These three versions of our PSPO-II Practice Engine can provide you study on all conditions. Come and buy our PSPO-II exam guide!

## Scrum Professional Scrum Product Owner II Sample Questions (Q59-Q64):

### NEW QUESTION # 59

Which approaches could help the Product Owner reduce waste in managing Product Backlog (choose the best two answers).

- A. Create another Product Backlog dedicated to Product Backlog Items that are near the top.
- **B. Describe the Product Backlog Item in a precise, explicit way as expected outcomes.**
- **C. Only write full details for Product Backlog Items that are near the top of the Product Backlog**
- D. Delegate 50% of the total amount of Product Backlog Items to the Developers.

**Answer: B,C**

### NEW QUESTION # 60

The Developers inform the Product Owner during the Sprint that they are not likely to complete everything they forecasted. What would you expect a Product Owner to do?  
(choose the best answer)

- A. Inform management that more resources are needed.
- B. Change the Sprint Goal to match what the Developers can deliver.
- C. Skip Product Backlog refinement activities.
- D. End the Sprint, since the goal cannot be achieved.
- E. Reduce the scope of the Sprint, if possible, to still meet the Sprint Goal.

**Answer: E**

Explanation:

According to the Professional Scrum Product Owner II certification guide<sup>1</sup>, the Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. This means that the Product Owner should collaborate with the Developers and the Scrum Master to find the best way to deliver value in the current Sprint, even if the initial forecast is not met. The Product Owner should not change or abandon the Sprint Goal, as it is a commitment made by the Scrum Team during Sprint Planning. The Product Owner should also not skip Product Backlog refinement activities, as they are essential for preparing the Product Backlog for future Sprints. The Product Owner should not end the Sprint prematurely, as it may cause more disruption and waste than delivering a potentially releasable Increment. The Product Owner should not inform management that more resources are needed, as it may imply that the Scrum Team is not self-organizing and cross-functional. The Product Owner should respect the Developers' autonomy and professionalism and support them in finding the best solution to the problem. Therefore, the best answer is to reduce the scope of the Sprint, if possible, to still meet the Sprint Goal. This means that the Product Owner and the Developers should negotiate the scope of the Sprint Backlog within the Sprint, removing or adding Product Backlog items that are aligned with the Sprint Goal and the value delivery. #### NEW QUESTION # 61

When an Increment is considered valuable? (choose the best two answers)

- A. It increases customer satisfaction
- B. It is delivered before the deadline
- C. It reduce long-term operational costs.
- D. It includes all the features that the Product Owner expects

**Answer: A,C**

#### NEW QUESTION # 62

Which activities will a Product Owner likely engage in during a Sprint?  
(choose the best three answers)

- A. Prioritize the Developer's tasks.
- B. Gather information and opinions from stakeholders.
- C. Answer questions from the Developers about items in the current Sprint.
- D. Update the Sprint burndown chart.
- E. Run the Daily Scrum.
- F. Reorder items in the Product Backlog.

**Answer: B,C,F**

Explanation:

A: Reorder items in the Product Backlog: The Product Owner is responsible for ordering the Product Backlog to maximize value<sup>12</sup>.

B: Answer questions from the Developers about items in the current Sprint: The Product Owner is engaged throughout the sprint, answering questions on how things are supposed to function & look<sup>4</sup>.

E: Gather information and opinions from stakeholders: Gathering information and opinions from stakeholders is a key activity for the Product Owner, as it helps in understanding the value and ordering the Product Backlog

#### NEW QUESTION # 63

Which of the following statements about the Product Backlog are true?  
(choose the best two answers)

- A. Only the Product Owner can place items on the Product Backlog.
- B. All Product Backlog items must be identified before the first Sprint begins.

- C. The Product Backlog is ordered by the Product Owner.
- D. All Product Backlog items must be expressed as user stories.
- E. The Product Backlog should be visible to the Scrum Team and stakeholders.
- F. The Product Backlog represents the input of all stakeholders and eliminates any

**Answer: C,E**

Explanation:

need for the Developers to speak to stakeholders.

Explanation:

The Product Backlog is an ordered list of what is needed to improve the product, and it is the single source of work undertaken by the Scrum Team. The Product Owner is responsible for ordering the Product Backlog items by value, risk, priority, and dependencies. The Product Backlog should be transparent and accessible to the Scrum Team and the stakeholders, so that everyone can understand the scope and progress of the product development. Therefore, options A and B are true statements about the Product Backlog.

Option C is not true because the Product Backlog items can be expressed in various formats, such as user stories, use cases, scenarios, or any other way that clearly conveys the intent and value of the item. User stories are a common and useful technique, but not a mandatory one.

Option D is not true because the Product Backlog is not a fixed and complete specification of the product, but rather an emergent and dynamic artifact that evolves over time. The Product Backlog items are refined and clarified by the Product Owner and the Developers throughout the product development process, and new items can be added or removed as needed. The Product Backlog does not need to be fully defined before the first Sprint begins, but only enough to support the first Sprint Planning.

Option E is not true because the Product Owner is not the only source of ideas and requirements for the product. The Product Owner collaborates with the Developers and the stakeholders to discover, validate, and prioritize the Product Backlog items. The Product Owner may delegate the authority to add items to the Product Backlog to others, but remains accountable for the ordering and the value of the Product Backlog.

Option F is not true because the Product Backlog does not replace the communication and collaboration between the Developers and the stakeholders. The Product Backlog represents the input of all stakeholders, but it is not a substitute for direct feedback and interaction. The Developers need to engage with the stakeholders to understand their needs, expectations, and feedback, and to deliver a valuable product increment that meets the Sprint Goal and the Definition of Done.
