

Databricks Databricks-Certified-Data-Engineer-Associate Valid Dumps Sheet - Databricks-Certified-Data-Engineer-Associate Exam Guide Materials

Purpose of this Exam Guide

The purpose of this exam guide is to give you an overview of the exam and what is covered on the exam to help you determine your exam readiness. This document will get updated anytime there are any changes to an exam (and when those changes will take effect on an exam) so that you can be prepared. This version covers the currently live exam as of August 1, 2023.

Audience Description

The Databricks Certified Data Engineer Associate certification exam assesses an individual's ability to use the Databricks Lakehouse Platform to complete introductory data engineering tasks. This includes an understanding of the Lakehouse Platform and its workspace, its architecture, and its capabilities. It also assesses the ability to perform multi-hop architecture ETL tasks using Apache Spark SQL and Python in both batch and incrementally processed paradigms. Finally, the exam assesses the tester's ability to put basic ETL pipelines and Databricks SQL queries and dashboards into production while maintaining entity permissions. Individuals who pass this certification exam can be expected to complete basic data engineering tasks using Databricks and its associated tools.

About the Exam

- Number of items: 45 multiple-choice questions
- Time limit: 90 minutes
- Registration fee: USD 200, plus applicable taxes as required per local law
- Delivery method: Online Proctored
- Test aides: none allowed.
- Prerequisite: None required; course attendance and six months hands-on experience in Databricks is highly recommended
- Unsourced Content: Exams may include unsourced items to gather statistical information for future use. These items are not identified on the form and do not impact your score. Additional time is factored into account for this content.

What's more, part of that DumpTorrent Databricks-Certified-Data-Engineer-Associate dumps now are free: https://drive.google.com/open?id=1fE8ex7_5x9FKFIa2m-ooNzi3Sm_UBvZu

Databricks offers a free demo version for you to verify the authenticity of the Databricks Databricks-Certified-Data-Engineer-Associate exam prep material before buying it. 365 days free upgrades are provided by Databricks Databricks-Certified-Data-Engineer-Associate exam dumps you purchased change. We guarantee to our valued customers that Databricks Databricks-Certified-Data-Engineer-Associate Exam Dumps will save you time and money, and you will pass your Databricks Databricks-Certified-Data-Engineer-Associate exam.

Databricks Certified Data Engineer Associate certification is recognized globally and is highly valued by employers in the data engineering industry. Becoming certified as a Databricks data engineer associate demonstrates that an individual has the necessary skills and knowledge to work with Databricks technologies and can apply them to real-world scenarios. Databricks Certified Data Engineer Associate Exam certification also helps individuals stand out in a highly competitive job market, as it serves as a testament to their commitment to professional development.

The Databricks Databricks-Certified-Data-Engineer-Associate exam is conducted online and consists of 80 multiple-choice questions. The duration of the exam is 2 hours, and candidates must achieve a minimum score of 60% to pass. Databricks-Certified-Data-Engineer-Associate Exam Fee is \$300, and candidates can schedule their exam at any time through the GAQM website. Databricks Certified Data Engineer Associate Exam certification is valid for three years and can be renewed by passing the latest version of the exam.

The GAQM Databricks-Certified-Data-Engineer-Associate (Databricks Certified Data Engineer Associate) Certification Exam is

designed to validate the skills and knowledge of data engineers who work with the Databricks Unified Analytics Platform. Databricks Certified Data Engineer Associate Exam certification is ideal for professionals who want to demonstrate their expertise in building and optimizing data pipelines, data transformation, and data storage using Databricks.

Databricks-Certified-Data-Engineer-Associate Exam Guide Materials | Reliable Databricks-Certified-Data-Engineer-Associate Test Prep

The DumpTorrent is a leading platform that has been helping the Databricks Databricks-Certified-Data-Engineer-Associate exam aspirants for many years. Over this long time period, thousands of Databricks Databricks-Certified-Data-Engineer-Associate Exam candidates have passed their dream Databricks-Certified-Data-Engineer-Associate certification exam and have become a member of Databricks Databricks-Certified-Data-Engineer-Associate certification exam community.

Databricks Certified Data Engineer Associate Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111

A data engineer needs to apply custom logic to identify employees with more than 5 years of experience in array column employees in table stores. The custom logic should create a new column exp_employees that is an array of all of the employees with more than 5 years of experience for each row. In order to apply this custom logic at scale, the data engineer wants to use the FILTER higher-order function.

