Reliable SPLK-1003 Exam Registration - SPLK-1003 Reliable Exam Guide

You only need 20-30 hours to learn our SPLK-1003 test braindumps and then you can attend the exam and you have a very high possibility to pass the exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our SPLK-1003 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Splunk Enterprise Certified Admin exam torrent. Our answers and questions are compiled elaborately and easy to be mastered. Because our SPLK-1003 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

Splunk Enterprise Certified Admin Sample Questions (Q108-Q113):

NEW QUESTION # 108
Which option accurately describes the purpose of the HTTP Event Collector (HEC)?

- A. A token-based HTTP input that is secure and scalable and that requires the use of forwarders
- B. A token-based HTTP input that is secure and scalable and that does not require the use of forwarders.
- C. An agent-based HTTP input that is secure and scalable and that does not require the use of forwarders.
- D. A token-based HTTP input that is insecure and non-scalable and that does not require the use of forwarders.

Answer: B

Explanation:
Explanation
https://docs.splunk.com/Documentation/Splunk/8.2.2/Data/UsetheHTTPEventCollector
"The HTTP Event Collector (HEC) lets you send data and application events to a Splunk deployment over the HTTP and Secure HTTP (HTTPS) protocols. HEC uses a token-based authentication model. You can generate a token and then configure a logging library or HTTP client with the token to send data to HEC in a specific format. This process eliminates the need for a Splunk forwarder when you send application events."

NEW QUESTION # 109
A new forwarder has been installed with a manually created deploymentclient.conf.
What is the next step to enable the communication between the forwarder and the deployment server?

- A. Restart Splunk on the deployment client.
- B. Restart Splunk on the deployment server.
- C. Wait for up to the time set in the phoneHomeIntervalInSecs setting.
- D. Enable the deployment client in Splunk Web under Forwarder Management.

Answer: A

Explanation:
The next step to enable the communication between the forwarder and the deployment server after installing a new forwarder with a manually created deploymentclient.conf is to restart Splunk on the deployment client. The deploymentclient.conf file contains the settings for the deployment client, which is a Splunk instance that receives updates from the deployment server. The file must include the targetUri attribute, which specifies the hostname and management port of the deployment server. To apply the changes in the deploymentclient.conf file, Splunk must be restarted on the deployment client. Therefore, option C is the correct answer. NEW QUESTION # 110
Which of the following is valid distribute search group?
A)
```
[distributedSearch:Paris]
default = false
servers = server1, server2
```
B)
```
[searchGroup:Paris]
default = false
servers = server1:8089, server2:8089
```
C)
```
[searchGroup:Paris]
default = false
servers = server1:9997, server2:9997
```
D)
```
[distributedSearch:Paris]
default = false
servers = server1:8089, server2:8089
```

- A. Option D
- B. Option B
- C. option A
- D. Option C

Answer: C

NEW QUESTION # 111
What is the correct curl to send multiple events through HTTP Event Collector?

- A. Option D

- B. Option A
- C. Option B
- D. Option C

Answer: C

Explanation:
curl "https://mysplunkserver.example.com:8088/services/collector" \ -H "Authorization: Splunk DF4S7ZE4-3GS1-8SFS-E777-0284GG91PF67" \ -d '{"event": "Hello World"}, {"event": "Hola Mundo"}, {"event": "Hallo Welt"}'. This is the correct curl command to send multiple events through HTTP Event Collector (HEC), which is a token-based API that allows you to send data to Splunk Enterprise from any application that can make an HTTP request. The command has the following components:
The URL of the HEC endpoint, which consists of the protocol (https), the hostname or IP address of the Splunk server (mysplunkserver.example.com), the port number (8088), and the service name (services /collector).
The header that contains the authorization token, which is a unique identifier that grants access to the HEC endpoint. The token is prefixed with Splunk and enclosed in quotation marks. The token value (DF4S7ZE4-3GS1-8SFS-E777-0284GG91PF67) is an example and should be replaced with your own token value.
The data payload that contains the events to be sent, which are JSON objects enclosed in curly braces and separated by commas. Each event object has a mandatory field called event, which contains the raw data to be indexed. The event value can be a string, a number, a boolean, an array, or another JSON object. In this case, the event values are strings that say hello in different languages.

NEW QUESTION # 112

Which of the following is a valid method to create a Splunk user?

- A. Create a user on the host operating system.
- B. Splunk REST API.
- C. Add the username to users. conf.
- D. Create a support ticket.

Answer: B

Explanation:
Splunk REST API is a valid method to create a Splunk user. The Splunk REST API allows administrators to create, edit, and delete users programmatically using HTTP requests. The other options are not valid methods to create a Splunk user. Creating a support ticket does not create a user, but requests assistance from Splunk support. Creating a user on the host operating system does not create a Splunk user, but a system user. Adding the username to users.conf does not create a user, but modifies the configuration file that stores user information. References = Configure users with the CLI, Configure users and roles

NEW QUESTION # 113

......

Do You Want To Pass Splunk SPLK-1003 Exam Successfully And Effectively

Free trials before buying our SPLK-1003 study guide materials, What's more, the passing rate of SPLK-1003 training test engine is as high as 100%, Our SPLK-1003 guide questions have the most authoritative test counseling platform, and each topic in SPLK-1003 practice engine is carefully written by experts who are engaged in researching in the field of professional qualification exams all the year round.

You absolutely can pass your exam.
