Last but not least, we have free demos for your reference, as in the following, you can download which PEGACPSA24V1 Exam Braindumps demo you like and make a choice.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q84-Q89):

NEW QUESTION # 84

Which feature in Pega enables real-time analysis of case data?

- A. Data Pages
- B. SLA Rules
- C. Work Queues
- **D. Insights**

Answer: D

Explanation:

Insights provide real-time data analysis by allowing users to create interactive reports and visualizations.

They enable quick decision-making by displaying trends, case statuses, and performance metrics. This improves business intelligence and case management efficiency. Insights ensure data-driven decision-making.

NEW QUESTION # 85

Which component allows users to group data in Insights for better visualization?

- A. SLA Policy
- B. Case Escalation
- C. Work Queue Routing
- **D. Aggregate Functions**

Answer: D

Explanation:

Aggregate Functions enable users to group data and apply calculations, such as sum, count, and average in Insights. This helps summarize case data for better analysis. SLA policies, work queue routing, and case escalation are unrelated to data grouping in reports. Aggregation improves report clarity and decision-making.

NEW QUESTION # 86

Which audit mechanism ensures tracking of case modifications and assignments?

- A. Case Routing
- **B. Field Audit Log**
- C. Work Queue Processing
- D. SLA Goal Adjustment

Answer: B

Explanation:

A Field Audit Log tracks changes made to case properties and assignments, ensuring traceability of modifications. This helps in compliance audits, forensic investigations, and data security analysis. It maintains a detailed change history. It improves accountability in case processing.

NEW QUESTION # 87

Which two data relationships are supported when defining embedded data? (Choose Two)

- A. Many-to-Many
- **B. One-to-One**
- **C. One-to-Many**
- D. Many-to-One

Answer: B,C

Explanation:

One-to-One relationships are used when a single instance of data relates to another single instance (e.g., an address in a profile). One-to-Many relationships allow a single object to contain multiple related records (e.g., multiple phone numbers for a contact). These relationships ensure structured data management.

NEW QUESTION # 88

Which two settings can be customized in a Mobile App Channel? (Choose Two)

- **A. Navigation and menu layout**
- B. SLA configuration
- **C. Branding and theme**
- D. Work queue assignments

Answer: A,C

Explanation:

A Mobile App Channel allows customization of branding (logos, colors, themes) and navigation (menus, actions, gestures) to enhance user experience. SLA settings and work queue assignments relate to workflow management, not mobile configuration. Proper mobile customization improves app usability and engagement.

NEW QUESTION # 89

.....

Do you want to gain all these PEGACPSA24V1 certification exam benefits? Looking for the quick and complete Pegasystems PEGACPSA24V1 exam dumps preparation way that enables you to pass the PEGACPSA24V1 certification exam with good scores? If your answer is yes then you are at the right place and you do not need to go anywhere. Just download the Dumpkiller PEGACPSA24V1 Questions and start Pegasystems PEGACPSA24V1 exam preparation without wasting further time.

PEGACPSA24V1 Questions Pdf: https://www.dumpkiller.com/PEGACPSA24V1_braindumps.html
