Security
- **B. Resource Pools for CPU/memory grouping**
- **C. Tags and custom attributes**

- D. Folders for grouping VMs logically

Answer: B,C,D

Explanation:

vCenter Folders (A), Resource Pools (B), and Tags/attributes (D) all help categorize and manage large inventories. "vSphere Pod Security" (C) is not a standard vCenter feature.

NEW QUESTION # 82

An administrator needs to secure an ESXi host in their environment by enabling lockdown mode. What two steps should be taken to secure the ESXi host using lockdown mode? (Choose two.)

- A. Navigate to the host's settings in the vSphere Client.
- B. Reboot the host to apply the lockdown settings.
- C. Add the host to a dedicated security group in Active Directory.
- D. Disable SSH and the ESXi Shell.
- E. Enable "Strict Lockdown Mode" to restrict all direct access to the host.

Answer: A,E

Explanation:

To enable lockdown mode, you first need to navigate to the ESXi host's settings in the vSphere Client, where you can configure security settings such as lockdown mode.

Enabling "Strict Lockdown Mode" restricts all direct access to the ESXi host, ensuring that only authorized users can manage the host through vCenter and preventing direct login via the ESXi console or SSH.

NEW QUESTION # 83

An administrator is responsible for managing a VMware Cloud Foundation (VCF) Automation organization within a VCF instance. The administrator has been tasked with updating an VMware NSX VPC by editing the NSX Connectivity profile for an NSX Project. The current profile was generated automatically when the NSX VPC was created. What is the impact of the administrator making this change to the NSX VPC?

- A. Only the selected NSX VPC will be updated with the new VPC connectivity profile.
- B. All NSX VPCs that use the default VPC connectivity profile will be updated with the new VPC connectivity profile.
- C. All NSX VPCs associated with the VCF Automation organization will be updated with the new VPC connectivity profile.
- D. Only the NSX VPCs within the corresponding NSX Project will be updated with the new VPC connectivity profile.

Answer: A

Explanation:

When an administrator edits the NSX connectivity profile for an NSX Project, the change applies only to the specific NSX VPC that was selected. Each NSX VPC maintains its own connectivity profile, even if it was generated automatically at creation. Updates do not cascade to other VPCs in the project or across the organization.

NEW QUESTION # 84

Which statement describes Harbor?

- A. Harbor is an open source registry that secures artifacts with policies and RBAC, scans images for vulnerabilities, and signs images as trusted.
- B. Harbor, formerly known as Bitnami, is an image catalog for downloading verified open-source packages.
- C. Harbor requires all images be pulled from GitHub for validation.
- D. Harbor is an image scanner used to verify that images are free from vulnerabilities and patches.

Answer: A

Explanation:

Harbor is an open source registry that secures artifacts with policies and role-based access control, ensures images are scanned and free from vulnerabilities, and signs images as trusted.

NEW QUESTION # 85

.....

If you want to be an excellent elites in this line, you need to get the 2V0-17.25 certification, thus it can be seen through the importance of qualification examination. Only through qualification examination, has obtained the corresponding qualification certificate, we will be able to engage in related work, so the 2V0-17.25 Test Torrent is to help people in a relatively short period of time a great important tool to pass the qualification test. Choose our 2V0-17.25 study tool, can help users quickly analysis in the difficult point, and pass the 2V0-17.25 exam successfully.