Which of the following code blocks successfully completes this task?

```

SELECT
    store_id,
A.   employees,
    FILTER (employees, i -> i.years_exp > 5) AS exp_employees
FROM stores;

SELECT
    store_id,
B.   employees,
    FILTER (exp_employees, years_exp > 5) AS exp_employees
FROM stores;

SELECT
    store_id,
C.   employees,
    FILTER (employees, years_exp > 5) AS exp_employees
FROM stores;

SELECT
    store_id,
    employees,
D.   CASE WHEN employees.years_exp > 5 THEN employees
        ELSE NULL
    END AS exp_employees
FROM stores;

SELECT
    store_id,
E.   employees,
    FILTER (exp_employees, i -> i.years_exp > 5) AS exp_employees
FROM stores;

```

- A. Option C
- B. Option E
- C. Option D
- D. Option B
- E. Option A

Answer: E

Explanation:

Option A is the correct answer because it uses the FILTER higher-order function correctly to filter out employees with more than 5 years of experience from the array column "employees". It applies a lambda function `i -> i.years_exp > 5` that checks if the years of experience of each employee in the array is greater than 5. If this condition is met, the employee is included in the new array column "exp_employees".

References: The use of higher-order functions like FILTER can be referenced from Databricks documentation on Higher-Order Functions.

NEW QUESTION # 112

A data engineer is attempting to drop a Spark SQL table `my_table`. The data engineer wants to delete all table metadata and data.

They run the following command:

```
DROP TABLE IF EXISTS my_table
```

While the object no longer appears when they run SHOW TABLES, the data files still exist. Which of the following describes why the data files still exist and the metadata files were deleted?

- A. The table's data was smaller than 10 GB
- B. The table did not have a location
- **C. The table was external**
- D. The table was managed
- E. The table's data was larger than 10 GB

Answer: C

Explanation:

Explanation

The reason why the data files still exist while the metadata files were deleted is because the table was external.

When a table is external in Spark SQL (or in other database systems), it means that the table metadata (such as schema information and table structure) is managed externally, and Spark SQL assumes that the data is managed and maintained outside of the system. Therefore, when you execute a DROP TABLE statement for an external table, it removes only the table metadata from the catalog, leaving the data files intact. On the other hand, for managed tables (option E), Spark SQL manages both the metadata and the data files. When you drop a managed table, it deletes both the metadata and the associated data files, resulting in a complete removal of the table.

NEW QUESTION # 113

A data engineer is maintaining a data pipeline. Upon data ingestion, the data engineer notices that the source data is starting to have a lower level of quality. The data engineer would like to automate the process of monitoring the quality level. Which of the following tools can the data engineer use to solve this problem?

- A. Unity Catalog
- B. Delta Lake
- C. Data Explorer
- D. Auto Loader
- **E. Delta Live Tables**

Answer: E

Explanation:

Explanation

<https://docs.databricks.com/delta-live-tables/expectations.html>

Delta Live Tables is a tool provided by Databricks that can help data engineers automate the monitoring of data quality. It is designed for managing data pipelines, monitoring data quality, and automating workflows.

With Delta Live Tables, you can set up data quality checks and alerts to detect issues and anomalies in your data as it is ingested and processed in real-time. It provides a way to ensure that the data quality meets your desired standards and can trigger actions or notifications when issues are detected. While the other tools mentioned may have their own purposes in a data engineering environment, Delta Live Tables is specifically designed for data quality monitoring and automation within the Databricks ecosystem.

NEW QUESTION # 114

Which of the following benefits of using the Databricks Lakehouse Platform is provided by Delta Lake?

- A. The ability to distribute complex data operations
- **B. The ability to support batch and streaming workloads**
- C. The ability to manipulate the same data using a variety of languages
- D. The ability to set up alerts for query failures
- E. The ability to collaborate in real time on a single notebook

Answer: B

Explanation:

Explanation

Delta Lake is a key component of the Databricks Lakehouse Platform that provides several benefits, and one of the most significant

benefits is its ability to support both batch and streaming workloads seamlessly. Delta Lake allows you to process and analyze data in real-time (streaming) as well as in batch, making it a versatile choice for various data processing needs. While the other options may be benefits or capabilities of Databricks or the Lakehouse Platform in general, they are not specifically associated with Delta Lake.

NEW QUESTION # 115

A data engineer needs to create a table in Databricks using data from a CSV file at location /path/to/csv.

They run the following command:

```
CREATE TABLE new_table  
  
_____  
OPTIONS (  
  header = "true",  
  delimiter = "|"   
) databricks  
LOCATION "path/to/csv"
```

Which of the following lines of code fills in the above blank to successfully complete the task?

- A. None of these lines of code are needed to successfully complete the task
- B. USING DELTA
- C. FROM "path/to/csv"
- **D. USING CSV**
- E. FROM CSV

Answer: D

NEW QUESTION # 116

.....

Using Databricks-Certified-Data-Engineer-Associate exam guide allows you to learn without any obstacles anytime and anywhere. All Databricks-Certified-Data-Engineer-Associate exam materials in the platform include PDF, PC test engine, and APP test engine three modes. Among them, the PDF version of learning materials is easy to download and print into a paper version for practice and easy to take notes; PC version of Databricks-Certified-Data-Engineer-Associate training torrent can imitate real test environment and conduct time-limited testing, and the system will automatically score for you after the test; and APP version of Databricks-Certified-Data-Engineer-Associate exam guide supports any electronic device.
